D-UN-DY-23 Related Certifications & D-UN-DY-23 New Dumps Files

Prep4cram offers Dell Unity Deploy 2023 Exam (D-UN-DY-23) practice exams (desktop & web-based) which are customizable. It means candidates can set time and EMC D-UN-DY-23 questions of the Dell Unity Deploy 2023 Exam (D-UN-DY-23) practice exam according to their learning needs. The Real D-UN-DY-23 Exam environment of practice test help test takers to get awareness about the test pressure so that they become capable to counter this pressure during the final exam.

EMC Dell Unity Deploy 2023 Exam Sample Questions (Q444-Q449):

NEW QUESTION # 444

Which protocols are supported by Dell EMC UnityVSA for storage provisioning?

- A. iSCSI, NFS, and SMB
- B. SMB and NFS only
- C. iSCSI and SMB only
- D. FC, NFS, and iSCSI

Answer: A

NEW QUESTION # 445

Which firewall ports are required to be open for a successful outbound connection when configuring integrated secure connect

gateway?

- A. 443 and 8443
- B. 80 and 9443
- C. 9443 and 443
- D. 80 and 443

Answer: A

NEW QUESTION # 446

What term refers to the link between a host initiator and a target port on a Dell EMC Unity XT storage system?

- A. Physical Path
- B. Logical Path
- C. Initiator Path
- D. Target Path

Answer: B

NEW QUESTION # 447

Assuming that no snapshots currently exist for the Base LUN, what is the maximum number of Thin Clones for the Base LUN?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION # 448

A storage administrator must configure replication from a production Dell Unity XT 680F to an offsite DR Dell Unity XT 480. Block resources must be replicated without data loss if the production site becomes unavailable. File resources can be replicated with an acceptable amount of data difference on the destination.

What replication configuration meets the requirements?

- A. Configure the replication interfaces on the 4-port mezzanine card.
- B. Set an RPO of 0 on the synchronous replication sessions.
- C. Configure the replication connection mode to Both.
- D. Set Unisphere resource filtering to All.

Answer: C

Explanation:

To meet the requirements, the replication connection mode must be set to Both, which allows both synchronous and asynchronous replication sessions to be configured on the same connection. This way, block resources can use synchronous replication, which ensures zero data loss, and file resources can use asynchronous replication, which allows some data difference on the destination. Setting Unisphere resource filtering to All is not necessary, as it only affects the display of resources in the Unisphere GUI. Setting an RPO of 0 on the synchronous replication sessions is redundant, as synchronous replication always has an RPO of 0. Configuring the replication interfaces on the 4-port mezzanine card is not relevant, as it only affects the performance and availability of the replication network.
