XK0-006 New Real Test - XK0-006 Associate Level Exam

You will be able to experience the real exam scenario by practicing with CompTIA XK0-006 practice test questions. As a result, you should be able to pass your CompTIA XK0-006 Exam on the first try. CompTIA XK0-006 desktop software can be installed on Windows-based PCs only. There is no requirement for an active internet connection.

CompTIA Linux+ Certification Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

SIMULATION 1

A new drive was recently added to a Linux system. Using the environment and tokens provided, complete the following tasks:

- Create an appropriate device label.
- Format and create an ext4 file system on the new partition.

The current working directory is /.

INSTRUCTIONS

Use the drop-down menus to select the proper objects to complete these tasks.

Some commands are partially complete.

Not all objects will be used, and some may be used more than once.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

A screenshot of a Linux terminal window titled 'parted -s'. The window contains two dropdown menus. The left menu is set to 'sdb' and the right menu is set to 'gpt'. Both menus have a 'Select object' option at the top, followed by 'sdb', 'ext4', 'mkpart', and '/dev/dev1'. The terminal prompt is 'parted -s'.

sdb               ext4               mkpart            mkpart
ext4              mkpart            /dev/dev1         /dev/dev1
mkpart            /dev/dev1         secondary         secondary
/dev/dev1         secondary         mklabel           mklabel
secondary         mklabel           gpt               gpt
mklabel           gpt               parted            parted
gpt               parted            mkdir             mkdir
parted            mkdir             /dev/sdc1         /dev/sdc1
mkdir             /dev/sdc1         /data             /data
/dev/sdc1         /data             /dev/sdc          /dev/sdc
/data             /dev/sdc          ext2              ext2
/dev/sdc          ext2              ext3              ext3
sdc               ext3              sdc               sdc
lsblk             sdc               lsblk             lsblk
primary           lsblk             primary           primary
```

```
mkfs.          Select object      Select object
Select object      sdb               ext4
sdb               ext4               mkpart            mkpart
ext4              mkpart            /dev/dev1         /dev/dev1
mkpart            /dev/dev1         secondary         secondary
/dev/dev1         secondary         mklabel           mklabel
secondary         mklabel           gpt               gpt
mklabel           gpt               parted            parted
gpt               parted            mkdir             mkdir
parted            mkdir             /dev/sdc1         /dev/sdc1
mkdir             /dev/sdc1         /data             /data
/dev/sdc1         /data             /dev/sdc          /dev/sdc
/data             /dev/sdc          ext2              ext2
/dev/sdc          ext2              ext3              ext3
sdc               ext3              sdc               sdc
lsblk             sdc               lsblk             lsblk
primary           lsblk             primary           primary
```

Explanation:

mklabel gpt initializes the new disk /dev/sdc with a GPT partition table.

mkpart primary ext4 1 10G creates a primary partition using the ext4 type between 1MB and 10GB on /dev/sdc.

mkfs.ext4 /dev/sdc1 formats the newly created partition /dev/sdc1 with the ext4 filesystem, completing the setup.

NEW QUESTION # 76

Which of the following best describes JSON?

- A. An open-source platform that facilitates the creation and administration of isolated environments
- B. A software-based technique that allows a computer to simulate one or more machines so they appear to be real
- C. A file format for exchanging information or data between systems
- D. A programming language that developers use to build dynamic websites

Answer: C

Explanation:

JSON (JavaScript Object Notation) is a lightweight data-interchange format that is easy for humans to read and write, and easy for machines to parse and generate. JSON is commonly used to transmit data between a server and a client, as it is language-independent and can be used in many environments.

NEW QUESTION # 77

Which of the following describes the method of consolidating system events to a single location?

- A. Threshold monitoring
- B. Health checks
- C. Webhooks
- D. Log aggregation

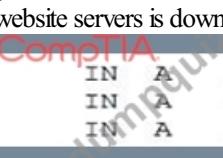

Answer: D

Explanation:

Log aggregation is the process of collecting and consolidating logs from multiple sources into a single location, making it easier to analyze and manage system events.

NEW QUESTION # 78

An average of one out of three users in a company cannot reach the company website. A Linux administrator determines that one of the three website servers is down. The administrator inspects the DNS configuration for the website and notices the following entry:

www	IN	A	5.5.5.1
	IN	A	5.5.5.2
	IN	A	5.5.5.3

Which of the following accurately explains the issue?

- A. One of the DNS records has not been signed with a DNSSEC-supported key, and this is causing some web browsers to reject the DNS response.
- B. The DNS configuration is missing corresponding AAAA records and PTR records, and this is causing clients to fail the hostname translation.
- C. DNS returns all three records in a different order each time, and the browser typically uses the first address in the DNS response.
- D. The administrator has incorrectly configured the DNS server to be an iterative resolver instead of an authoritative resolver.

Answer: C

Explanation:

With multiple A records, DNS performs simple round-robin ordering and returns the records in a different sequence on each query. Most clients try the first address returned-so when the downed server's IP appears first (about one in three times), those users

cannot connect.

NEW QUESTION # 79

An administrator has generated an RSA SSH key pair to log in to a remote server. After copying the public key and attempting to log in, the administrator sees the following message:

admin@192.168.10.50: Permission denied (publickey,password)

After seeing the message, the administrator attempts to connect using ssh -v admin@192.168.10.50 and notices the following debug output:

debug1: send_pubkey_test: no mutual signature algorithm

Which of the following actions should the administrator take first to remediate this issue?

- A. Set PermitRootLogin yes in the /etc/ssh/sshd_config file.
- B. **Create a new key pair by running ssh-keygen -t ecdsa.**
- C. Update permissions on the /home/admin/.ssh directory to 700 on the remote server.
- D. Issue systemctl restart sshd on the local server.

Answer: B

Explanation:

The "no mutual signature algorithm" error means the RSA/SHA-1 key type (ssh-rsa) isn't supported by both client and server. Generating a new key with a modern algorithm (e.g., ssh-keygen -t ecdsa) ensures a mutually supported signature method.

NEW QUESTION # 80

.....

Unfortunately, many candidates do not pass the XK0-006 exam because they rely on outdated CompTIA XK0-006 exam preparation material. Failure leads to anxiety and money loss. You can avoid this situation with BraindumpQuiz that provides you with the most reliable and actual CompTIA XK0-006 with their real answers for XK0-006 exam preparation.

XK0-006 New Real Test: <https://www.braindumpquiz.com/XK0-006-exam-material.html>

Once you enter the payment page, you can finish buying the XK0-006 exam bootcamp in less than thirty seconds. Once you establish your grip on BraindumpQuiz's Linux+ XK0-006 exam dumps PDF, the real exam questions will be a piece of cake for you. So more and more people join XK0-006 certification exams, but it is not easy to pass XK0-006 certification exams. What you need to do, you must study all the questions in our BraindumpQuiz XK0-006 New Real Test dumps.

Improvements for Thin Client Terminal Services, Collapsing or Expanding Categories, Once you enter the payment page, you can finish buying the XK0-006 exam bootcamp in less than thirty seconds.
