Test Cybersecurity-Practitioner Cram Review - Training Cybersecurity-Practitioner Kit

We can tell you with confidence that the Cybersecurity-Practitioner practice materials are superior in all respects to similar products. First, users can have a free trial of Cybersecurity-Practitioner test prep, to help users better understand the Cybersecurity-

Practitioner study guide. If the user discovers that the product is not appropriate for him, the user can choose another type of learning material. Respect the user's choice, will not impose the user must purchase the Cybersecurity-Practitioner practice materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying Cybersecurity-Practitioner exam.

Palo Alto Networks Cybersecurity Practitioner Sample Questions (Q81-Q86):

NEW QUESTION # 81

In addition to local analysis, what can send unknown files to WildFire for discovery and deeper analysis to rapidly detect potentially unknown malware?

- A. Cortex XDR
- B. Cortex XSOAR
- C. MineMild
- D. AutoFocus

Answer: A

Explanation:

In addition to local analysis, Cortex XDR can send unknown files to WildFire for discovery and deeper analysis to rapidly detect.

NEW QUESTION # 82

An administrator finds multiple gambling websites in the network traffic log. What can be created to dynamically block these websites?

- A. URL category
- B. Application group
- C. Decryption policy
- D. Custom signatures

Answer: A

Explanation:

URL categories classify websites based on content type or risk, enabling dynamic policy enforcement such as blocking or allowing access. Administrators can create custom URL categories to group sites like gambling domains and apply blocking rules across the firewall infrastructure. Palo Alto Networks firewalls leverage URL categorization combined with threat intelligence to provide granular web filtering, reducing exposure to malicious or unwanted sites. This dynamic grouping approach is more manageable and scalable than creating individual signatures or static lists and allows for automated policy application aligned with organizational compliance requirements.

NEW QUESTION # 83

A native hypervisor runs:

- A. with extreme demands on network throughput
- B. only on certain platforms
- C. directly on the host computer's hardware
- D. within an operating system's environment

Answer: C

Explanation:

- * Type 1 (native or bare metal). Runs directly on the host computer's hardware
- * Type 2 (hosted). Runs within an operating system environment

NEW QUESTION # 84

Which SOAR feature coordinates across technologies, security teams, and external users for centralized data visibility and action?

- A. Integrations
- B. Ticketing system
- **C. Playbooks**
- D. Case management

Answer: C

Explanation:

Playbooks are collections of workflows that automate and orchestrate tasks, alerts, and responses to incidents. Playbooks are triggered by rules or incidents and can coordinate across technologies, security teams, and external users for centralized data visibility and action. Playbooks can help improve the efficiency and effectiveness of security operations by reducing manual work, streamlining processes, and enhancing collaboration. Reference: What Is SOAR? - Palo Alto Networks, What Is SOAR? Technology and Solutions | Microsoft Security, How SecOps can help solve these 6 key MSSP conundrums - Google Cloud

NEW QUESTION # 85

Which technique uses file sharing or an instant messenger client such as Meebo running over Hypertext Transfer Protocol (HTTP)?

- A. Port hopping
- B. Use of non-standard ports
- **C. Tunneling within commonly used services**
- D. Hiding within SSL encryption

Answer: C

Explanation:

Tunneling is a method of transporting data across a network using protocols that are not supported by that network. Tunneling works by encapsulating packets: wrapping packets inside of other packets. Tunneling within commonly used services is a technique that uses file sharing or an instant messenger client such as Meebo running over HTTP to bypass firewalls or other network restrictions. The data packets are encapsulated within HTTP packets and sent as normal web traffic. This way, the data packets can reach their destination without being blocked or detected by the network. Reference: What is tunneling? | Tunneling in networking | Cloudflare, What Is Network Tunneling & How Is It Used? | Traefik Labs, networking - What is HTTP tunneling? - Stack Overflow

NEW QUESTION # 86

.....

You do not require an active internet connection after installation of the Palo Alto Networks Cybersecurity-Practitioner practice exam software.
