Nutanix Exam NCP-US Flashcards & FreePdfDump - Leading Offer in Certification Exams Products

The 24/7 support team is just an e-mail away for our customers so that they can contact us anytime. Our team will solve all of their issues as quickly as possible. Free demos and up to 1 year of free updates of our Nutanix Exams are also available at FreePdfDump. Buy updated and Real NCP-US Exam Questions now and earn your dream NCP-US certification with FreePdfDump!

Nutanix NCP-US certification exam is designed for IT professionals who are responsible for designing, deploying, and managing Nutanix solutions. NCP-US exam covers a broad range of topics, including the fundamentals of Nutanix technology, storage concepts, and advanced features of Nutanix storage solutions. The Nutanix NCP-US Certification Exam is a comprehensive exam that tests the candidate's knowledge and skills in all areas of Nutanix storage solutions.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions

(Q102-Q107):

NEW QUESTION # 102

An administrator is tasked with performing an upgrade to the latest Objects version. What should the administrator do prior to upgrade Objects Manager?

- A. Upgrade Lifecycle Manager
- B. Upgrade Objects service
- C. Upgrade MSP
- **D. Upgrade AOS**

Answer: D

NEW QUESTION # 103

An administrator is managing a Nutanix cluster used for Citrix full clone virtual desktops. Capacity Runway is in a warning state, indicating storage resources may be fully utilized within 90 days. Which action can be performed to increase current capacity?

- A. Analyze inefficient VMS and delete the inactive ones.
- **B. Enable deduplication at the container level.**
- C. Power off over- provisioned VMs.
- D. update resources for constrained VMs,

Answer: B

Explanation:

Deduplication is a data reduction technique that eliminates duplicate blocks of data and reduces the amount of storage space required. By enabling deduplication at the container level, the administrator can optimize the storage efficiency and extend the capacity runway of the Nutanix cluster.

NEW QUESTION # 104

What is the reason for the alert: File Server In Heterogeneous State?

- A. The hosts where the FSVMs run do not match in their CPU or memory configuration
- **B. The FSVMs do not match in their CPU or memory**
- C. Performance of the File Server is optimal, and the alert can be ignored.
- D. The FSVMs are distributed properly on the hosts in the cluster.

Answer: B

Explanation:

According to the Nutanix Files Solution Guide, all the FSVMs have the same basic configuration: four vCPU and 12 GB of RAM. However, you can add more vCPU, RAM, and FSVMs to the cluster.

Based on this information, the alert: File Server In Heterogeneous State indicates that the FSVMs do not match in their CPU or memory configuration. This could affect the performance and availability of the file server.

NEW QUESTION # 105

An administrator has been asked to create a new user account for an auditor during an audit event. The auditor will write data to a Files share, for confidentiality reasons, the auditor's tasks should be not analyzed by the system. How should the administrator configure File Analytics to accomplish this task?

- A. Create a dedicated share for the auditor in Files.
- B. Grant anonymous access to the share used by the auditor.
- **C. Define a blacklisting rule in File Analytics**
- D. Restrict Files access for the auditor.

Answer: C

According to File Auditing and Analytics for your Nutanix Files Enterprise Cloud¹, File Analytics is a feature that captures real-time user audit data and file metadata for Nutanix Files environments. It allows you to monitor file activities, analyze usage patterns, and generate reports.

<https://next.nutanix.com/community-blog-154/nutanix-files-3-8-and-file-analytics-3-0-39309>

Users are complaining about having to reconnect to a share when there are networking issues. Which Files feature should the administrator enable to ensure the sessions will auto-reconnect in such events?

- Answer: D**
