JN0-253套裝，JN0-253最新考證

BONUS!!! 免費下載KaoGuTi JN0-253考試題庫的完整版：https://drive.google.com/open?id=1S-U_XV5m6BRu3hVk-uxAvkT7DQmyAmDw

利用KaoGuTi Juniper的JN0-253考試認證培訓資料來考試從來沒有過那麼容易，那麼快。這是某位獲得了認證的考生向我們說的心聲。有了KaoGuTi Juniper的JN0-253考試認證培訓資料你可以理清你凌亂的思緒，讓你為考試而煩躁不安。這不僅僅可以減輕你的心裏壓力，也可以讓你輕鬆通過考試。我們KaoGuTi有免費提供部分試題及答案作為試用，如果只是我單方面的說，你可以不相信，只要你用一下試用版本，我相信絕對適合你，你也就相信我所說的了，有沒有效果，你自己知道。

Juniper JN0-253 考試大綱：

主題	簡介
主題 1	• Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
主題 2	• Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.
主題 3	• Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.
主題 4	• Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
主題 5	• Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
主題 6	• Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.

JN0-253套裝 |高通過率的考試材料｜JN0-253：Mist AI, Associate (JNCIA-

MistAI)

怎樣才能確保我們的生活可更快的得到改善？你需要通過JN0-253認證考試，獲得證書。而KaoGuTi是IT專業人士的最佳選擇，獲得JN0-253認證是IT職業發展的有力保證，我們高品質的題庫能幫助你做到這一點。JN0-253考試題庫也會不定期的更新，為你提供最有效的學習資料。使用我們的JN0-253考試題庫進行考前復習，可以節約你大量的學習時間和費用，這是最適合獲得JN0-253認證的所必須的學習資料。

最新的 JNCIA-MistAI JN0-253 免費考試真題 (Q73-Q78):

問題 #73
In the Juniper Mist UI, which two administrative roles are required to view an organization's Audit Logs?
(Choose two.)

- A. Helpdesk
- B. Super User
- C. Network Admin
- D. Installer

答案：B,C

解題說明：
To view an organization's Audit Logs in the Juniper Mist UI, the required roles are Network Admin and Super User. According to Juniper Mist documentation: "Network Admin (with All Sites access) and Super User roles grant permission to view and interact with organization-level features, including Audit Logs and Inventory." The Audit Logs page provides a chronological record of user logins and configuration changes, and access is restricted to authorized users for security and compliance reasons. The "Super User" role has full read/write access for the entire organization-no restrictions-allowing these users to view Audit Logs without limitation. The "Network Admin" role, when granted access to All Sites (not just specific sites), can also view Audit Logs as part of their permitted organization-level operations. Other roles, such as Helpdesk and Installer, have limited or specific access and cannot access Audit Logs. These permissions ensure that only trusted network administrators and super users have the necessary authority for sensitive audit and compliance functions.

問題 #74
Which two statements are true about Juniper Mist Wireless Assurance Radio Resource Management (RRM)? (Choose two.)

- A. RRM builds the channel plan based on the physical distance between the APs.
- B. RRM tuning is a manual process that you must initiate every day.
- C. RRM builds the channel plan based on a real-time assessment of the network.
- D. RRM tuning happens automatically.

答案：C,D

解題說明：
Real-time Assessment: Juniper Mist's Radio Resource Management (RRM) builds the channel plan based on real-time network assessments. It dynamically adjusts to changing conditions in the RF environment, ensuring optimal performance by continuously monitoring factors such as interference, client distribution, and usage patterns. Automatic Tuning: RRM tuning happens automatically. Mist AI leverages reinforcement learning to continually optimize RF settings without manual intervention, adjusting channels, power levels, and other parameters in real-time to maintain optimal network performance.

問題 #75
What are two user roles that you are allowed to assign to a new account? (Choose two.)

- A. root
- B. guest
- C. installer
- D. network admin

答案：C,D

解題說明：
Installer: The installer role is designed for users who need access to configure and deploy Mist devices. This role typically has the necessary permissions to set up and manage devices but with limited access to other administrative functions.
Network Admin: The network admin role provides comprehensive access to manage network settings, monitor performance, and configure policies. This role is essential for users responsible for the overall network administration and maintenance.

問題 #76
You scheduled downtime to push the latest firmware to all the APs you deployed at the site. You verified that all of the APs are working fine. When you go back to work, you notice no complaints from the users. When you check the AP page, you notice that several APs have not rolled out with the latest firmware.
In this scenario, how does Marvis categorize this issue in the Marvis Action dashboard?

- A. The high CPU Marvis Action is displayed.
- B. The missing VLAN Marvis Action is displayed.
- C. The non-compliant Marvis Action is displayed.
- D. The port flap Marvis Action is displayed.

答案：C

解題說明：
When several APs fail to update to the latest firmware during a scheduled downtime, Marvis categorizes this issue as a "non-compliant" action.
This categorization indicates that some APs are not adhering to the intended firmware version policy, which could potentially affect network performance or security. The non-compliant Marvis Action provides administrators with the necessary information to identify and rectify the issue, ensuring all APs are updated as required.

問題 #77
Your manager asks you to configure all your remote Juniper EX Series switches to use Dynamic Port Configuration.
In this scenario, what are two criteria used for matching connected devices and assigning them their correct port and VLAN? (Choose two.)

- A. Serial Number
- B. MAC Address
- C. LLDP Chassis ID
- D. IP Address

答案：B,C

解題說明：
Dynamic Port Configuration (DPC)inJuniper Mist Wired Assuranceallows EX Series switches to automatically assign port profiles, VLANs, and policies to connected devices based on their unique identifiers. This automation simplifies switch management and ensures consistent configurations across distributed networks.
According to theJuniper Mist Wired Assurance Configuration and Dynamic Port Management Guide:
"Dynamic Port Configuration matches connected endpoints using identifiers such as LLDP chassis ID and MAC address to assign the appropriate port profile or VLAN automatically."
* LLDP Chassis ID (C):Identifies the connected device by its LLDP advertisement, often representing a switch, phone, or AP.
* MAC Address (D):Provides unique device identification, ensuring precise port and VLAN assignment even when LLDP data is unavailable.
OptionsA (Serial Number)andB (IP Address)are not used for port configuration matching in DPC because they are not always available at the time of link establishment.
Therefore, the correct answers areC. LLDP Chassis IDandD. MAC Address.
