OGA-031 STUDY GUIDE: PRACTICE QUESTIONS FOR THE OPEN GROUP ARCHIMATE 3 FOUNDATION EXAM

OGA-031 Practice Test and Preparation Guide

GET COMPLETE DETAIL ON OGA-031 EXAM GUIDE TO CRACK VERSION 3.1. YOU CAN COLLECT ALL INFORMATION ON OGA-031 TUTORIAL, PRACTICE TEST, BOOKS, STUDY MATERIAL, EXAM QUESTIONS, AND SYLLABUS. FIRM YOUR KNOWLEDGE ON VERSION 3.1 AND GET READY TO CRACK OGA-031 CERTIFICATION. EXPLORE ALL INFORMATION ON OGA-031 EXAM WITH NUMBER OF QUESTIONS, PASSING PERCENTAGE AND TIME DURATION TO COMPLETE TEST.

P.S. Free & New OGA-031 dumps are available on Google Drive shared by ITCertMagic: https://drive.google.com/open?id=1bLuLW755aHoj_oUfnCz2NKUpnMe16T2R

We are determined to be the best vendor in this career to help more and more candidates to accomplish their dream and get their desired OGA-031 certification. No only that we provide the most effective OGA-031 study materials, but also we offer the first-class after-sale service to all our customers. Our professional online service are pleased to give guide in 24 hours. If you have any question on our OGA-031 learning quiz, just contact us!

Please select our ITCertMagic to achieve good results in order to pass The Open Group certification OGA-031 exam, and you will not regret doing so. It is worth spending a little money to get so much results. Our ITCertMagic can not only give you a good exam preparation, allowing you to pass The Open Group Certification OGA-031 Exam, but also provide you with one-year free update service.

Latest OGA-031 - ArchiMate 3 Part 1 Exam Valid Test Papers

ITCertMagic online digital The Open Group OGA-031 exam questions are the best way to prepare. Using our The Open Group OGA-031 exam dumps, you will not have to worry about whatever topics you need to master. To practice for a The Open Group OGA-031 Certification Exam in the ITCertMagic (free test), you should perform a self-assessment. The OGA-031 practice test ITCertMagic keeps track of each previous attempt and highlights the improvements with each attempt.

The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Complete following sentence: In the generic metamodel the main types of elements can be divided into

- A. grouping and location
- B. resources and events
- C. structure and behavior
- D. process and function

Answer: C

Explanation:

Based on the ArchiMate 3 documents or objectives, the generic metamodel defines two main types of elements: structure and behavior. Structure elements represent the structural concepts that model the static construction or composition of concepts of the same or different types. Behavior elements represent units of activity performed by one or more active structure elements.

NEW QUESTION # 15

Complete the sentence. In the Technology Layer metamodel, a communication network ___ a path.

- A. Realizes
- B. Aggregates
- C. Serves
- D. Accesses

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation: In the Technology Layer metamodel, a Communication Network is an active structure that provides the infrastructure for communication between devices and systems.

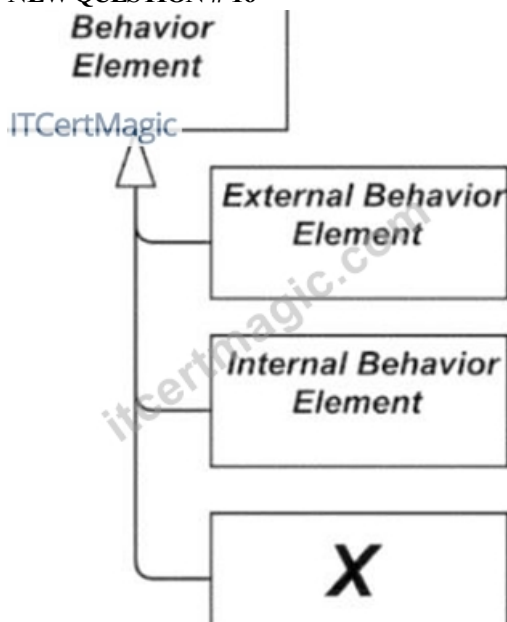

A Path represents a logical or physical connection that facilitates communication between nodes or other elements. The Communication Network aggregates the Path, as a network consists of multiple paths connecting different components.

This is clearly stated in the ArchiMate 3.2 Specification, where the aggregation relationship between a Communication Network and a Path is defined.

References:

- * Archi User Guide
- * ArchiMate 3.2 Specification

NEW QUESTION # 16

Consider the metamodel fragment shown. What is the element marked X?

- A. Function
- B. Interface
- **C. Event**
- D. Service

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The diagram represents a metamodel fragment based on ArchiMate 3.2, specifically focusing on Behavior Elements.

- * Behavior Element is a general category that consists of external and internal behavior elements.
- * External Behavior Element represents behavior that is externally observable by other components (such as a service or an interface).
- * Internal Behavior Element represents behavior that is performed within an entity (such as a function, process, or interaction).
- * The element X is a specialized form of an Internal Behavior Element.

According to ArchiMate 3.2 Specification, Section 5.2, internal behavior elements include processes, functions, interactions, and events.

- * Function (A) ## Incorrect
- * A Function is an internal behavior element, but it is not the correct specialization in this hierarchy.
- * Functions are usually structured ways of performing internal operations rather than discrete occurrences.
- * Service (B) ## Incorrect
- * A Service is an external behavior element, meaning it is not classified under internal behavior elements.
- * Since X is placed under Internal Behavior Elements, this cannot be the correct answer.
- * Interface (C) ## Incorrect
- * An Interface is not a behavior element; instead, it is part of the structure that exposes services.
- * The hierarchy in the question does not deal with structural elements, making Interface an incorrect choice.
- * Event (D) ## Correct Answer
- * Events represent discrete occurrences that can trigger other behaviors within the architecture.
- * Events belong to Internal Behavior Elements because they drive processes and functions.
- * According to ArchiMate 3.2 Specification, Section 5.2.1, an Event is classified as an Internal Behavior Element alongside functions and processes.

#D. Event

References:

- * ArchiMate 3.2 Specification: Sections 5.2 (Behavior Elements) and 5.2.1 (Event as an Internal Behavior Element).
- * Archi User Guide: Understanding Behavior Elements and their hierarchy.

NEW QUESTION # 17

What relationship is allowed from a technology function to an application function?

- **A. Assignment**
- B. Aggregation
- C. Influence
- D. Realization

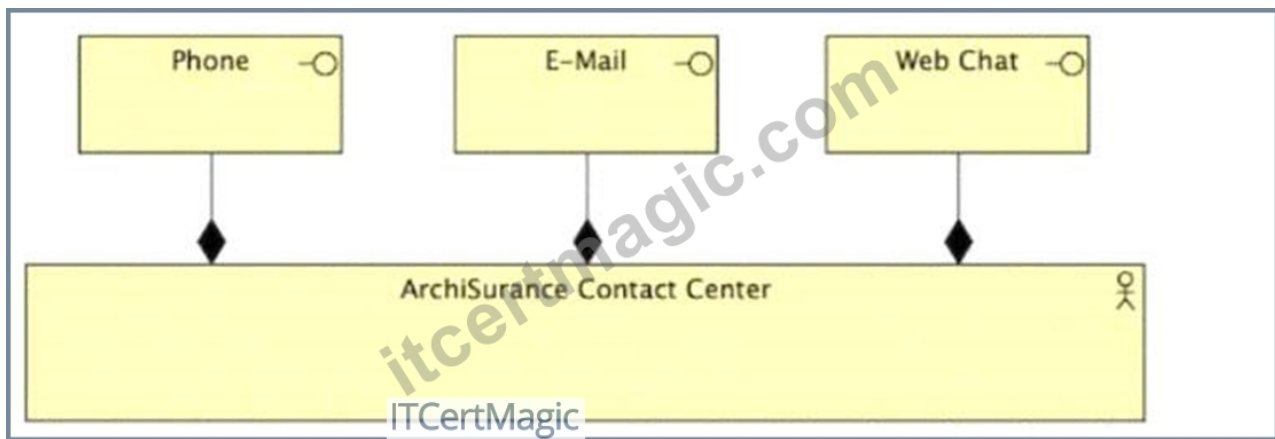

Answer: A

Explanation:

According to the ArchiMate 3.2 Specification¹, an application function describes the internal behavior of an application component, and an application component may be assigned to an application function, which means that the application component performs the application function. Therefore, the correct answer is A. Assignment. This relationship indicates that an instance of a technology function performs (part of) the behavior of an instance of an application function¹.

NEW QUESTION # 18

Consider the diagram:

(A diagram showing Phone, E-Mail, and Web Chat connected to ArchiSurance Contact Center through black diamonds.) Which of the following describes the ArchiSurance Contact Center?

- A. The Contact Center has three business interfaces to serve customers: phone, e-mail, and web chat.
- B. The Contact Center has a business interaction with its customers using phone, e-mail, and web chat.
- C. The Contact Center uses phone, e-mail, and web chat for internal communication.
- D. The staff within the Contact Center collaborate using phone, e-mail, and web chat.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

This ArchiMate model represents the ArchiSurance Contact Center and how it interacts with different communication channels.

* The elements labeled "Phone," "E-Mail," and "Web Chat" are connected to the Contact Center using a black diamond (Composition relationship).

* This indicates that these communication channels serve as business interfaces for interacting with customers.

* A Business Interface in ArchiMate represents a way in which services are provided to external parties, like customers, through defined means such as phone, email, or web chat.

Analysis of Answer Choices:

#A. The Contact Center has a business interaction with its customers using phone, e-mail, and web chat.

##Incorrect

* A Business Interaction in ArchiMate is used to model collaborations between two or more roles or actors, not interfaces.

* This diagram focuses on interfaces rather than interactions.

* ArchiMate 3.2 Specification, Section 6.3.2, states that business interactions require multiple active participants, which is not shown here.

#B. The Contact Center uses phone, e-mail, and web chat for internal communication. ##Incorrect

* The diagram does not indicate internal collaboration or communication but rather customer-facing interfaces.

* If this were internal communication, it would use Business Collaboration elements instead.

#C. The Contact Center has three business interfaces to serve customers: phone, e-mail, and web chat.

##Correct Answer

* The Phone, E-Mail, and Web Chat elements represent Business Interfaces, which are the means through which services are delivered to customers.

* ArchiMate 3.2 Specification, Section 6.3.3, defines Business Interfaces as points of interaction between a Business Role and its environment, exactly fitting this diagram.

#D. The staff within the Contact Center collaborate using phone, e-mail, and web chat. ##Incorrect

* Business Collaboration is not depicted in the diagram, and internal collaboration would be modeled differently in ArchiMate.

* The focus here is on customer-facing services, not internal interactions.

#C. The Contact Center has three business interfaces to serve customers: phone, e-mail, and web chat.

References:

* ArchiMate 3.2 Specification: Sections 6.3.3 (Business Interface), 6.3.2 (Business Interaction).

* Archi User Guide: Modeling business interfaces and customer interactions.

NEW QUESTION # 19

.....

We are committed to helping you pass the exam and get the certificate as soon as possible. OGA-031 exam bootcamp of us have

the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam. OGA-031 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the OGA-031 exam bootcamp.
