HPE0-V25 Exam Fee - Exam HPE0-V25 Pattern

If you fail in HPE0-V25 exam test with 2Pass4sure HPE0-V25 exam dumps, we promise to give you full refund! You only need to scan your HPE0-V25 test score report to us together with your receipt ID. After our confirmation, we will give you full refund in time. Or you can choose to charge another exam Q&AS instead of HPE0-V25 Exam Dumps. Useful HP certifications exam dumps are assured with us. If our HPE0-V25 exam dumps can't help you pass HPE0-V25 exam, details will be sent before we send the exam to you. We don't waste our customers' time and money! Trusting 2Pass4sure is your best choice!

HPE0-V25 certification is a valuable credential for IT professionals who specialize in hybrid cloud solutions. Whether you are an experienced IT professional or just starting out in your career, this certification can help you advance your skills and open up new career opportunities in the IT industry.

HPE0-V25 exam covers a range of topics related to hybrid cloud solutions, including planning, designing, deploying, and managing hybrid cloud infrastructure. It also covers key technologies such as HPE OneView, HPE Synergy, and HPE SimpliVity, as well as cloud platforms such as Microsoft Azure and Amazon Web Services. HPE0-V25 Exam is designed to test a candidate's ability to apply their knowledge of these technologies in real-world scenarios.

HPE Hybrid Cloud Solutions Sample Questions (Q102-Q107):

NEW QUESTION # 102

You connect to the Compute Ops Management (CoM) through the GreenLake Cloud Platform dashboard. The server you want to manage is missing. Where should the server be added so it appears in the CoM?

- A. Compute Ops Management - Servers
- B. GreenLake Cloud Platform - Manage Subscriptions
- C. **GreenLake Cloud Platform - Onboard Devices**

- D. Compute Ops Management - Server Groups

Answer: C

Explanation:

* Understanding the Scenario:

You are accessing Compute Ops Management (CoM) through the GreenLake Cloud Platform dashboard.

A specific server is not appearing in the CoM, indicating it needs to be added.

* Steps to Add the Server:

A . Compute Ops Management - Server Groups: This option manages existing groups of servers but does not handle the initial onboarding.

B . GreenLake Cloud Platform - Onboard Devices: This is the process to add new devices (servers) to the GreenLake Cloud Platform, ensuring they appear in the CoM.

C . Compute Ops Management - Servers: Used to manage servers already onboarded to the platform

D . GreenLake Cloud Platform - Manage Subscriptions: Related to managing service subscriptions rather than onboarding devices.

* Why B is the Correct answer:

Onboarding Process: The server needs to be onboarded to the GreenLake Cloud Platform for it to be visible and manageable in the Compute Ops Management interface.

Correct Procedure: Onboarding devices is the initial step required to integrate new hardware into the platform's management tools.

* Reference:

HPE GreenLake Onboarding Guide: HPE GreenLake Onboarding

Compute Ops Management Documentation: HPE Compute Ops Management

NEW QUESTION # 103

Your customer needs a File & Print server that will maximize disk capacity. Fault Tolerance is not required. Which RAID Level should you recommend?

- A. RAID 6
- B. RAID 1
- C. RAID 5
- **D. RAID 0**

Answer: D

Explanation:

RAID 0 is the best choice for maximizing disk capacity because it stripes data across all the drives in the array, effectively combining their capacities into one larger, faster storage unit. Since RAID 0 does not provide any redundancy or fault tolerance, it uses 100% of the disk space for storage, making it the most efficient in terms of capacity utilization¹²³.

However, it's important to note that RAID 0 does not offer any protection against drive failures. If one drive fails, all data on the RAID 0 array could be lost. Therefore, while RAID 0 maximizes disk capacity, it should only be used when fault tolerance is not a concern, and data is backed up regularly or is non-critical

NEW QUESTION # 104

Which combination of HPE solutions can provide data validation on MSL3040 and LTO-9 cartridges?

- A. HPE Command View for Tape Libraries and Library and Tape Tools
- B. Library and Tape Tools and HPF StoreEver TapeAssure Advanced Software
- **C. HPE Command View for Tape Libraries and HPE StoreEver Data Verification**
- D. HPE Command View for Tape Libraries and HPE TapeAssure Advanced

Answer: C

Explanation:

HPE StoreEver Data Verification Software proactively validates and scans, nondisruptively, the quality of data stored on LTO tape cartridges. Scanning and validating infrequently accessed tapes ensures that a successful restore is possible when critical business data is needed.

Data verification is only supported on the MSL6489 and MSL3040.

NEW QUESTION # 105

How do you access the SSD Wear Gauge report?

- A. HPE Infosight portal
- B. OneView for Servers
- **C. Smart Storage Administrator**
- D. OneView for storage

Answer: C

Explanation:

* Understanding the Requirements:

The task is to access the SSD Wear Gauge report.

* Access Options:

- A . OneView for Servers: Primarily used for managing server infrastructure but not specifically for SSD wear information.
- B . OneView for Storage: Used for managing storage systems but does not provide detailed SSD wear information.
- C . HPE InfoSight Portal: Provides predictive analytics and insights but not direct access to SSD wear reports.
- D . Smart Storage Administrator: A tool specifically designed to manage HPE storage solutions, including SSD wear monitoring.

* Why Smart Storage Administrator (D) is the Best Fit:

Specialized Tool: HPE Smart Storage Administrator (SSA) provides detailed information on storage health, including SSD wear gauges.

Direct Access: It allows direct access to SSD wear metrics, enabling proactive maintenance and management of SSDs.

* Reference:

HPE Smart Storage Administrator: Smart Storage Administrator (SSA)

HPE SSD Wear Gauge: HPE SSD Management

NEW QUESTION # 106

When designing new server environments, you need to determine the maximum equipment wattage and thermal requirements at the unit (chassis) and rack level.

Which HPE tool should be used?

- A. HPE Smart Storage Administrator
- B. HPE Infosight
- **C. HPE Power Advisor**
- D. HPE OneView

Answer: C

Explanation:

This is a tool that helps you estimate power consumption and thermal output for HPE servers, storage, and networking products.

You can use it to design new server environments or validate existing ones by selecting the products and configurations you want and generating a detailed report that shows the power and cooling requirements at the unit and rack level.
