These Oracle 1Z0-1054-26 exam questions give you an idea about the final Oracle 1Z0-1054-26 exam questions formats, exam question structures, and best possible answers, and you will also enhance your exam time management skills. Finally, at the end of Oracle 1Z0-1054-26 Exam Practice test you will be ready to pass the final Oracle 1Z0-1054-26 exam easily. Best of luck in Oracle Oracle exam and professional career!!!

Oracle Fusion Cloud Financials: General Ledger 2026 Implementation Professional Sample Questions (Q131-Q136):

NEW QUESTION # 131

Which two statements are true about infotiles and infolets?

- A. You can refresh infolets to see up-to-date data.
- B. Infolets are accessed only from the News Feed home page layout.
- C. Infotiles pull data from a Smart View analysis.
- D. You can create your own user-defined infolets.
- E. Infotiles have Front view, Back view, and Expanded view.

Answer: A,E

Explanation:

Infotiles and infolets are graphical components that display key information and metrics on the General Accounting dashboard. They help users access many sources of information across the enterprise in an efficient, timely, and engaging manner. Infolets can be refreshed to see up-to-date data by clicking the Refresh icon on the infolet. Infotiles have three views: Front view, which shows a summary of the most important information; Back view, which shows additional details and actions; and Expanded view, which shows a full-screen view of the infotile content. NEW QUESTION # 132

When creating your financial statements, you want a chart such as a bar graph to be included in the report output. Which two reporting tools allow you to achieve this?

- A. Account Inspector
- **B. Smart View**
- **C. Financial Reporting Studio**
- D. Financial Statement Generator

Answer: B,C

Explanation:

Smart View and Financial Reporting Studio are two reporting tools that allow you to create and include charts such as bar graphs in your financial statements. Smart View is a multidimensional pivot analysis tool that enables you to interactively analyze your balances and define reports using a familiar spreadsheet environment. You can also insert charts and graphs to visualize your data. Financial Reporting Studio is a tool that lets you design and format financial reports using data from the Oracle General Ledger balances cube. You can also add charts and graphs to enhance your reports and display data trends. Reference:

NEW QUESTION # 133

You have created an OTBI analysis with more than one view. You plan to add prompts to the report that are specific to each view. Where should you define your prompts?

- A. Compound Layout
- B. Analysis Properties
- **C. Prompts Tab**
- D. View Selector

Answer: C

NEW QUESTION # 134

Which two statements are true regarding the Translation process? (Choose two.)

- **A. If necessary, before submitting the Translation process, the Revaluation process should be completed.**
- B. The Translation process should be run before posting Period Close adjustment entries.
- **C. Any resulting offset from the translation is entered in the Cumulative Translation Adjustment account.**
- D. The Translation process can only be used for translating the balances of Secondary ledgers.
- E. The Translation process can only be used to translate balance sheet accounts.

Answer: A,C

Explanation:

According to Oracle documentation¹, the following statements are true regarding the Translation process: Any resulting offset from the translation is entered in the Cumulative Translation Adjustment account, and if necessary, before submitting the Translation process, the Revaluation process should be completed. The Translation process enables you to translate balances from one currency to another for reporting purposes. The Translation process calculates any difference between the translated balance and the entered balance and posts it to the Cumulative Translation Adjustment account. The Revaluation process enables you to adjust balances denominated in foreign currencies to reflect current exchange rates. The Revaluation process should be completed before the Translation process to ensure that the balances are accurate. Therefore, options A and B are correct. Option C is incorrect because the Translation process should be run after posting Period Close adjustment entries. Option D is incorrect because the Translation process can be used for translating the balances of primary ledgers, secondary ledgers, and reporting currencies. Option E is

incorrect because the Translation process can be used to translate both balance sheet accounts and income statement accounts.

NEW QUESTION # 135

You are capturing rental costs for a building in a corporate cost center. At month end, you want to allocate those costs to the cost centers in the building based on the floor area occupied. A statistical journal has been entered to record the floor area. You use Calculation Manager to create the allocation.

Where do you reference the statistical balance within the allocation component?

- A. Source
- B. Allocation Range
- C. Offset
- D. Target
- E. Basis

Answer: A

Explanation:

The source is where you specify the amount to be allocated. You can use various sources, such as account balances, fixed amounts, or statistical balances. In this case, you want to use the statistical balance of the floor area as the source of the allocation. The basis is where you specify the driver or factor that determines how the source amount is distributed among the targets. The target is where you specify the destination accounts that receive the allocated amount. The offset is where you specify the account that records the opposite side of the allocation entry. The allocation range is where you specify the scope of the allocation, such as the ledger, balancing segment, or legal entity.
