

Salesforce JS-Dev-101 Reliable Test Experience - JS-Dev-101 Valid Study Guide

BONUS!!! Download part of Pass4suresVCE JS-Dev-101 dumps for free: <https://drive.google.com/open?id=1JclB87TugScPs0c36HNQJc0cX96YI0g>

All these three Pass4suresVCE's Salesforce JS-Dev-101 exam dumps formats contain the real and updated Salesforce JS-Dev-101 practice test. These Salesforce JS-Dev-101 pdf questions are being presented in practice test software and PDF dumps file formats. The Salesforce JS-Dev-101 desktop practice test software is easy to use and install on your desktop computers. Whereas the other Salesforce JS-Dev-101 web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.

Salesforce JS-Dev-101 Exam Syllabus Topics:

Topic	Details
Topic 1	• Testing: Covers evaluating unit test effectiveness against a block of code and modifying tests to improve their coverage and reliability.
Topic 2	• Browser and Events: Covers DOM manipulation, event handling and propagation, browser-specific APIs, and using Browser Developer Tools to inspect code behavior.
Topic 3	• Asynchronous Programming: Covers asynchronous programming concepts and understanding how the event loop controls execution flow and determines outcomes.
Topic 4	• Server Side JavaScript: Covers Node.js implementations, CLI commands, core modules, and package management solutions for given scenarios.
Topic 5	• Objects, Functions, and Classes: Covers function, object, and class implementations to meet business requirements, along with the use of modules, decorators, variable scope, and execution flow.

Salesforce JS-Dev-101 Valid Study Guide | JS-Dev-101 Test Simulator

Free demos offered by Pass4suresVCE gives users a chance to try the product before buying. Users can get an idea of the JS-Dev-101 exam dumps, helping them determine if it's a good fit for their needs. The demo provides access to a limited portion of the JS-Dev-101 Dumps material to give users a better understanding of the content. Overall, Pass4suresVCE Salesforce JS-Dev-101 free demo is a valuable opportunity for users to assess the value of the Pass4suresVCE's study material before making a purchase.

Salesforce Certified JavaScript Developer - Multiple Choice Sample Questions (Q28-Q33):

NEW QUESTION # 28

Refer to the code below:

```
const event = new CustomEvent(  
//Missing Code  
);  
obj.dispatchEvent(event);
```

A developer needs to dispatch a custom event called update to send information about recordId.

Which two options could a developer insert at the placeholder in line 02 to achieve this?

Choose 2 answers

- A. 'Update' , {Details : {recordId : '123abc'}}
- B. 'Update' , (recordId : '123abc'()
- C. 'Update' , '123abc'
- D. { type : 'update', recordId : '123abc' }

Answer: A,B

NEW QUESTION # 29

Given HTML below:

```
<div>  
<div id="row-uc"> UniversalContainer</div>  
<div id="row-aa">Applied Shipping</div>  
<div id="row-bt"> Burlington Textiles </div>  
</div>
```

Which statement adds the priority = account CSS class to the universal Containers row ?

- A. Document .querySelector("#row-uc").classes.push('priority-account');
- B. Document .querySelectorALL("#row-uc").classList.add('priority-account');
- C. Document .querySelector("#row-uc").classList.add('priority-account');
- D. Document .querySelectorById('row-uc').addClass('priority-account');

Answer: D

NEW QUESTION # 30

Refer to the code:

```
01 const exec = (item, delay) =>  
02 new Promise(resolve => setTimeout(() => resolve(item), delay));  
03  
04 async function runParallel() {  
05 const [result1, result2, result3] = await Promise.all(  
06 [exec('x', '100'), exec('y', '500'), exec('z', '100')]  
07 );  
08 return `parallel is done: ${result1} ${result2} ${result3}`;  
09 }
```

Which two statements correctly execute `runParallel()`?

- A. `runParallel().then(data);`
- B. `runParallel().then(function(data){
return data;
});`
- C. `async runParallel().then(data);`
- D. `runParallel().done(function(data){
return data;
});`

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract JavaScript Knowledge Facts about JavaScript Promises:

`runParallel()` is declared `async`, which means it always returns a Promise.

Promises are consumed using `.then()`, `.catch()`, and `.finally()`.

There is no `.done()` method in native JavaScript Promises.

The `async` keyword cannot be placed before a function call (option A is invalid syntax).

Analysis of each option:

A . `async runParallel().then(data);`

Invalid syntax. `async` cannot prefix an expression.

B . Valid. Calls the function and attaches a `.then()` handler.

C . Invalid. `.done()` is not part of JavaScript Promise API.

D . Valid. Calls `runParallel()` and chains `.then()`.

Therefore the correct answers are B and D.

JavaScript Knowledge Reference (text-only)

`async` functions return Promises.

Promises use `.then()` to retrieve resolved values.

`.done()` is not part of the standard Promise interface.

NEW QUESTION # 31

Universal Containers recently launched its new landing page to host a crowd-funding campaign. The page uses an external library to display some third-party ads. Once the page is fully loaded, it creates more than 50 new HTML items placed randomly inside the DOM, like the one in the code below:

All the elements include the same `ad-library-item` class. They are hidden by default, and they are randomly displayed while the user navigates through the page.

- A. Use the DOM inspector to remove all the elements containing the class `ad-library-item`.
- B. Use the browser console to execute a script that prevents the load event to be fired.
- C. Use the browser to execute a script that removes all the element containing the class `ad-library-item`.
- D. Use the DOM inspector to prevent the load event to be fired.

Answer: C

NEW QUESTION # 32

Universal Container(UC) just launched a new landing page, but users complain that the website is slow. A developer found some functions that cause this problem. To verify this, the developer decides to do everything and log the time each of these three suspicious functions consumes.

```
console.time('Performance');
```

```
maybeAHeavyFunction();
```

```
thisCouldTakeTooLong();
```

```
orMaybeThisOne();
```

```
console.endTime('Performance');
```

Which function can the developer use to obtain the time spent by every one of the three functions?

- A. console.getTime()
- B. console.trace()
- C. console.timeStamp()
- D. console.timeLog()

Answer: D

NEW QUESTION # 33

.....

Their updated Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) practice test material includes the latest and real JS-Dev-101 questions that are very similar to those given in the actual Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) exam. Additionally, the Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) practice test software creates a realistic JS-Dev-101 exam environment for users, and it also helps you in your preparation for the actual Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) test. Pass4suresVCE offers the latest JS-Dev-101 exam questions in multiple formats for convenience. These formats include Salesforce Certified JavaScript Developer - Multiple Choice (JS-Dev-101) PDF dumps, JS-Dev-101 Practice Test (web-based), and JS-Dev-101 Practice Exam Software (Desktop-Based).
