

1Z0-1124-24 Exam Tips & Exam 1Z0-1124-24 Cram

What's more, part of that TroytecDumps 1Z0-1124-24 dumps now are free: <https://drive.google.com/open?id=154BMoEc3sstO12hdIptKet38ieroike>

It is known to us that the 21st century is an information era of rapid development. Now the people who have the opportunity to gain the newest information, who can top win profit maximization. In a similar way, people who want to pass 1Z0-1124-24 exam also need to have a good command of the newest information about the coming exam. However, it is not easy for a lot of people to learn more about the information about the study materials. Luckily, the 1Z0-1124-24 Study Materials from our company will help all people to have a good command of the newest information.

The marketplace is competitive, especially for securing a well-paid job. Moving your career one step ahead with 1Z0-1124-24 certification will be a necessary and important thing. How to get the 1Z0-1124-24 exam dumps with 100% pass is also important. 1Z0-1124-24 training topics will ensure you pass at first time. The experts who involved in the edition of 1Z0-1124-24 questions & answers all have rich hands-on experience, which guarantee you the high quality and high pass rate.

Pass Guaranteed High-quality 1Z0-1124-24 - Oracle Cloud Infrastructure 2024 Networking Professional Exam Tips

It is generally acknowledged that candidates who earn the Oracle Cloud Infrastructure 2024 Networking Professional (1Z0-1124-24) certification ultimately get high-paying jobs in the tech market. Success in the Oracle Cloud Infrastructure 2024 Networking Professional (1Z0-1124-24) exam not only validates your skills but also helps you get promotions. To pass the Oracle Cloud Infrastructure 2024 Networking Professional test in a short time, you must prepare with 1Z0-1124-24 Exam Questions that are real and updated. Without studying with 1Z0-1124-24 actual questions, candidates fail and waste their time and money.

Oracle Cloud Infrastructure 2024 Networking Professional Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which FastConnect option offers the highest bandwidth and lowest latency?

- A. Cloud VPN
- B. Direct Peering
- C. Dedicated Circuit
- D. IPSec VPN

Answer: C

Explanation:

Dedicated Circuit provides a physically dedicated fiber connection, offering the highest bandwidth (up to 100 Gbps) and lowest latency for critical applications.

Direct Peering leverages existing peering relationships with carriers, but bandwidth and latency depend on specific agreements.

Cloud VPN and IPSec VPN are virtual, shared connections with lower bandwidth and potentially higher latency.

NEW QUESTION # 46

Which of the following statements about CloudShell's persistent storage is TRUE?

- A. You can access your CloudShell storage from any device, regardless of your OCI tenancy.
- B. Any changes made to files in your CloudShell home directory are automatically backed up.
- **C. The stored data is automatically deleted after a certain period of inactivity.**
- D. CloudShell storage can be used to share large files with other OCI users in your tenancy.

Answer: C

Explanation:

While CloudShell offers persistent storage for user-specific files and configurations, it follows a specific deletion policy to manage available space and ensure proper resource allocation. This means that if you haven't interacted with your CloudShell instance for a certain period, your stored data may be automatically deleted.

Here's a breakdown of the other options and their accuracy:

A). You can access your CloudShell storage from any device, regardless of your OCI tenancy. This is incorrect. CloudShell storage is region-specific. Your data in one region's CloudShell instance won't be accessible from another region, and it's also tied to your tenancy within OCI. B. Any changes made to files in your CloudShell home directory are automatically backed up. CloudShell doesn't have a built-in automatic backup mechanism. If you need backups, you'll need to manually initiate them using tools like rsync or integrate your own backup solution. D. CloudShell storage can be used to share large files with other OCI users in your tenancy. While you can technically share files within your tenancy using CloudShell storage, it's generally not recommended for large files due to potential performance limitations and security concerns. Consider using more suitable services like OCI Object Storage for large file sharing.

NEW QUESTION # 47

What is the key advantage of using Oracle Cloud Infrastructure FastConnect for inter-region transitive routing compared to Site-to-Site VPN?

- A. Increased security with encryption and authentication features.
- B. More affordable pricing for low-bandwidth connections.
- **C. Lower latency and higher throughput for critical applications.**
- D. Easier configuration and management due to automated provisioning.

Answer: C

Explanation:

Here's why the other options are not the key advantages:

B). Easier configuration and management: While FastConnect offers automated provisioning compared to manual VPN configuration, this advantage isn't always the key differentiator. For some organizations, the increased cost or security focus of FastConnect might outweigh the configuration convenience. C. More affordable pricing for low-bandwidth connections: This can be true depending on specific usage patterns and pricing models, but it's not always the case. For low-bandwidth needs, VPNs can be competitive. D. Increased security with encryption and authentication features: Both FastConnect and Site-to-Site VPN offer encryption and authentication capabilities, making this not a clear differentiator. Lower latency and higher throughput: FastConnect is a dedicated, private connection that uses physical network infrastructure, resulting in significantly lower latency and higher throughput compared to a shared, internet-based Site-to-Site VPN.

This makes FastConnect ideal for mission-critical applications that require high performance and real-time responsiveness, such as databases, virtual desktops, and cloud gaming.

NEW QUESTION # 48

. What OCI networking service can you use to restrict access to specific resources based on IP addresses

- A. FastConnect: Establish a dedicated connection and filter traffic at the edge.
- **B. Security List: Create rules allowing traffic only from the authorized IP addresses.**
- C. Data Transfer: Assign tags to IP addresses and apply policies based on those tags.
- D. Service Gateway: Configure access control lists (ACLs) to whitelist permitted IPs.

Answer: B

Explanation:

The most effective OCI networking service for restricting access to resources based on IP addresses is Security List. Here,s a breakdown of its capabilities and key considerations:

Security List:

Functionality: Granular control over inbound and outbound traffic to network resources within a subnet.

Implementation: Create rules explicitly allowing or denying traffic based on source IP address, destination IP address, port number, and protocol.

Strengths:

Precise access control aligned with your company,s strict security policies.

Enforces least privilege principle (permit connections only from authorized IPs; deny everything else).

Can be combined with other OCI services for layered security (IAM for user authentication/authorization, Network Firewall for deeper inspection/filtering).

Alternative Services:

Service Gateway: Primarily facilitates private access to Oracle services, not general inbound/outbound IP-based filtering.

Data Transfer: Manages data transfer activities, not network access control.

FastConnect: Establishes a dedicated connection, but requires additional configuration (e.g., Security Lists within the VCN) to filter traffic based on IP addresses.

NEW QUESTION # 49

To establish dynamic routing between an on-premises network and an OCI VCN using BGP. Which OCI resource is required?

- A. Internet Gateway
- B. Service Gateway
- C. Virtual Router
- **D. Dynamic Routing Gateway (DRG)**

Answer: D

Explanation:

BGP Support: DRGs support Border Gateway Protocol (BGP) for dynamic routing exchange between attached networks. This allows for automatic path selection and traffic redirection based on network conditions, improving efficiency and scalability.

Centralized Management: DRGs act as centralized hubs, enabling you to manage BGP routing for multiple VCNs and on-premises connections from a single location.

Security: DRGs support private peering, ensuring secure communication between your on-premises network and VCNs without traversing the public internet.

Flexibility: DRGs offer various peering options, including local peering for intra-region connections and remote peering for cross-region connections.

Comparison with other options:

Service Gateway (A): Primarily for managing outbound internet traffic within a VCN, doesn,t support BGP or on-premises connections.

Internet Gateway (B): Provides public internet access within a VCN, not intended for secure, dynamic routing with an on-premises network.

Virtual Router (D): While virtual routers can perform routing within a VCN, they don,t support BGP peering with external networks like your on-premises environment.

NEW QUESTION # 50

.....

Obtaining a 1Z0-1124-24 certificate can prove your ability so that you can enhance your market value. However, it is well known that obtaining such a 1Z0-1124-24 certificate is very difficult for most people, especially for those who always think that their time is not enough to learn efficiently. However, our 1Z0-1124-24 test prep take full account of your problems and provide you with reliable services and help you learn and improve your ability and solve your problems effectively. Once you choose our 1Z0-1124-24 Quiz guide, you have chosen the path to success. We are confident and able to help you realize your dream. A higher social status and higher wages will not be illusory.

Exam 1Z0-1124-24 Cram: <https://www.troytecdumps.com/1Z0-1124-24-troytec-exam-dumps.html>

Oracle 1Z0-1124-24 Exam Tips And as is known to all, it's easier for you to read all the materials, At the same time, they use years of experience to create the most scientific 1Z0-1124-24 learning engine, Oracle 1Z0-1124-24 Exam Tips There are main several advantages that our test preparation products both have in common, The TroytecDumps is quite confident that you will crack the 1Z0-1124-24 exam shortly.

You have accomplished something that has eluded many others, Click 1Z0-1124-24 outside the highlighted area to deselect the text, And as is known to all, it's easier for you to read all the materials.

1Z0-1124-24 Exam Exam Tips & Pass-Sure Exam 1Z0-1124-24 Cram Pass Success

At the same time, they use years of experience to create the most scientific 1Z0-1124-24 Learning Engine, There are main several advantages that our test preparation products both have in common.

The TroytecDumps is quite confident that you will crack the 1Z0-1124-24 exam shortly, Whether you are trying this exam for the first time or have experience, our 1Z0-1124-24 learning materials are a good choice for you.
