

CheckPoint 156-536 Valid Exam Syllabus, 156-536 Updated CBT

What's more, part of that ExamsReviews 156-536 dumps now are free: https://drive.google.com/open?id=1vaKag9ftR3-GpmswUNq-YbO12L_E34VN

There are three versions of our 156-536 study materials so that you can choose the right version for your exam preparation. The test engine is a way of exam simulation that makes you feel the atmosphere of 156-536 Real Exam. It brings great convenience for most IT workers because it allows candidates to practice 156-536 exam prep anytime and anywhere as long as you download the 156-536 dumps pdf.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.
Topic 2	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.
Topic 3	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.

156-536 Updated CBT - 156-536 Reliable Test Simulator

To ensure your success, you require CheckPoint 156-536 Exam Questions that provide comprehensive and relevant information for a fully prepared approach to the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam. While numerous online guides offer 156-536 Exam Questions, caution is necessary to avoid falling victim to online scams. Trust ExamsReviews for the ultimate preparation experience with their Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam questions.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q69-Q74):

NEW QUESTION # 69

You're going to prepare a Deployment Scenario of an Endpoint Security Client on a Windows machine in an On-Prem environment. You choose one of two basic deployments - which is typical for a local deployment?

- A. Agent (Initial Client) package only
- B. Agent (free Client) package only
- C. Agent-less (no Client) and Software Blades packages
- **D. Agent (Initial Client) and Software Blades packages**

Answer: D

NEW QUESTION # 70

Why is it critical to change the default Agent Uninstall Password?

- A. All passwords and critical data are protected by Full Disk Encryption. The Endpoint agent supports pre- boot authentication so nobody can bypass the agent's security.
- **B. The default password used is easy to guess.**
- C. There is no need to change it because only the local PC administrator can uninstall the agent.
- D. You have to change the default Agent Uninstall Password because if you do not, it will be easy for a malware to uninstall the agent itself.

Answer: B

NEW QUESTION # 71

Which User Roles are on the Endpoint Security Management Server for On-Premises servers?

- **A. Admin and Read-Only**
- B. Super Admin, Primary Administrator, User Admin, Read-Only
- C. Super Admin, Read-Write All, Read-Only
- D. Primary Administrator and Read-Only

Answer: A

Explanation:

On-premises servers have only two user roles: "Admin" & "Read-only".

These are the roles:

Admin - Full Read & Write access to all system aspects.

Read-Only User - Has access to all system aspects, but cannot make any changes.

NEW QUESTION # 72

What is the default encryption algorithm in the Full Disk Encryption tab under Advanced Settings?

- **A. XTS-AES 256 bit**
- B. AES-CBC 128 bit
- C. AES-CBC 256 bit
- D. XTS-AES 128 bit

Answer: A

NEW QUESTION # 73

External Policy Servers are placed between the Endpoint clients and the Endpoint Security Management Server. What benefit does the External Endpoint Policy Server bring?

- A. Heartbeat and synchronization requests
- B. Test packet and delta requests
- C. Cluster and Delta requests
- D. Polling beat and delta requests

Answer: A

Explanation:

External Endpoint Policy Servers (EPS) are optional components in Harmony Endpoint's architecture, designed to enhance scalability and performance by offloading client communication tasks from the Endpoint Security Management Server (EMS). The CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf explicitly outlines their benefits.

On page 25, under "Optional Endpoint Security Elements," the guide states:

"The Endpoint Policy Server handles heartbeat and synchronization requests, Policy downloads, Anti-Malware updates, and Endpoint Security client logs." This extract confirms that a primary benefit of the EPS is managing heartbeat and synchronization requests.

Heartbeat requests are periodic signals from clients to report status and connectivity, while synchronization ensures clients remain aligned with server policies and updates. By handling these, the EPS reduces the load on the EMS and optimizes bandwidth, directly supporting Option B.

Let's assess the other options:

* Option A: Cluster and Delta requests- "Cluster" is unrelated to EPS functionality (it may pertain to HA), and "Delta requests" is not a defined term in the guide.

* Option C: Test packet and delta requests- "Test packet" is not mentioned in the documentation, and "delta requests" lacks context, making this incorrect.

* Option D: Polling beat and delta requests- "Polling beat" is not a recognized term (likely a misnomer for heartbeat), and "delta requests" is unsupported by the text.

Option B is the only choice directly supported by the documentation, accurately reflecting the EPS's role in improving communication efficiency.
