

# SRAN-Radio-Network-Performance-Optimization Valid Real Exam - Online SRAN-Radio-Network-Performance-Optimization Test

It is never too late to learn. You still have the chance to obtain the SRAN-Radio-Network-Performance-Optimization certificate as long as you want. What is more, many people have harvest happiness and success after passing the SRAN-Radio-Network-Performance-Optimization exam. Then you are available for various high salary jobs. You also can become lucky as long as you never give up hopes. Let us make it together. We will be your best friend on your way to get the SRAN-Radio-Network-Performance-Optimization Certification with our excellent learning braindumps.

As for Nokia SRAN-Radio-Network-Performance-Optimization exam, it is the most difficult to pass. But, as long as you believe in Real4exams, everything is ok. Real4exams Nokia SRAN-Radio-Network-Performance-Optimization exam simulations contain the most accurate questions and answers. If you don't believe our Nokia SRAN-Radio-Network-Performance-Optimization certification training, you can go to our Real4exams. You can find pdf real questions and answers and download it. And the purchase rate is unbelievably high every day. By choosing it, pass rate is 100%. Hurry up! Don't hesitate to add our Nokia SRAN-Radio-Network-Performance-Optimization Dumps Torrent to your shopping cart.

>> SRAN-Radio-Network-Performance-Optimization Valid Real Exam <<

## Online Nokia SRAN-Radio-Network-Performance-Optimization Test - Exam Questions SRAN-Radio-Network-Performance-Optimization Vce

In addition to the SRAN-Radio-Network-Performance-Optimization exam materials, our company also focuses on the preparation and production of other learning materials. If you choose our SRAN-Radio-Network-Performance-Optimization study guide this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. And if you buy our SRAN-Radio-Network-Performance-Optimization Study Guide, you will love it.

## Nokia MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 Sample Questions (Q12-Q17):

### NEW QUESTION # 12

The CB009425 feature provides several enhancements to improve the transmission link budget for VoNR, offering a better customer experience. Which statements are correct regarding this feature?

- A. Packet Loss Rate, or PLR, for VoNR is minimized, improving voice call quality.
- B. B and C
- C. A, B, and C
- D. Configurable uplink minimum TBS is used for VoNR DRBs.
- E. A only

- F. Specific initial BLER targets are used for VoNR DRBs.
- G. A, B, C, and D
- H. MCS downgrade control is used for VoNR DRBs.

**Answer: H**

Explanation:

The correct answer is D.

The feature is focused on improving VoNR link robustness and user experience, especially near the cell edge or in difficult RF conditions. VoNR is sensitive to packet loss, delay, and uplink coverage limitations.

Therefore, link-budget improvement features commonly target BLER behavior, transport block sizing, and MCS robustness.

Statement A is correct because minimizing Packet Loss Rate, or PLR, directly improves VoNR speech quality and reduces mute, clipping, or robotic voice effects.

Statement B is correct because VoNR bearers can use specific initial BLER targets. A more suitable BLER target helps the scheduler choose a more robust MCS for voice traffic.

Statement C is correct because a configurable uplink minimum TBS, or Transport Block Size, helps ensure that small VoNR packets are transmitted efficiently and reliably.

Statement D is correct because MCS downgrade control can improve robustness by selecting a more conservative modulation and coding scheme for VoNR DRBs when radio conditions require it.

Therefore, all listed enhancements are part of the VoNR link-budget improvement concept:

A, B, C, and D.

### NEW QUESTION # 13

Which port must be opened in NetAct for the connection from TraceSynthesis to NetAct?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

The correct answer is B .

The connection from TraceSynthesis to NetAct is typically based on secure web/API communication, which uses HTTPS . The standard HTTPS port is 443 . Therefore, port 443 must be opened in NetAct/firewall rules to allow TraceSynthesis to communicate with NetAct.

The other options are not the best answer:

8443 is often used as an alternative HTTPS/application-server port, but it is not the standard answer here.

22 is used for SSH, mainly for secure shell access or file transfer.

8080 is commonly used for unsecured HTTP or proxy/application access, not the secure NetAct connection expected here.

So the required port is:

443.

### NEW QUESTION # 14

In the context of radio capacity management , what is the significance of Scheduling Request periodicity ?

- A. It sets the maximum number of SSBs.
- B. It affects the latency and number of connected users.
- C. It controls the downlink throughput.
- D. It determines the modulation scheme used.

**Answer: B**

Explanation:

The correct answer is C .

Scheduling Request , or SR , is used by the UE to request uplink resources when it has uplink data to send.

The SR periodicity defines how often the UE gets an opportunity to send this scheduling request.

A shorter SR periodicity means the UE can request uplink resources more quickly, which improves uplink latency. However, it

consumes more PUCCH/control-channel resources, reducing the number of UEs that can be efficiently supported. A longer SR periodicity saves control-channel resources and can support more connected users, but it increases uplink access delay. Therefore, SR periodicity is important because it creates a trade-off between: Lower latency and higher connected-user capacity.

#### NEW QUESTION # 15

When selecting an LTE anchor layer for EN-DC , why is it important to check 3GPP band combinations ?

- A. To guarantee dual-uplink transmission support for all UE models
- B. To avoid configuring LTE with higher bandwidths
- C. To reduce the number of BTS neighbors required for 5G integration
- D. To ensure that LTE and NR bands are compatible and allowed as EN-DC pairs

**Answer: D**

Explanation:

The correct answer is B .

In 5G NSA EN-DC , the UE connects to LTE as the Master Cell Group , or anchor, and NR as the Secondary Cell Group . Not every LTE band can be paired with every NR band. The supported LTE-NR combinations are defined by 3GPP band-combination rules and must also be supported by the UE chipset and device capability.

For example, an operator may have LTE Band 3, Band 7, or Band 20 and NR n78, but only certain LTE-NR combinations may be valid for EN-DC. If the selected LTE anchor band is not supported in combination with the NR band, the UE will not be able to establish EN-DC even if LTE and NR coverage both exist.

Option C is not correct because dual-uplink support depends on UE capability and specific band-combination support; it cannot be guaranteed for all UE models. Option A and D are unrelated to the main purpose of checking 3GPP band combinations.

So the correct reason is:

To ensure that LTE and NR bands are compatible and allowed as EN-DC pairs.

#### NEW QUESTION # 16

A customer complains about coverage reduction after modernization of 4G TDD 4x4 sites to Concurrent mMIMO B41/n41 with AEHC module 64T64R . Which of the following statements regarding RF design changes to increase the coverage is correct?

- A. For concurrent mode, the tilt for both 4G and 5G is controlled by mMIMOSecSectorBFProfName and beamforming weight profile parameters.
- B. 5G tilt is controlled by tiltOffset , while the 4G tilt uses the AEHC RET control port.
- C. For concurrent mode, the tilt for both 4G and 5G is controlled by tiltOffset .
- D. 5G tilt is controlled by tiltOffset , while the 4G tilt is controlled by mMIMOSecSectorBFProfName .

**Answer: A**

Explanation:

The correct answer is C .

In a Concurrent mMIMO B41/n41 AEHC 64T64R deployment, LTE and NR share the same Massive MIMO active antenna system. Public Nokia material identifies AEHC as an AirScale Massive MIMO 64T64R B41 radio product, and Nokia's AirScale Massive MIMO portfolio is designed for high-capacity 5G /RAN deployments.

Unlike a passive antenna system where coverage is changed mainly by physical/electrical RET, Massive MIMO coverage is strongly influenced by beamforming profiles and beamforming weight parameters . In concurrent LTE/NR operation, the RF design must consider the shared active antenna behavior, not independent passive RET-style tilt control per technology.

Therefore, for concurrent 4G/5G mMIMO coverage adjustment, the correct statement is:

The tilt/coverage behavior for both 4G and 5G is controlled by mMIMOSecSectorBFProfName and beamforming weight profile parameters.

#### NEW QUESTION # 17

.....

With over a decade's business experience, our SRAN-Radio-Network-Performance-Optimization test torrent attached great importance to customers' purchasing rights all along. There is no need to worry about virus on buying electronic products. For we make endless efforts to assess and evaluate our SRAN-Radio-Network-Performance-Optimization exam prep' reliability for a long time and put forward a guaranteed purchasing scheme, we have created an absolutely safe environment and our SRAN-Radio-Network-Performance-Optimization Exam Question are free of virus attack. Given that there is any trouble with you, please do not hesitate to leave us a message or send us an email; we sincere hope that our SRAN-Radio-Network-Performance-Optimization test torrent can live up to your expectation.

**Online SRAN-Radio-Network-Performance-Optimization Test:** [https://www.real4exams.com/SRAN-Radio-Network-Performance-Optimization\\_braindumps.html](https://www.real4exams.com/SRAN-Radio-Network-Performance-Optimization_braindumps.html)

Our high quality SRAN-Radio-Network-Performance-Optimization vce torrent will make it easy to understand the knowledge about real exam dumps, At present, SRAN-Radio-Network-Performance-Optimization certification really enjoys tremendous popularity, The benefits after you pass the test Nokia Online SRAN-Radio-Network-Performance-Optimization Test certification are enormous and you can improve your social position and increase your wage, Nokia SRAN-Radio-Network-Performance-Optimization Valid Real Exam To fit oneself with the market need, they will choose to make progress in one specific developing direction.

Creating the Image Path, Displaying Two Frames from One Link, Our high quality SRAN-Radio-Network-Performance-Optimization Vce Torrent will make it easy to understand the knowledge about real exam dumps.

At present, SRAN-Radio-Network-Performance-Optimization certification really enjoys tremendous popularity, The benefits after you pass the test Nokia certification are enormous and you can improve your social position and increase your wage.

## **100% Pass Quiz 2026 The Best SRAN-Radio-Network-Performance-Optimization: MN: NCSS NPS - SRAN Radio Network Performance Optimization Certification Exam | GS40-NPS-SRPER-E-S03-2510 Valid Real Exam**

To fit oneself with the market need, they will choose to make progress in one specific developing direction, If you still have doubt about our SRAN-Radio-Network-Performance-Optimization pdf prep, you can free download our SRAN-Radio-Network-Performance-Optimization exam demo to have a try.
