

# Study NetSec-Pro Test | Certification NetSec-Pro Book Torrent

BONUS!!! Download part of VCE4Dumps NetSec-Pro dumps for free: <https://drive.google.com/open?id=1yOi2Yw-ZqHhYwqlvSURZkyqEAicThS6u>

We can proudly say that our NetSec-Pro exam questions are global. So no matter what kinds of NetSec-Pro test torrent you may ask, our after sale service staffs will help you to solve your problems of NetSec-Pro practice braindump in the most professional way. Since our customers aiming to NetSec-Pro study tool is from different countries in the world, and there is definitely time difference among us, we will provide considerate online after-sale service on our NetSec-Pro training guide twenty four hours a day, seven days a week, please just feel free to contact with us anywhere at any time.

Generally speaking, the clients will pass the test if they have finished learning our NetSec-Pro test guide with no doubts. The odds to fail in the test are approximate to zero. But to guarantee that our clients won't suffer the loss we will refund the clients at once if they fail in the test unexpectedly. The procedures are very simple and the clients only need to send us their proofs to fail in the NetSec-Pro test and the screenshot or the scanning copies of the clients' failure scores. The clients can consult our online customer staff about how to refund, when will the money be returned backed to them and if they can get the full refund or they can send us mails to consult these issues.

## Certification NetSec-Pro Book Torrent & Latest NetSec-Pro Exam Dumps

The advent of our NetSec-Pro study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the NetSec-Pro real exam, our NetSec-Pro practice materials closely co-related with it. And their degree of customer's satisfaction is escalating. Besides, many exam candidates are looking forward to the advent of new NetSec-Pro versions in the future.

### Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>

## Palo Alto Networks Network Security Professional Sample Questions (Q20-Q25):

### NEW QUESTION # 20

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. PDF summary
- B. SNMP
- C. CSV export
- D. Custom

**Answer: A,D**

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs.

Custom Reports

"Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility.

They are generated within Panorama and can include data on newly categorized AI URL types." (Source: Panorama Reports) PDF Summaries

"You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review." (Source: Export Reports as PDF) Together, these options provide a consistent, standardized method to push insights about AI-based URL categories to branch devices.

### NEW QUESTION # 21

Using Prisma Access, which solution provides the most security coverage of network protocols for the mobile workforce?

- A. Enterprise browser
- B. Clientless VPN
- **C. Client-based VPN**
- D. Explicit proxy

**Answer: C**

Explanation:

Client-based VPN solutions like GlobalProtect provide full coverage for the mobile workforce by extending the enterprise security stack to remote endpoints. It establishes a secure tunnel, allowing consistent security policies across the enterprise perimeter and the mobile workforce.

"GlobalProtect is a client-based VPN that provides secure, consistent protection for mobile users by extending the security capabilities of Prisma Access to remote endpoints, covering all network protocols." (Source: GlobalProtect Admin Guide)

#### NEW QUESTION # 22

How does Strata Logging Service help resolve ever-increasing log retention needs for a company using Prisma Access?

- A. Log traffic using the licensed bandwidth purchased for Prisma Access reduces overhead.
- B. It increases resilience due to decentralized collection and storage of logs.
- **C. It can scale to meet the capacity needs of new locations as business grows.**
- D. Automatic selection of physical data storage regions decreases adoption time.

**Answer: C**

Explanation:

The Strata Logging Service offers scalable log storage to accommodate data growth, which ensures organizations can retain logs for compliance and threat hunting as their environments expand.

"The Strata Logging Service is designed to scale dynamically to accommodate growing log retention needs, allowing enterprises to maintain comprehensive visibility as they expand their network footprint." (Source: Strata Logging Service Overview)

#### NEW QUESTION # 23

How does a firewall behave when SSL Inbound Inspection is enabled?

- A. It decrypts inbound and outbound SSH connections.
- B. It decrypts traffic between the client and the external server.
- **C. It acts as meddler-in-the-middle between the client and the internal server.**
- D. It acts transparently between the client and the internal server.

**Answer: C**

Explanation:

SSL Inbound Inspection allows the firewall to decrypt incoming encrypted traffic to internal servers (e.g., web servers) by acting as a man-in-the-middle (MITM). The firewall uses the private key of the server to decrypt the session and apply security policies before re-encrypting the traffic.

"SSL Inbound Inspection requires you to import the server's private key and certificate into the firewall. The firewall then acts as a man-in-the-middle (MITM) to decrypt inbound sessions from external clients to internal servers for inspection." (Source: SSL Inbound Inspection)

#### NEW QUESTION # 24

What key capability distinguishes Content-ID technology from conventional network security approaches?

- A. It relies primarily on reputation-based filtering.
- **B. It provides single-pass application layer inspection for real-time threat prevention.**
- C. It performs packet header analysis short of deep packet inspection.
- D. It exclusively monitors network traffic volumes.

**Answer: B**

Explanation:

Content-ID is the core of Palo Alto Networks' prevention architecture, providing single-pass application layer inspection to deliver real-time threat prevention across all traffic.

"Content-ID uses a single-pass architecture to perform application-layer (Layer 7) traffic inspection and real-time threat prevention. Unlike traditional firewalls that rely on multiple scans, Content-ID inspects traffic once to enforce multiple security controls simultaneously." (Source: Content-ID Overview) By consolidating security functions in a single pass, it ensures both efficiency and comprehensive security.

### NEW QUESTION # 25

• • • • •

Our NetSec-Pro practice questions are carefully compiled by our professional experts to be sold all over the world. So the content should be easy to be understood. The difficult questions of the NetSec-Pro exam materials will have vivid explanations. So you will have a better understanding after you carefully see the explanations. At the same time, our NetSec-Pro Real Exam just needs to cost you a few spare time. After about twenty to thirty hours' practice, you can completely master all knowledge.
