

JN0-281 Test Question | JN0-281 Valid Test Blueprint

DOWNLOAD the newest Getcertkey JN0-281 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1XKwKkqmg7quf7XHI1yCenzntQjR4RBbM>

Another great way to assess readiness is the Juniper JN0-281 web-based practice test. This is one of the trusted online Juniper JN0-281 prep materials to strengthen your concepts. All specs of the desktop software are present in the web-based Juniper JN0-281 Practice Exam.

Our JN0-281 exam questions are very outstanding. People who have bought our products praise our company highly. In addition, we have strong research competence. So you can always study the newest version of the JN0-281 exam questions. Also, you can enjoy the first-class after sales service. Whenever you have questions about our JN0-281 Actual Test guide, you will get satisfied answers from our online workers through email. We are responsible for all customers. All of our JN0-281 question materials are going through strict inspection. The quality completely has no problem. The good chance will slip away if you still hesitate.

>> JN0-281 Test Question <<

Juniper certification JN0-281 the latest examination questions and answers come out

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your JN0-281 exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest JN0-281 Exam Torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment.

Juniper Data Center, Associate (JNCIA-DC) Sample Questions (Q90-Q95):

NEW QUESTION # 90

When troubleshooting an OSPF neighborhood, you notice that the router stopped at the ExStart state. What is the cause of this result?

- A. There is an interval timing mismatch.
- B. There is an area ID mismatch.

- C. The priority is set to 255.
- **D. There is an MTU mismatch.**

Answer: D

Explanation:

When an OSPF (Open Shortest Path First) neighborhood is stuck in the ExStart state, it usually points to a mismatch in Maximum Transmission Unit (MTU) settings between two routers trying to establish the adjacency. The ExStart state is where OSPF routers negotiate the master-slave relationship and exchange DBD (Database Description) packets.

Step-by-Step Breakdown:

OSPF Neighbor States: OSPF goes through several states to establish an adjacency with a neighbor:

Down: No hello packets have been received.

Init: Hello packets are received, but bidirectional communication isn't confirmed.

2-Way: Bidirectional communication is established.

ExStart: The routers are negotiating who will be the master and who will be the slave, and begin to exchange DBD packets.

Exchange: The routers start exchanging the database information.

Loading: The routers process the Link-State Advertisements (LSAs).

Full: The adjacency is fully established.

MTU Mismatch Issue:

During the ExStart state, both OSPF routers must agree on their MTU values. If there is an MTU mismatch between the two routers, OSPF neighbors will fail to move from the ExStart to the Exchange state. The router with the larger MTU setting will not accept DBD packets from the router with a smaller MTU because the packets may exceed the smaller MTU size.

In Juniper devices, this behavior can be identified by examining the MTU settings using the show interfaces command and ensuring both routers have matching MTU configurations. To resolve this issue, either match the MTU settings on both routers or configure OSPF to ignore MTU mismatches using the command set protocols ospf ignore-mtu.

Juniper Reference:

Junos Command: show ospf neighbor helps diagnose neighbor states.

MTU Adjustment: set interfaces <interface-name> mtu <size> can be used to set the MTU values correctly.

NEW QUESTION # 91

Referring to the exhibit, you notice that after committing the configuration, the ae0 and ae1 interfaces appear in a link down state.

Which statement is correct in this scenario?

- A. No traffic is traversing the LAG interfaces.
- **B. No operational interfaces have been added to the LAG interfaces.**
- C. The LAG interfaces are in a passive state.
- D. The LAG interfaces are in aggressive mode.

Answer: B

Explanation:

In the exhibit, the ae0 and ae1 interfaces are in a link down state. This occurs when no physical interfaces (member interfaces) have been added to the LAG (Link Aggregation Group) interfaces, or the member interfaces are not operational.

Step-by-Step Breakdown:

LAG Configuration:

A LAG interface (aggregated Ethernet interface) is a logical interface that combines multiple physical interfaces for redundancy and increased bandwidth. The LAG will only be operational if at least one member interface is active and configured correctly.

No Operational Member Interfaces:

If no member interfaces are added or if the member interfaces are down, the LAG will remain in a down state, as shown in the exhibit for ae0 and ae1.

Resolution:

Verify that physical interfaces have been added to the LAG using commands like:

LAG Interface Status: In Juniper, the link status of the LAG depends on its member interfaces, which must be operational for the LAG to function.

NEW QUESTION # 92

In the context of data center networking, what is the primary purpose of an Underlay Network?

- A. To handle external network connections exclusively.

- B. To facilitate virtual machine migrations.
- C. To encrypt data traffic between servers.
- D. To provide a physical infrastructure for an Overlay Network.

Answer: D

NEW QUESTION # 93

When considering bidirectional forwarding detection, which two statements are correct? (Choose two.)

- A. The BFD operation always consists of minimum intervals and multipliers.
- B. The BFD default multiplier is 5.
- C. You can configure BFD per interface within the protocol stanza.
- D. The BFD default minimum interval is 3.

Answer: A,C

Explanation:

Bidirectional Forwarding Detection (BFD) is a protocol used to detect faults in the forwarding path between two routers. It provides rapid failure detection, enhancing the performance of routing protocols like OSPF, BGP, and IS-IS.

Step-by-Step Breakdown:

Per Interface Configuration:

BFD can be configured on a per-interface basis within the protocol stanza (e.g., OSPF, BGP). This allows granular control over where BFD is enabled and the failure detection intervals for specific interfaces.

Minimum Interval and Multiplier:

BFD uses a minimum interval (the time between BFD control packets) and a multiplier (the number of missed packets before the path is declared down). The combination of these two defines the detection time for failures.

Juniper

Reference: BFD Configuration: In Juniper, BFD is configurable within routing protocol stanzas, with the failure detection mechanism always based on minimum intervals and multipliers.

NEW QUESTION # 94

Under which Junos hierarchy is a static route configured?

- A. system
- B. routing-options
- C. routing-instances
- D. protocols

Answer: B

NEW QUESTION # 95

.....

No matter how busy you are, you must reserve some time to study. As we all know, knowledge is wealth. If you have a strong competitiveness in the society, no one can ignore you. Then here comes the good news that our JN0-281 practice materials are suitable for you. For the advantage of our JN0-281 Exam Questions is high-efficient. No only we can give the latest and most accurate knowledge on the subject, but also we can help you pass the exam and get the JN0-281 certification in the least time.

JN0-281 Valid Test Blueprint: https://www.getcertkey.com/JN0-281_braindumps.html

Juniper JN0-281 Test Question How can you stand out from thousands of candidates, To give you an idea about the top features of Getcertkey Juniper exam questions, a free demo of Getcertkey Data Center, Associate (JNCIA-DC) (JN0-281) exam dumps is being offered free of cost, 24/7 Customer service For JN0-281 User, Juniper JN0-281 Test Question This version of the practice exam is suitable for individuals who are comfortable in practicing for the exam online.

The article lists multiple reasons for this trend including the economic JN0-281 need by many to make money, Class loaders have a parent/child relationship, How can you stand out from thousands of candidates?

Useful JN0-281 Test Question & Leader in Qualification Exams & Practical Juniper Data Center, Associate (JNCIA-DC)

To give you an idea about the top features of Getcertkey Juniper exam questions, a free demo of Getcertkey Data Center, Associate (JNCIA-DC) (JN0-281) exam dumps is being offered free of cost.

24/7 Customer service For JN0-281 User, This version of the practice exam is suitable for individuals who are comfortable in practicing for the exam online, To help customers solve problems, we support printing of our JN0-281 exam torrent.
