

# Pass Guaranteed 2026 Snowflake ARA-C01–High-quality Online Tests

P.S. Free 2026 Snowflake ARA-C01 dumps are available on Google Drive shared by Itexamguide: <https://drive.google.com/open?id=1QAoV553Cspy9KmEV61YLOZe1PZuOJ6Zm>

Learning is just a part of our life. We do not hope that you spend all your time on learning the ARA-C01 certification materials. Life needs balance, and productivity gives us a sense of accomplishment and value. So our ARA-C01 real exam dumps have simplified your study and alleviated your pressure from study. Also, the windows software will automatically generate a learning report when you finish your practices of the ARA-C01 Real Exam dumps, which helps you to adjust your learning plan. It is crucial that you have formed a correct review method. The role of our ARA-C01 test training is optimizing and monitoring your study. Sometimes you have no idea about your problems. So you need our ARA-C01 real exam dumps to promote your practices.

Snowflake ARA-C01: SnowPro Advanced Architect Certification Exam is a highly respected and sought-after certification in the field of data warehousing and cloud computing. It is designed to test the advanced knowledge and skills of architects who are responsible for designing and implementing complex data warehousing solutions using Snowflake's cloud data platform. Passing ARA-C01 Exam demonstrates the candidate's expertise in designing and implementing scalable and high-performance data warehouses, data lakes, and data pipelines using Snowflake's cloud data platform.

## ARA-C01 Learning Materials, ARA-C01 Latest Exam Online

The goal of ARA-C01 exam torrent is to help users pass the exam with the shortest possible time and effort. With ARA-C01 exam torrent, you neither need to keep yourself locked up in the library for a long time nor give up a rare vacation to review. You will never be frustrated by the fact that you can't solve a problem. With ARA-C01 question torrent, you will suddenly find the joy of learning and you will pass the professional qualification exam very easily.

## Snowflake SnowPro Advanced Architect Certification Sample Questions (Q131-Q136):

### NEW QUESTION # 131

A company needs to have the following features available in its Snowflake account:

1. Support for Multi-Factor Authentication (MFA)
2. A minimum of 2 months of Time Travel availability
3. Database replication in between different regions
4. Native support for JDBC and ODBC
5. Customer-managed encryption keys using Tri-Secret Secure
6. Support for Payment Card Industry Data Security Standards (PCI DSS)

In order to provide all the listed services, what is the MINIMUM Snowflake edition that should be selected during account creation?

- A. Enterprise

- B. Virtual Private Snowflake (VPS)
- C. Business Critical
- D. Standard

**Answer: C**

Explanation:

According to the Snowflake documentation<sup>1</sup>, the Business Critical edition offers the following features that are relevant to the question:

Support for Multi-Factor Authentication (MFA): This is a standard feature available in all Snowflake editions<sup>1</sup>.

A minimum of 2 months of Time Travel availability: This is an enterprise feature that allows users to access historical data for up to 90 days<sup>1</sup>.

Database replication in between different regions: This is an enterprise feature that enables users to replicate databases across different regions or cloud platforms<sup>1</sup>.

Native support for JDBC and ODBC: This is a standard feature available in all Snowflake editions<sup>1</sup>.

Customer-managed encryption keys using Tri-Secret Secure: This is a business critical feature that provides enhanced security and data protection by allowing customers to manage their own encryption keys<sup>1</sup>.

Support for Payment Card Industry Data Security Standards (PCI DSS): This is a business critical feature that ensures compliance with PCI DSS regulations for handling sensitive cardholder data<sup>1</sup>.

Therefore, the minimum Snowflake edition that should be selected during account creation to provide all the listed services is the Business Critical edition.

### NEW QUESTION # 132

A company is trying to Ingest 10 TB of CSV data into a Snowflake table using Snowpipe as part of Its migration from a legacy database platform. The records need to be ingested in the MOST performant and cost-effective way.

How can these requirements be met?

- A. Use `on error = SKIP_FILE` in the copy into command.
- B. Use `purge = TRUE` in the copy into command.
- C. Use `FURGE = FALSE` in the copy into command.
- D. Use `ON_ERROR = continue` in the copy into command.

**Answer: A**

Explanation:

For ingesting a large volume of CSV data into Snowflake using Snowpipe, especially for a substantial amount like 10 TB, the `on error = SKIP_FILE` option in the `COPY INTO` command can be highly effective. This approach allows Snowpipe to skip over files that cause errors during the ingestion process, thereby not halting or significantly slowing down the overall data load. It helps in maintaining performance and cost-effectiveness by avoiding the reprocessing of problematic files and continuing with the ingestion of other data.

### NEW QUESTION # 133

Which alter command below may affect the availability of column with respect to time travel?

- A. `ALTER TABLE...SET DATA TYPE`
- B. `ALTER TABLE...DROP COLUMN`
- C. `ALTER TABLE...SET DEFAULT`

**Answer: A**

### NEW QUESTION # 134

A large manufacturing company runs a dozen individual Snowflake accounts across its business divisions. The company wants to increase the level of data sharing to support supply chain optimizations and increase its purchasing leverage with multiple vendors. The company's Snowflake Architects need to design a solution that would allow the business divisions to decide what to share, while minimizing the level of effort spent on configuration and management. Most of the company divisions use Snowflake accounts in the

same cloud deployments with a few exceptions for European-based divisions.

According to Snowflake recommended best practice, how should these requirements be met?

- **A. Deploy a Private Data Exchange in combination with data shares for the European accounts.**
- B. Deploy a Private Data Exchange and use replication to allow European data shares in the Exchange.
- C. Deploy to the Snowflake Marketplace making sure that `invoker_share()` is used in all secure views.
- D. Migrate the European accounts in the global region and manage shares in a connected graph architecture. Deploy a Data Exchange.

**Answer: A**

Explanation:

According to Snowflake recommended best practice, the requirements of the large manufacturing company should be met by deploying a Private Data Exchange in combination with data shares for the European accounts. A Private Data Exchange is a feature of the Snowflake Data Cloud platform that enables secure and governed sharing of data between organizations. It allows Snowflake customers to create their own data hub and invite other parts of their organization or external partners to access and contribute data sets. A Private Data Exchange provides centralized management, granular access control, and data usage metrics for the data shared in the exchange<sup>1</sup>. A data share is a secure and direct way of sharing data between Snowflake accounts without having to copy or move the data. A data share allows the data provider to grant privileges on selected objects in their account to one or more data consumers in other accounts<sup>2</sup>. By using a Private Data Exchange in combination with data shares, the company can achieve the following benefits:

The business divisions can decide what data to share and publish it to the Private Data Exchange, where it can be discovered and accessed by other members of the exchange. This reduces the effort and complexity of managing multiple data sharing relationships and configurations.

The company can leverage the existing Snowflake accounts in the same cloud deployments to create the Private Data Exchange and invite the members to join. This minimizes the migration and setup costs and leverages the existing Snowflake features and security.

The company can use data shares to share data with the European accounts that are in different regions or cloud platforms. This allows the company to comply with the regional and regulatory requirements for data sovereignty and privacy, while still enabling data collaboration across the organization.

The company can use the Snowflake Data Cloud platform to perform data analysis and transformation on the shared data, as well as integrate with other data sources and applications. This enables the company to optimize its supply chain and increase its purchasing leverage with multiple vendors.

The other options are incorrect because they do not meet the requirements or follow the best practices. Option A is incorrect because migrating the European accounts to the global region may violate the data sovereignty and privacy regulations, and deploying a Data Exchange may not provide the level of control and management that the company needs. Option C is incorrect because deploying to the Snowflake Marketplace may expose the company's data to unwanted consumers, and using `invoker_share()` in secure views may not provide the desired level of security and governance. Option D is incorrect because using replication to allow European data shares in the Exchange may incur additional costs and complexity, and may not be necessary if data shares can be used instead. Reference: Private Data Exchange | Snowflake Documentation, Introduction to Secure Data Sharing | Snowflake Documentation

### NEW QUESTION # 135

One of your colleagues has submitted a long running query in Snowflake. how long the query can run till snowflake automatically cancels the query?

- A. 2 hours
- **B. 2 days**
- C. 24 hours
- D. 14 hours

**Answer: B**

### NEW QUESTION # 136

.....

The price for ARA-C01 training materials is quite reasonable, and no matter you are a student at school or an employee in the company, you can afford the expense. You just think that you only need to spend some money, and you can pass the exam and get the certificate, which is quite self-efficient. In addition, ARA-C01 Exam Dumps are edited by the professional experts, who are quite familiar with the professional knowledge and testing center, and the quality and accuracy can be guaranteed. We have 24 hours

service stuff, and if you any questions about ARA-C01 training materials, just contact us.
