It shows you the real picture of your hard work and how easy it will be to clear the CISSP exam if you are ready for it.

## ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q235-Q240):

NEW QUESTION # 235

Which of the following is NOT a common integrity goal?

- A. Maintain internal and external consistency.
- **B. Prevent paths that could lead to inappropriate disclosure.**
- C. Prevent unauthorized users from making modifications.
- D. Prevent authorized users from making improper modifications.

**Answer: B**

Explanation:

Inappropriate disclosure is a confidentiality, not an integrity goal.

All of the other choices above are integrity goals addressed by the Clark-Wilson integrity model.

The Clark-Wilson model is an integrity model that addresses all three integrity goals:

1. prevent unauthorized users from making modifications,
2. prevent authorized users from making improper modifications, and
3. maintain internal and external consistency through auditing.

NOTE: Biba address only the first goal of integrity above

#### **NEW QUESTION # 236**

Which one of the following is the MOST crucial link in the computer security chain?

- A. People
- **B. Management**
- C. Awareness programs
- D. Access controls

**Answer: B**

#### **NEW QUESTION # 237**

A software interface to the operating system that implements access control by limiting the system commands that are available to a user is called a(n):

- A. Interrupt
- B. View
- **C. Restricted shell**
- D. Physically constrained user interface

**Answer: C**

Explanation:

Answer Interrupt refers to a software or hardware interrupt to a processor that causes the program to jump to another program to handle the interrupt request. Before leaving the program that was being executed at the time of the interrupt, the CPU must save the state of the computer so that the original program can continue after the interrupt has been serviced. \*A physically constrained user interface is one in which a user's operations are limited by the physical characteristics of the interface device. An example would be a keypad with the choices limited to the operations permitted by each key. \*View refers to database views, which restrict access to information contained in a database through content-dependent access control.

#### **NEW QUESTION # 238**

Which of the following statements pertaining to IPSec NOT true?

- **A. IPSec provides confidentiality and integrity to information transferred over IP networks through transport layer encryption and authentication.**
- B. IPSec protects against spoofing.
- C. IPSec protects against man-in-the-middle attacks.
- D. IPSec can help in protecting networks from some of the IP network attacks.

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

IPSec works at the network layer, not at the transport layer.

Incorrect Answers:

A: IPSec protects networks by authenticating and encrypting each IP packet of a communication session.

C: IPSec protects against man-in-the-middle attacks by combining mutual authentication with shared, cryptography-based keys.

D: IPSec uses cryptography-based keys, shared only by the sending and receiving computers, to create a cryptographic checksum for each IP packet. The cryptographic checksum ensures that only the computers that have knowledge of the keys could have sent each packet. This protects against spoofing.
