NEW QUESTION # 44

Universal Containers (UC) provides customer support for two separate business groups. UC requires that cases for each business group have different support processes and fields.

Which feature should a consultant implement to meet the requirement?

- A. Dynamic Forms
- **B. Record Types**
- C. Omni-Channel

Answer: B

Explanation:

To accommodate different support processes and fields for two separate business groups at Universal Containers (UC), implementing Record Types is the appropriate solution. Record Types enable UC to define different sets of picklist values, page layouts, and processes for each business group's cases. This allows for customization of the user interface and the data model to reflect the specific requirements of each group, ensuring that agents have access to the relevant fields and follow the correct process when managing cases. This customization enhances the efficiency and effectiveness of case management by aligning it with the distinct needs of each business group.

NEW QUESTION # 45

Cloud Kicks (CK) uses Service Cloud and Slack. For difficult cases, service agents want to create a swarm in Slack to pull in experts from multiple CK departments.

What should the consultant recommend to an agent who wants to launch a Slack Swarm?

- A. Apex trigger
- B. Escalation rules
- **C. Quick Action**

Answer: C

Explanation:

For agents wanting to launch a Slack Swarm for difficult cases, Quick Actions provide a straightforward and efficient way to initiate these collaborative efforts. Quick Actions can be configured to start a swarm directly from the Salesforce record, facilitating rapid cross-departmental collaboration in Slack. This approach streamlines the process of pulling in experts from various departments to work together on solving complex customer issues.
