Latest Exam Sample Mule-Dev-301 Questions & Pass Certify Mule-Dev-301 Reliable Exam Testking: Salesforce Certified MuleSoft Developer II

As you know that the number of the questions and answers in the real Mule-Dev-301 exam is fixed. So accordingly the information should be collected for you. Our Mule-Dev-301 study materials have done the right thing for you. However, we will never display all the information in order to make the content appear more. Our Mule-Dev-301 learning guide just want to give you the most important information. This is why Mule-Dev-301 actual exam allow you to take the exam in the shortest possible time.

Salesforce Certified MuleSoft Developer II Sample Questions (Q39-Q44):

NEW QUESTION # 39

The flow is invoicing a target API. The API's protocol is HTTPS. The TLS configuration in the HTTP Request Configuration global element is set to None. A web client submits a request to `http://localhost:8081/vehicles`.

If the certificate of the target API is signed by a certificate authority (CA), what is true about the HTTP Request operation when the flow executes?

- A. The HTTP Request operation will succeed if the CA's certificate is present in the JRE's default truststore.
- B. The HTTP Request operation will always fail regardless of the CA
- C. The HTTP Request operation will succeed if the CA'S certificate is present in the JRE's default keystore
- D. The HTTP Request operation will always succeed regardless of the CA

Answer: A

Explanation:

The HTTP Request operation will use the default truststore of the JRE to validate the certificate of the target API. If the CA's certificate is present in the truststore, the operation will succeed. Otherwise, it will fail with a handshake exception. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/tls-configuration#tls-default>

NEW QUESTION # 40

A Mule application for processing orders must log the order ID for every log message output. What is a best practice to enrich every log message with the order ID?

- A. Use flow variables within every logger processor to log the order ID
- B. Use the Tracing module to set logging variables with a Mapped Diagnostic Context
- C. Set a flow variable and edit the `log4j2.xml` file to output the variable as part of the message pattern
- D. Create a custom XML SDK component to wrap the logger processor and automatically add the order ID within the connector

Answer: B

Explanation:

To enrich every log message with the order ID, the developer should use the Tracing module to set logging variables with a Mapped Diagnostic Context (MDC). The Tracing module allows adding custom key-value pairs to log messages using MDC variables. The developer can use Set Logging Variables operation to set the order ID as an MDC variable and then use it in any logger processor within the same thread or event. Reference: <https://docs.mulesoft.com/tracing-module/1.0/tracing-module-reference#set-logging-variables>

NEW QUESTION # 41

Which command is used to convert a JKS keystore to PKCS12?

- A. `Keytool-importkeystore -srckeystore keystore.jks-srcstoretype PKCS12 -destkeystore keystore.p12 -deststoretype JKS`
- B. `Keytool-importkeystore -srckeystore keystore.p12-srcstoretype PKCS12 -destkeystore keystore.jks -deststoretype JKS`
- C. `Keytool-importkeystore -srckeystore keystore.jks-srcstoretype JKS -destkeystore keystore.p13 -deststoretype PKCS12`
- D. `Keytool-importkeystore -srckeystore keystore.p12-srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12`

Answer: D

Explanation:

To convert a JKS keystore to PKCS12, the developer needs to use the `keytool-importkeystore` command with the following options: `-srckeystore keystore.jks -srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12`. This command imports all entries from a source JKS keystore (keystore.jks) into a destination PKCS12 keystore (keystore.p12). Reference: <https://docs.oracle.com/en/java/javase/11/tools/keytool.html#GUID-5990A2E4-78E3-47B7-AE75-6D1826259549>

NEW QUESTION # 42

A scatter-gather router is configured with four routes: Route A, B, C and D.
Route C false.

- A. `Error.errorMessage.payload.failures['2']`
- **B. `Error.errorMessage.payload.results ['2']`**
- C. `Payload failures['2']`
- D. `Payload ['2']`

Answer: B

Explanation:

The result of accessing route C failure is `Error.errorMessage.payload.failures['2']`. This is because a scatter-gather router returns an aggregated message that contains an array of results from each route and an array of failures from each route. The failures array contains error objects with information about each failed route execution. To access route C failure, which is the third route (index 2), the developer needs to use `Error.errorMessage.payload.failures['2']` expression. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-reference#scatter-gather-output>

NEW QUESTION # 43

Multiple individual Mule application need to use the Mule Maven plugin to deploy to CloudHub.

The plugin configuration should .. reused where necessary and anything project, specific should be property-based.

Where should the Mule Maven details be configured?

- A. A Bill of Materials (BOM) parent pm
- B. Pom, xml
- **C. A parent pom.xml**
- D. Settings, xml

Answer: C

Explanation:

To reuse Mule Maven plugin configuration across multiple individual Mule applications, the developer should use a parent pom.xml file. A parent pom.xml file defines common configuration for one or more child projects that inherit from it. The developer can specify common properties and dependencies for all child projects in the parent pom.xml file, such as Mule Maven plugin configuration, and then reference them in each child project's pom.xml file using placeholders. Reference:

<https://docs.mulesoft.com/mule-runtime/4.3/mmp-concept#parent-pom> https://maven.apache.org/guides/introduction/introduction-to-the-pom.html#Project_Inheritance

NEW QUESTION # 44

.....

If you want to be a part of a great company, such as Mule-Dev-301, preparing and taking the exam with Mule-Dev-301 study guide will be your best choice, because there have been more and more big companies to pay real attention to these people who have passed the Mule-Dev-301 Exam and have got the related certification in the past years.
