If you purchasing our JN0-460 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful JN0-460 practice materials by recommending our JN0-460 Guide preparations for you. And we give you kind and professional supports by 24/7, as long as you can have problems on our JN0-460 study guide, then you can contact with us.

So rest assured that with the DumpsActual Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) practice questions you will not only make the entire Juniper JN0-460 exam dumps preparation process and enable you to perform well in the final Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) certification exam with good scores. To provide you with the updated Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam questions the DumpsActual offers three months updated Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam dumps download facility. Now you can download our updated JN0-460 practice questions up to three months from the date of DumpsActual Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam purchase.

How to Prepare For JN0-460 Mist AI Wired, Specialist (JNCIS-MistAI-

Wired)?

JN0-460 exam dumps are valid and we have helped lots of candidates pass the exam successfully, and they send the thankful letter to us. JN0-460 exam materials are edited and verified by professional experts, and they possess the professional knowledge for the exam, therefore you can use them at ease. In addition, we offer you free update for one, so you don't have to spend extra money on update version. We have online and offline chat service, and they possess the professional knowledge for JN0-460 Exam Braindumps, if you have any questions, you can consult us, we are glad to help you.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 2	<ul style="list-style-type: none">Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 3	<ul style="list-style-type: none">Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 4	<ul style="list-style-type: none">Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 5	<ul style="list-style-type: none">Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q45-Q50):

NEW QUESTION # 45

You're designing a network for university with more than 20,000 students and various departments spread across multiple buildings. They prioritize high scalability and efficient east-west communication between departments. In this scenarios, which IP-Clos architecture should be used?

- A. Collapsed Core
- B. 5-stage IP-Clos
- C. 3-stage IP-Clos
- D. Campus Fabric Core-Distribution

Answer: B

NEW QUESTION # 46

You are deploying a Campus Fabric IP Clos. You want to isolate the Corp subnet from the IoT subnet within the fabric. Which solution will accomplish this?

- A. Create two VRFs and add both networks into each.
- B. Create one VRF and add both networks into it.
- C. Create one VRF and add one network into it.
- **D. Create two VRFs and add one network into each.**

Answer: D

NEW QUESTION # 47

To ensure high availability in Campus Fabric Architectures, EVPN multihoming utilizes _____ to avoid single points of failure.

- A. Fixed routing protocols
- B. Single connections
- **C. Multiple redundant paths**
- D. Manual interventions

Answer: C

NEW QUESTION # 48

What advantages do configuration options in wired assurance provide to network administrators?

- **A. Customizable user access levels**
- **B. Improved security protocols**
- **C. Enhanced network performance monitoring**
- **D. Flexible network topology changes**
- E. Automated device updates

Answer: A,B,C,D

NEW QUESTION # 49

Click the Exhibit button.

Which campus fabric architecture is shown in the exhibit?

- A. core-distribution - edge-routed bridging (ERB)
- B. 5-stage IP Clos
- C. 3-stage IP Clos
- **D. core-distribution - centrally-routed bridging (CRB)**

Answer: D

Explanation:

The exhibit shows:

L2 gateways (blue dots) positioned at the distribution layer.

L3 gateways (red dots) positioned at the core layer.

EVPN/VXLAN providing fabric connectivity between layers.

Access switches forwarding traffic into the fabric without acting as gateways.

This directly maps to the centrally-routed bridging (CRB) model, where:

Bridging occurs at the access/distribution layer.

Routing (L3 gateway) occurs centrally at the core layer.

"In the core-distribution CRB model, Layer 2 gateways are deployed at the distribution switches, and Layer 3 gateways are deployed centrally at the core switches." Option A (ERB) is incorrect because ERB places the L3 gateway at the edge/access.

Option D (CRB) is correct, matching the diagram exactly.

For candidates who will attend the exam, some practice is quite necessary. Our JN0-460 training materials contain both questions and answers, and you can have a quickly check after practicing. JN0-460 training materials cover most knowledge points for the exam, and you can have a good command of the exam if you choose us. Besides, in the process of ing, you professional ability will also be improved. We offer you free update for 365 days if you buying JN0-460 Exam Dumps from us. And the latest version will be sent to your email automatically.
