## **HOT Reliable D-PSC-DS-01 Dumps Ebook 100% Pass | Latest Dell PowerScale Design v2 Exam Testking Exam Questions Pass for sure**

Now are you in preparation for D-PSC-DS-01 exam? If so, you must be a man with targets. Our PassExamDumps are committed to help such a man with targets to achieve the goal. D-PSC-DS-01 exam simulation software developed by us are filled with the latest and comprehensive questions. If you buy our product, we will offer one year free update of the questions for you. With our software, passing D-PSC-DS-01 Exam will no longer be the problem.

### **EMC Dell PowerScale Design v2 Exam Sample Questions (Q62-Q67):**

#### **NEW QUESTION # 62**

An Isilon cluster has two ports configured per node. Each port is on a different VLAN. Although incoming traffic is evenly distributed, transmitted data from the Isilon uses one port more than the other port.

What could be the cause of this imbalance?

- A. Static routes are configured on the less-used port
- **B. Source Based Routing is not enabled on the cluster**
- C. A default gateway was not configured on both ports
- D. Priority of the gateway in the less-used port set too low

**Answer: B**

#### **NEW QUESTION # 63**

Your customer is moving from a Restaurant/Bar business model to a Restaurant/Casino business model. You are helping architect the upgrade of a current 4-node X200 48 TB Isilon cluster, with 50% utilized for their video surveillance operations.

They want to upgrade from 15 FPS (NTSC) in H.264 codec, with a 15 days retention policy to 30 FPS (NTSC) in H.264 codec,

with a 30 days retention policy.

How many nodes of the same type will you need to add in order to meet the required changes and not exceed 70% raw capacity?

- A. 16 nodes
- **B. 8 nodes**
- C. 12 nodes
- D. 4 nodes

**Answer: B**

#### NEW QUESTION # 64

A media production company stores millions of small files and some large sequential video streams. They require backups directly to tape, data reduction for logs, and capacity enforcement for individual departments.

Which features should be included in the solution design?

- **A. NDMP integration, SmartQuotas, and inline data reduction**
- B. Inline data reduction only, because small files do not require quotas
- C. SmartLock, CloudPools, and SnapshotIQ only
- D. SyncIQ replication to a DR site, SmartPools only

**Answer: A**

#### NEW QUESTION # 65

A large manufacturing company is an existing Isilon customer with a cluster consisting of four NL400 nodes with 4TB drives. The cluster is using N+2:1 protection level and the file system shows that it is 60% utilized. Home directories and file shares comprise 75% of the existing content and the remainder is inactive deep archive. The company has 1,000 employees using Windows and Mac clients participating in a single Active Directory (AD) forest.

During a meeting with the CIO and Director of IT you discuss the company's recent acquisition - an engineering firm that specializes in Computer Aided Design (CAD). The engineering firm has 400 UNIX workstations that produce technical drawings which are currently stored on another vendor's SAN solution. The all UNIX environment uses NIS for authentication and name resolution. They do not currently use DNS or LDAP. The engineering company has an old storage system that has been experiencing problems and the CIO would like you to migrate the data onto the Isilon cluster. The CIO would like to eliminate all tape and recover the data onto disk.

The CIO is concerned about security of the company's intellectual property, especially with the rapid adoption of mobile devices and external cloud content sharing services such as DropBox, Egnyte, and SugarSync. They would like to implement an alternative that provides external file sharing and mobile device synchronization while maintaining security control over the company's data.

The Director of IT reports that users are storing non-work related content on the Isilon cluster. They would like to limit the amount of capacity that each user can consume in their home directory and want to ensure you provide the capability to easily visualize which users are over their allotment. The company's Windows users currently leverage Windows Shadow Copy to recover files that have been accidentally deleted. The IT department wants to ensure that Mac and incoming UNIX clients have the same functionality. The Director of IT also mentions that users are reporting slow response times when browsing their home directories and shared folders. They are concerned that Isilon cannot scale to support their combined requirements.

The customer provides the following environment summary from the engineering firm's recently departed IT staff:

- 20 TB of Home Directory data
- 100 TB of active CAD projects
- 400 TB of archived data stored on tape at an offsite warehouse

What steps would you recommend to the IT Director to allow for collaboration between the engineering company and the manufacturing company?

- A. Create a new pool for use by the collaboration users. Set up Access Zones on the Isilon cluster using AD and NIS authentication.
- **B. Set up Access Zones on the Isilon cluster using Active Directory (AD) and NIS authentication. Create directories and apply user group permissions from AD and NIS for each collaboration team.**
- C. Repoint the engineering users to the Active Directory controller Add the users to the appropriate Active Directory security group.
- D. Upload a collaboration user csv file into the cluster with usernames and passwords for the collaboration directory.

**Answer: B**

### NEW QUESTION # 66

A customer needs to consolidate 300 TB of home directory servers and shared file systems used by development and test groups. A key requirement is to prevent the systems from consuming all free capacity and impacting home directory content. Which Isilon node configuration should be proposed?

- A. NL-Series with SmartQuotas
- **B. X-Series with SmartQuotas**
- C. X-Series with SmartPools
- D. S-Series with InsightIQ

**Answer: B**

### NEW QUESTION # 67
