SC-401 Latest Exam Practice, SC-401 Latest Exam Tips

Learning at electronic devices does go against touching the actual study. Although our SC-401 exam dumps have been known as one of the world's leading providers of SC-401 exam materials. For your convenience, we especially provide several demos for future reference and we promise not to charge you of any fee for those downloading. Therefore, we welcome you to download to try our SC-401 Exam. Then you will know whether it is suitable for you to use our SC-401 test questions. We are sure to be at your service if you have any downloading problems.

Microsoft Administering Information Security in Microsoft 365 Sample

Questions (Q169-Q174):

NEW QUESTION # 169

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies shown in the following table.

The DLP rules are configured as shown in the following table.

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Enable additional processing of the policies if there is a match for Rule1.
- B. Change the priority of DLP2 to 3.
- **C. Change the priority of DLP2 to 0.**
- D. Prevent additional processing of the policies if there is a match for Rule2

Answer: C

Explanation:

Current setup:

DLP1 (priority 0, Rule1) # Stop processing additional rules enabled # means if Rule1 matches, later rules (including Rule2 with Tip2) will never be evaluated.

Requirement: Ensure that if all rules match, the user sees Tip2 (Rule2's policy tip).

To fix this: Move DLP2 above DLP1 in priority (i.e., set DLP2 = priority 0). Then Rule2 will be evaluated first, and its policy tip (Tip2) will be displayed.

Why not others?

B). Prevent additional processing of the policies if there is a match for Rule2: That would stop processing later, but DLP1 would still block earlier due to its higher priority.

C). Change the priority of DLP2 to 3: That pushes it even lower, making it worse.

D). Enable additional processing for Rule1: Rule1 already has stop processing enabled. Changing that does not ensure Rule2 runs before Rule1, because priority is evaluated first.

Reference:

Microsoft Learn: Order of rule processing in DLP

Policies with lower priority numbers run first, and "Stop processing" ends evaluation.

NEW QUESTION # 170

HOTSPOT

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

To detect and protect confidential documents, we need a custom rule to identify project codes that start with 999 (since they are classified as confidential).

Box 1: A Sensitive Info Type (SIT) allows Microsoft Purview DLP policies to recognize structured data (e.g., project codes). DLP policies require a sensitive info type to detect content based on patterns, keywords, or dictionary terms. A sensitivity label alone does not define detection logic-it is used for classification and protection after content is identified.

Box 2: Since project codes follow a structured 10-digit pattern, we should use a Regular Expression (Regex) to match project codes that start with 999.

Example Regex pattern:

999\d{7}

This pattern detects a 10-digit number starting with "999".

NEW QUESTION # 171

You have a Microsoft 365 tenant that uses Microsoft Teams.

You create a data loss prevention (DLP) policy to prevent Microsoft Teams users from sharing sensitive information. You need to identify which locations must be selected to meet the following requirements:

- * Documents that contain sensitive information must not be shared inappropriately in Microsoft Teams.
- * If a user attempts to share sensitive information during a Microsoft Teams chat session, the message must be deleted immediately.

Which three locations should you select? To answer, select the appropriate locations in the answer area NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 172

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have a user named User1. Several users have full access to the mailbox of User1.

Some email messages sent to User1 appear to have been read and deleted before the user viewed them.

When you search the audit log in the Microsoft Purview portal to identify who signed in to the mailbox of User1, the results are blank.

You need to ensure that you can view future sign-ins to the mailbox of User1.

Solution: You run the Set-MailboxFolderPermission -Identity "User1" -User User1@contoso.com -AccessRights Owner command. Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The Set-MailboxFolderPermission -Identity "User1" -User User1@contoso.com -AccessRights Owner command is incorrect. This assigns folder permissions but does not enable auditing. It does not track who accessed the mailbox or deleted emails.

NEW QUESTION # 173

You have a Microsoft 365 E5 subscription.

You plan to use Microsoft Purview insider risk management.

You need to create an insider risk management policy that will detect data theft from Microsoft SharePoint Online by users that submitted their resignation or are near their employment termination date.

What should you do first?

- A. Onboard devices to Microsoft Defender for Endpoint.
- B. Configure a HR data connector.
- C. Configure a Physical badging connector.
- D. Configure Office indicators.

Answer: B

NEW QUESTION # 174

.....

We guarantee to you that the refund process is very simple and only if you provide us the screenshot or the scanning copy of your failure marks we will refund you in full immediately. If you have doubts or problems about our SC-401 exam torrent, please contact our online customer service or contact us by mails and we will reply and solve your problem as quickly as we can. We won't waste

your money and your time and if you fail in the exam we will refund you in full immediately at one time. We provide the best SC-401 Questions torrent to you and don't hope to let you feel disappointed.
