在如今互聯網如此發達社會裏，選擇線上培訓已經是很普遍的現象。Fast2test就是眾多線上培訓網站之一。Fast2test的線上培訓有著多年的經驗，可以為參加Cisco 300-745 認證考試的考生提供高品質的學習資料，來能滿足考生的所有需求。

## Cisco 300-745 考試大綱：

| 主題    | 簡介   |
|-------|--|
| 主題 2  | <ul style="list-style-type: none"><li>• Risk, Events, and Requirements:</li></ul>  |
| 主題 4  | <ul style="list-style-type: none"><li>• Explores AI's role in securing network infrastructure, selecting tools for automated security architectures such as SOAR, IaC, and API tooling, and integrating security into DevSecOps workflows and pipelines to minimize deployment risk.</li></ul>   |
| 主題 6  | <ul style="list-style-type: none"><li>• Covers selecting security approaches for endpoints, identities, email, and modern environments like hybrid work, IoT, SaaS, and multi-cloud. Includes choosing VPN tunneling solutions, securing management planes, and selecting the appropriate firewall architecture based on business needs.</li></ul> |
| 主題 9  | <ul style="list-style-type: none"><li>• Secure Infrastructure:</li></ul>   |
| 主題 10 | <ul style="list-style-type: none"><li>• Focuses on selecting security solutions to protect applications and designing secure architectures for cloud-native, containerized, and serverless environments using segmentation. Also addresses security design impacts of emerging technologies like AI, ML, and quantum computing.</li></ul>          |

## 最有效的300-745題庫分享，免費下載300-745考試題庫幫助妳通過300-745考試

在哪里可以找到最新的300-745題庫問題以方便通過考試？Fast2test已經發布了最新的Cisco 300-745考題，包括考試練習題和答案，是你不二的選擇。對於購買我們300-745題庫的考生，可以為你提供一年的免費跟新服務。如果你還在猶豫，試一下我們試用版本的PDF題目就知道效果了。最新版的Cisco 300-745題庫能幫助你通過考試，獲得證書，實現夢想，它被眾多考生實踐并證明，300-745是最好的IT認證學習資料。

## 最新的 CCNP Security 300-745 免費考試真題 (Q19-Q24):

### 問題 #19

Which generative AI impact is addressed by a human-in-the-loop design policy?

- A. phishing
- B. deep fakes
- C. scale changes
- **D. AI hallucinations**

答案：D

解題說明：

A human-in-the-loop design policy ensures that humans validate or oversee AI-generated outputs, reducing the risk of AI hallucinations (false or misleading information generated by AI). This provides accountability and accuracy in generative AI use.

### 問題 #20

What does watermarking AI generated content prevent?

- **A. deep fakes**
- B. scale changes
- C. harmful content
- D. massive resource consumption

答案： A

解題說明：

Watermarking in AI-generated content helps detect and trace synthetic media, which directly mitigates the risk of deep fakes. By embedding hidden identifiers, organizations can verify whether content was created by AI, reducing misuse for impersonation or disinformation.

#### 問題 #21

A restaurant distribution center recently suffered a password spray attack targeting the Cisco Secure Firepower Threat Defense VPN headend. The attack attempts to gain unauthorized access by trying common passwords across many accounts. The attack poses a significant security threat to the organization's remote access infrastructure. To enhance the security of the VPN setup and minimize the risk of similar attacks in the future, the IT security team must implement effective mitigation measures. Which technique effectively reduces the risk of this type of attack?

- A. Change the AAA authentication method from RADIUS to TACACS+.
- B. Enable AAA authentication for the DefaultWEBVPN and DefaultRAGroup Connection Profiles.
- C. Implement an access list to block addresses from the previous password spray attack.
- D. Disable group aliases in the connection profiles.

答案： B

解題說明：

In the context of Designing Cisco Security Infrastructure, protecting Remote Access VPN (RAVPN) against brute-force and password spray attacks is a critical objective. On Cisco Firepower Threat Defense (FTD) and Adaptive Security Appliance (ASA) platforms, the DefaultWEBVpnGroup and DefaultRAGroup are the landing points for any connection request that does not specify a valid Group Alias or Group URL. Attackers frequently target these default profiles because they are often left with "None" as the authentication method, allowing the attacker to probe for valid usernames without immediate rejection. By selecting Option D, the security designer ensures that any attempt to access the VPN via these default profiles requires valid AAA credentials. According to Cisco's hardened design guides, it is best practice to point these default profiles to a "sinkhole" AAA server or a local database with no users. This forces the password spray attack to fail at the initial authentication phase before any sensitive information is leaked or unauthorized access is granted. While Option A (ACLs) provides a temporary fix, it is ineffective against distributed attacks using rotating IP addresses. Option B (Disabling aliases) is a good obfuscation technique but doesn't stop an attacker from hitting the default profile. Option D provides a structural mitigation that aligns with the Cisco SAFE architectural principle of reducing the attack surface by securing every possible entry vector into the private infrastructure.

#### 問題 #22

A global hotel chain is using Cisco ISE and Cisco switches to manage the network. The hotel company wants to enhance network security by segmenting users and endpoints. The company must ensure that devices within the same VLAN cannot communicate with each other. The goal is to prevent cross-communication without the use of dynamic access control lists. Which action must be taken using Cisco ISE to meet the requirement?

- A. Implement device posturing.
- B. Enable identity groups.
- C. Set up endpoint profiling.
- D. Configure TrustSec.

答案： D

解題說明：

Cisco TrustSec provides software-defined segmentation by assigning Security Group Tags (SGTs) to users and devices. This allows policy enforcement that prevents communication between devices in the same VLAN without needing dynamic ACLs. It is the correct approach to achieve secure segmentation in this scenario.

#### 問題 #23

A furniture company recently discovered that the endpoint detection and response configuration flagged several malicious files on company-managed laptops. The company must enhance security to prevent known malicious files from being delivered to the network and endpoints. The new solution must enhance the company's ability to inspect and filter incoming traffic effectively.

Which security product must be used to accomplish this goal?

- A. traditional firewall
- B. host-based firewall
- C. next-generation firewall
- D. eBPF

答案： C

解題說明：

A next-generation firewall (NGFW) inspects and filters incoming traffic with deep packet inspection, intrusion prevention, and advanced malware filtering. This prevents known malicious files from reaching the network and endpoints, complementing the company's EDR solution.

問題 #24

.....

上帝是很公平的，每個人都是不完美的。就好比，平時不努力，老大徒傷悲。現在的IT行業競爭壓力不言而喻大家都知道，每個人都想通過IT認證來提升自身的價值，我也是，可是這種對我們來說是太難太難了，所學的專業知識早就忘了，惡補那是不現實的，還好我在互聯網上看到了Fast2test Cisco的300-745考試培訓資料，有了它我就不用擔心我得考試了，Fast2test Cisco的300-745考試培訓資料真的很好，它的內容覆蓋面廣，而且針對性強，絕對比我自己復習去準備考試好，如果你也是IT行業中的一員，那就趕緊將Fast2test Cisco的300-745考試培訓資料加入購物車吧，不要猶豫，不要徘徊，Fast2test Cisco的300-745考試培訓資料絕對是成功最好的伴侶。
