Monitor Your Progress with MB-335 Practice Test Software

We have three different versions of Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert prep torrent for you to choose, including PDF version, PC version and APP online version. Different versions have their own advantages and user population, and we would like to introduce features of PDF version for you. There is no doubt that PDF of MB-335 Exam Torrent is the most prevalent version among youngsters, mainly due to its convenience for a demo, through which you can have a general understanding about our MB-335 test braindumps, and also convenience for paper printing for you to do some note-taking.

Microsoft MB-335 Exam is an essential stepping stone for anyone wishing to pursue a career as a Dynamics 365 Supply Chain Management Functional Consultant Expert. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification is highly valued in the market, and it demonstrates an individual's proficiency in the latest industry tools and practices. Preparing for MB-335 Exam requires a significant investment of time and effort, but the benefits are well worth it, as it opens up new career opportunities and provides an excellent foundation for continued professional growth.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q147-Q152):

NEW QUESTION # 147

A company uses distributed hybrid topology within their Dynamics 365 Supply Chain Management system.

The company plans to build a manufacturing plant on a mountain to be closer to a required mineral source.

Internet connectivity is unreliable, and availability of bandwidth speed is limited. The company plans to deploy an operational edge scale unit for the plant to address the connectivity issue.

You need to determine where production operations can be performed.

Which method should you recommend?

To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Methods | Answer Area | Requirement | Method |
|--|-------------|--|--------|
| Production floor execution interface | | Record the start of production. | |
| Warehouse Management mobile app | | Report the number of production units completed and finished goods put away. | |
| Production floor execution interface and Warehouse Management mobile app | | Report time spent training a new employee about line operation. | |

Answer:

Explanation:

| Methods | Answer Area | Requirement | Method |
|--|-------------------------------------|--|--|
| Production floor execution interface | <input checked="" type="checkbox"/> | Record the start of production. | Production floor execution interface |
| Warehouse Management mobile app | <input checked="" type="checkbox"/> | Report the number of production units completed and finished goods put away. | Production floor execution interface and Warehouse Management mobile app |
| Production floor execution interface and Warehouse Management mobile app | <input checked="" type="checkbox"/> | Report time spent training a new employee about line operation. | Production floor execution interface |

Explanation:

To determine where production operations can be performed, you should recommend the following methods:

* Record the start of production: You should recommend the Production floor execution interface method. This method allows workers to register their daily work, such as when they start a job, report feedback about jobs, register indirect activities, and report absence1. Workers can use the production floor execution interface to sign in with their badge IDs and select the jobs that they want to start from the All jobs tab1. They can also view the details and instructions for each job, and report good quantities and scrap1.

* Report the number of production units completed and finished goods put away: You should recommend the Production floor execution interface and Warehouse Management mobile app methods. These methods allow workers to report the completion of production jobs and the movement of finished goods to inventory. Workers can use the production floor execution interface to complete a job by selecting it from the Active jobs tab and tapping Complete1. They can also print labels for the finished goods if required2. Workers can use the Warehouse Management mobile app to scan or enter license plates for the finished goods and put them away in a location3. They can also perform other warehouse operations, such as picking, packing, receiving, and cycle counting3.

* Report time spent training a new employee about line operation: You should recommend the Production floor execution interface method. This method allows workers to register indirect activities that are not related to a specific production job, such as training, meetings, or maintenance1. Workers can use the production floor execution interface to register an indirect activity by tapping Indirect activity on the toolbar and selecting an activity type from the list1. They can also enter a quantity or duration for the activity, and add a comment if needed1.

1: How workers use the production floor execution interface 2: Print labels 3: Install and connect the Warehouse Management mobile app

NEW QUESTION # 148

A company implements Dynamics 365 Supply Chain Management.

Due to increased demand and limited space in the work cell area for product LOOM, you must subcontract overflow work to

another company. You have the following requirements:

- * Locate a warehouse at the subcontractor building.
- * Support picking and shipping activity tracking.
- * Associate costs of transporting materials between the locations in the cost of the finished product.

You need to modify the production flow.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a resource and work cell resource group for the subcontractor.
- B. Modify the overflow work activity and assign it to the subcontractor.

NEW QUESTION # 151

A manufacturing company uses Dynamics 365 Supply Chain Management.

The shop floor has multiple pieces of the same model of equipment. The equipment produces a finished good that requires special handling.

The equipment has a visual guide available. The shop floor manager requires the following:

- * The most recent visual guide must be available for all pieces of the equipment at the same time.
- * The shop floor workers must have a visual guide available for handling of the finished good.

You need to configure the visual guides to meet the shop floor requirements.

What should you configure for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

- Released product
- Resource group
- Bill of materials
- BOM version

Answer Area

Requirement

Assign a visual guide for the equipment.
Assign a visual guide for the finished good.

Feature

Microsoft

Answer:

Explanation:

| Features | Answer Area |
|-------------------|---|
| Released product | Requirement Assign a visual guide for the equipment. |
