E_S4CPE_2405 Dumps Collection & E_S4CPE_2405 Books PDF

As a prestigious platform offering practice material for all the IT candidates, TestSimulate experts try their best to research the best valid and useful SAP E_S4CPE_2405 exam dumps to ensure you 100% pass. The contents of E_S4CPE_2405 exam training material cover all the important points in the E_S4CPE_2405 Actual Test, which can ensure the high hit rate. You can instantly download the SAP E_S4CPE_2405 practice dumps and concentrate on your study immediately.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q29-Q34):

NEW QUESTION # 29
Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Business role requirements

- B. SAP Fiori application extensions
- C. Known integration requirements
- D. Target customer go-live date

Answer: A,C

Explanation:
The Digital Discovery Assessment (DDA) is a pivotal tool in the SAP S/4HANA Cloud implementation process, designed to align a customer's business requirements with the appropriate SAP solutions. It captures various critical aspects to ensure a successful deployment.
Option A: Business role requirements
This option is correct. The DDA involves identifying the specific business roles within an organization to tailor the SAP solution accordingly. Understanding these roles ensures that the system supports the necessary functions and responsibilities of each user group.
Option B: Known integration requirements
This option is correct. The assessment captures existing integration points with other systems, which is crucial for seamless data flow and process efficiency. Documenting these requirements helps in planning and executing necessary integrations during implementation.
Option C: Target customer go-live date
This option is incorrect. While the go-live date is essential for project planning, it is typically determined during the project management phase rather than being a primary focus of the DDA.
Option D: SAP Fiori application extensions
This option is incorrect. The DDA primarily focuses on assessing current business processes and integration needs. Specifics like SAP Fiori application extensions are usually addressed later in the implementation process, during the design and customization phases.
In summary, the Digital Discovery Assessment captures business role requirements and known integration requirements to ensure that the SAP S/4HANA Cloud Private Edition solution aligns with the organization's operational needs.

NEW QUESTION # 30
Which type of testing should be done after a release upgrade has been implemented?

- A. String tests
- B. Regression tests
- C. User acceptance tests
- D. Integration tests

Answer: B

Explanation:
After implementing a release upgrade in SAP S/4HANA Cloud Private Edition, it is crucial to conduct regression tests. These tests ensure that existing functionalities continue to operate as intended and that the upgrade has not introduced any new defects.
Option A: String tests
This option is incorrect. String tests focus on testing sequences of functions or transactions but do not comprehensively cover the system's functionality after an upgrade.
Option B: Integration tests
This option is incorrect. Integration tests assess the interaction between different modules or systems. While important, they do not specifically address the need to verify that existing functionalities remain unaffected by the upgrade.
Option C: User acceptance tests
This option is incorrect. User acceptance tests involve end-users validating that the system meets business requirements. However, they are not primarily focused on detecting regressions caused by the upgrade.
Option D: Regression tests
This option is correct. Regression tests are designed to verify that the existing functionalities of the system work as expected after changes, such as a release upgrade. They help identify any unintended side effects introduced during the upgrade process.
In summary, conducting regression tests after a release upgrade is essential to ensure that the system's existing functionalities remain intact and operate correctly. This practice helps maintain system stability and reliability following upgrades.

NEW QUESTION # 31
What are the most important tasks in the Fit-to-Standard analysis and design workshops for a system conversion? Note: There are 2 correct answers to this question.

- A. Validating the predefined solution in the sandbox system
- B. Capturing configuration requirements for new functionality
- C. Capturing configuration requirements for the predefined solution
- D. Validating new functionality in the sandbox system

Answer: A,C

NEW QUESTION # 32

How are SAP Best Practices business processes activated in the SAP S/4HANA Cloud Private Edition production system?

- A. Through SAP Solution Builder
- B. Through the SAP GUI
- C. Through transports
- D. Through SAP Signavio Process Navigator

Answer: A

NEW QUESTION # 33

You have assigned a business role to an end user who has been granted access to only one app. The app does NOT show up on the user's launchpad and you are not available to support.
What can the user do?

- A. Create a page and assign it to the launchpad space.
- B. Assign a different business role that provides access.
- C. Assign a launchpad space to the business role.
- D. Use the search function to find the app.

Answer: D

NEW QUESTION # 34
