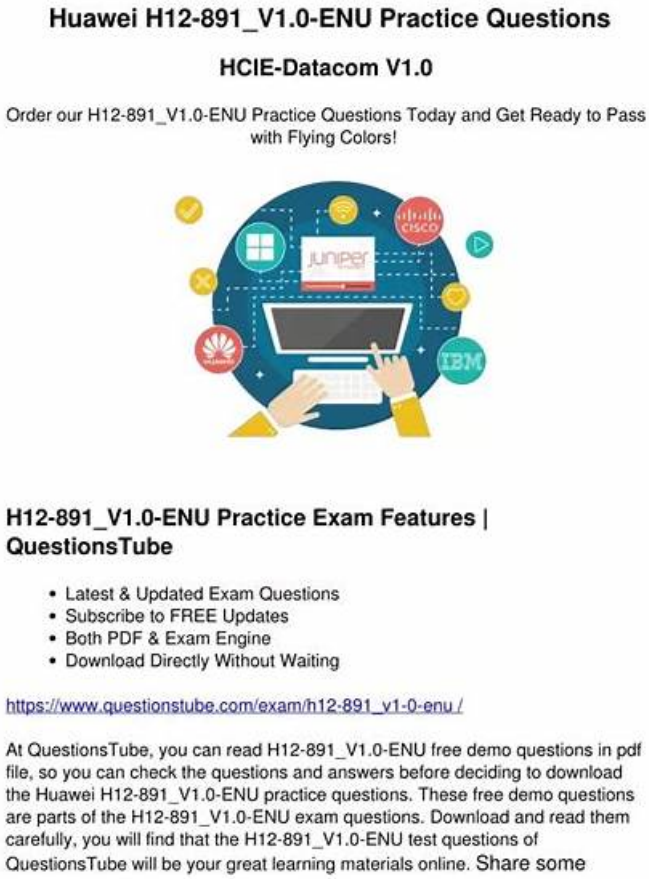
Ensured Success Huawei H12-891_V1.0 Exam Questions - 100% Money Back Guarantee



BONUS!!! Download part of Exams4sures H12-891_V1.0 dumps for free: https://drive.google.com/open?id=1VU4GRVQbt6dVgH4sbAAERyGDSyIAIu2z

In order to make you be rest assured to buy our H12-891_V1.0 exam software, we provide the safest payment method –PayPal payment. PayPal is one of the biggest international security payment systems. And we protect your personal information not be leaked. If you have any problem of H12-891_V1.0 Exam Dumps or interested in other test software, you can contact us online directly, or email us. We will try our best to help you pass the H12-891_V1.0 exam.

Huawei H12-891_V1.0 (HCIE-Datacom V1.0) Certification Exam is a challenging and comprehensive certification exam that tests the skills and knowledge required for planning, designing, implementing, operating, maintaining, and troubleshooting complex data communication networks. HCIE-Datacom V1.0 certification is highly valued by employers and can help candidates advance their careers in the field of data communication networks. Candidates who pass the exam demonstrate a deep understanding of network design principles, network security technologies, network management tools, and network optimization techniques.

Reliable H12-891_V1.0 Study Plan - New H12-891_V1.0 Exam Labs

You must improve your skills and knowledge to stay current and competitive. You merely need to obtain the H12-891_V1.0

certification exam badge in order to achieve this. You must pass the HCIE-Datacom V1.0 (H12-891_V1.0) exam to accomplish this, which can only be done with thorough exam preparation. Download the Huawei H12-891_V1.0 Exam Questions right away for immediate and thorough exam preparation. We have thousands of satisfied customers around the globe so you can freely join your journey for the HCIE-Datacom V1.0 (H12-891_V1.0) certification exam with us.

Huawei HCIE-Datacom V1.0 Sample Questions (Q177-Q182):

NEW QUESTION # 177
The network administrator is ready to use the 6to4 automatic tunnel to carry IPv6 data on the IPv4 network, and the IPv4 address of the router interface is 1381485210, so the corresponding tunnel address is 2001:8a0e:55d2:1:230:65ff:fe2:9a6?

- A. True
- B. False

Answer: B

NEW QUESTION # 178
The following description of the CHAP authentication function in the PPP protocol is correct?(Multiple choice questions).

- A. If the authenticator does not have a username configured, password
- B. can also be configured without the authenticated party interface Using the authentication sequence ID, random number, and key, a Hash value
- C. is calculated using the MD5 algorithm Three message interactions are required for authentication, and only the user name is transmitted on the network without the password
- D. The user name must be configured under the authenticated party interface for CHAP authentication

Answer: B,C,D

NEW QUESTION # 179
The path of an SR-MPLS TE tunnel can be calculated by the controller or tunnel ingress.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
Understanding SR-MPLS TE (Segment Routing MPLS Traffic Engineering)
What is SR-MPLS TE?
* Segment Routing (SR) replaces traditional MPLS LDP/RSVP-TE signaling.
* Uses SR-TE policies to define network paths without requiring per-flow state on intermediate routers.
# How is the SR-MPLS TE Path Calculated?# By the SDN Controller (Centralized Path Computation)
* The controller (e.g., Huawei iMaster NCE) calculates the optimal SR path based on:
* Bandwidth requirements
* Latency constraints
* Traffic policies
* The controller then delivers the SR policy to the ingress router.
# By the Ingress Router (Distributed Path Computation)
* The ingress router computes the SR path dynamically based on local constraints.
* This method is useful when no centralized controller is available.
Why is the Answer TRUE?
Both centralized (controller-based) and distributed (ingress router-based) path computation are supported in SR-MPLS TE.
Real-World Application:
* 5G and Cloud WANs: Centralized path optimization reduces congestion dynamically.
* Enterprise Networks: Local path computation ensures fast rerouting in case of failures.
# Reference: Huawei HCIE-Datacom Guide - SR-MPLS TE and Path Computation Methods

NEW QUESTION # 180
What can be determined from the following figure?
<R1> display ipv6 routing-table protocol isis
Public Routing Table : ISIS
Summary Count: 6
ISIS Routing Table's Status : < Active >
Summary Count: 6
Destination : 3000:FDEA::4
NextHop : FE80::2E0:FCFF:FE98:2577
Cost : 20
Interface : GigabitEthernet0/0/1
PrefixLength : 128
Preference : 15
Protocol : ISIS-L2
Flags : D

- A. R1 has six IS-IS IPv6 routes.
- B. R1 is not a Level-1 device.
- C. IS-IS IPv6 must have been enabled on GigabitEthernet0/0/1 of R1.
- D. R1 does not have IS-IS IPv6 routes.

Answer: A,B,C

Explanation:
* Analyzing the Routing Table Output:
* The command display ipv6 routing-table protocol isis shows all IPv6 routes learned via IS-IS.
* The output shows "Summary Count: 6", meaning R1 has six IS-IS IPv6 routes.
* Explanation of Correct Answers:# A. R1 has six IS-IS IPv6 routes.
* The "Summary Count: 6" confirms that six IS-IS IPv6 routes exist in R1's routing table.
# C. IS-IS IPv6 must have been enabled on GigabitEthernet0/0/1 of R1.
* The interface GigabitEthernet0/0/1 is listed as the next-hop, meaning IS-IS IPv6 must be enabled on that interface.
# D. R1 is not a Level-1 device.
* The protocol is listed as "ISIS-L2", indicating that R1 is an IS-IS Level-2 (backbone) router, not a Level-1 router.
* Incorrect Answer Explanation:# B. R1 does not have IS-IS IPv6 routes.
* Wrong! The output clearly shows six IS-IS IPv6 routes, proving this statement false.
Reference from Huawei HCIE-Datacom Documentation:
* Huawei IPv6 Routing Protocols Guide - IS-IS for IPv6
* HCIE-Datacom Routing & Switching Training - IS-IS L1 & L2 Operations
* Huawei IS-IS Configuration Guide - IPv6 Route Management

NEW QUESTION # 181
Is the following description of the BSR/RP mechanism correct?

- A. A C-BSR can also collect C-RP information by receiving C-RP packets
- B. BSR advertises BSR and C-RP information to all routers in the PIM-SM domain by flooding Bootstrap packets
- C. PIM-SM domain can have more than one C-BSR, but only one BSR can be elected by the C-BSR that receives the C-RP Packets are collected C-one RP information

Answer: A,B,C

NEW QUESTION # 182
.....

The majority of people encounter the issue of finding extraordinary HCIE-Datacom V1.0 (H12-891_V1.0) exam dumps that can help them prepare for the actual Huawei H12-891_V1.0 exam. They strive to locate authentic and up-to-date Huawei H12-891_V1.0 Practice Questions for the Financials in HCIE-Datacom V1.0 (H12-891_V1.0) exam, which is a tough ask.
