- Emergency Management
- Disaster Recovery and Business Continuity
- Nature and Causes of Disasters
- Law and Acts

## What is the duration of the 312-76 Exam

- Length of Examination: 4 hours
- Number of Questions: 150
- Passing Score 70%
- Format: Multiple choices, multiple answers

## Reliable 312-76 Practice Materials & 312-76 Real Exam Torrent - TorrentValid

The language which is easy to be understood and simple, 312-76 exam questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the 312-76 Guide Torrent and pass the exam in a short time. The amount of the examinee is large. For the office workers, they are both busy in their job and their family life; for the students, they possibly have to learn or do other things.

### Format of 312-76

The EC-Council 312-76 evaluation is a timed exam and verifies multiple domains at once. For this, the test uses professionally designed 150 questions. These questions are based on the MCQ format. The test duration is 4 hours and it is globally available at ECC testing centers. As a rule, there is no fixed passing score threshold for EC-Council exams and it varies as per the difficulty of the actual test. Hence, aspirants should be exam-ready in a manner that they secure passing grades no matter how tough the official exam is. However, the vendor claims that 70% is needed to come up with flying colors in 312-76, in particular. Next comes the exam costing, which is \$450 plus the additional \$100 fee that students have to pay for the application. Every EC-Council 312-76 aspirant has to pass through an extensive screening process, wherein the exam application and mentioned details will be cross-checked. Applications that are approved via this procedure can move forward for exam appearing. This process is applicable to every aspirant and no exceptions exist.

### EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample Questions (Q230-Q235):

#### NEW QUESTION # 230

ABC Inc. has a host of servers, each serving a different purpose. Almost all of them are critical to the functioning of the business. Most of the servers were virtualized and had backup virtual components. Thus, when the memory of one server crashed in the middle of a busy business day, it did not affect the operations as the server quickly switched to a different virtual memory, which was kept as a backup for this purpose precisely. What is such a feature called?

- A. Fault Tolerance
- **B. High Availability**
- C. Mirroring
- D. Deduplication

**Answer: B**

Explanation:

High Availability (HA) ensures continuous operation by automatically switching to backup components (like virtual memory) during a failure, minimizing downtime, as in ABC Inc.'s case.

\* Option A (Deduplication): Removes redundant data, not a failover feature.

\* Option C (Fault Tolerance): Prevents failure impact but typically implies no interruption, not a switch.

\* Option D (Mirroring): Duplicates data, a component of HA, but not the full feature.

\* "High Availability maintains operations through automatic failover to backup resources, ensuring business continuity during component failures" (Module: System Resilience, Section: Availability Features).

#### NEW QUESTION # 231

Pete works as a Network Security Officer for Gentech Inc. He wants to encrypt his network traffic.

The specific requirement for the encryption algorithm is that it must be a symmetric key block cipher. Which of the following techniques will he use to fulfill this requirement?

- A. IDEA
- B. PGP
- C. AES
- **D. DES**

**Answer: D**

### NEW QUESTION # 232

Which of the following RAID levels provides fault tolerance?

- A. RAID-0
- B. RAID-1
- **C. RAID-5**
- D. RAID-10

**Answer: C**

### NEW QUESTION # 233

Which of the following three components define the three-tier architecture in decentralized computing?

- **A. Client, Application Server, and Database Server**
- B. Client, Peer-to-Peer, and Application
- C. Tightly Coupled, Client, and Peer-to-Peer
- D. Application, Peer-to-Peer, and Tightly Coupled

**Answer: A**

Explanation:

Three-tier architecture in decentralized computing consists of Client (presentation), Application Server (logic), and Database Server (data), as standard layers.

\* Option A/B/C: Include unrelated or incorrect terms (e.g., Peer-to-Peer).

\* "Three-tier architecture comprises Client, Application Server, and Database Server, decentralizing functions for scalability" (Module: Network Architectures, Section: Tiered Architectures).

### NEW QUESTION # 234

You want to use PGP files for steganography. Which of the following tools will you use to accomplish the task?

- A. Snow
- B. Blindside
- C. ImageHide
- **D. Stealth**

**Answer: D**

### NEW QUESTION # 235
