Passing C_S4PM_2504 Score Feedback & C_S4PM_2504 Exam Passing Score

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our C_S4PM_2504 practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our C_S4PM_2504 practice materials. We would like to take this opportunity and offer you a best C_S4PM_2504 practice material as our strongest items as follows.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q69-Q74):

NEW QUESTION # 69

Why must you schedule product upgrade windows when implementing SAP S/4HANA Cloud Public Edition?

- A. To synchronize data between test and production instances
- B. To plan marketing campaigns around new releases
- C. To schedule downtime for system maintenance
- D. To align with semi-annual innovation cycles

Answer: D

NEW QUESTION # 70

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Business role permission requirements
- B. Known integration requirements
- C. Target customer go-live date
- D. SAP Fiori application extensions

Answer: B,C

Explanation:

The Digital Discovery Assessment (DDA) is a tool used during the Discover phase of the SAP Activate methodology to evaluate a customer's requirements and align them with SAP S/4HANA Cloud Public Edition capabilities. It captures critical information to plan the implementation.

* Option A: Business role permission requirements Incorrect. Business role permission requirements are typically defined during the

Explore phase, particularly in Fit-to-Standard workshops, where roles are mapped to business processes. The DDA focuses on high-level requirements, not granular permissions. The SAP Activate Methodology Guide states, "The Digital Discovery Assessment captures strategic and functional requirements, not detailed role-based permissions."

* Option B: Target customer go-live date Correct. The DDA includes the target go-live date as part of the project planning and timeline establishment. According to the SAP S/4HANA Cloud Implementation Guide, "The Digital Discovery Assessment collects key project parameters, including the planned go-live date, to align implementation activities with customer expectations."

* Option C: SAP Fiori application extensions Incorrect. SAP Fiori application extensions are identified during the Explore or Realize phases when customization and extensibility needs are analyzed. The DDA does not focus on specific extensions. The SAP Activate Methodology notes, "Extensibility requirements are documented post-DDA, during Fit-to-Standard or configuration phases."

* Option D: Known integration requirements Correct. The DDA captures known integration requirements to identify systems and processes that need to connect with SAP S/4HANA Cloud. The SAP S/4HANA Cloud Public Edition Study Guide explains, "The Digital Discovery Assessment includes a section for integration requirements to ensure that all necessary interfaces are planned for in the implementation roadmap." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>): "The Digital Discovery Assessment is a structured questionnaire that gathers information on business processes, integration needs, and project timelines, including the target go-live date."

* SAP Activate Methodology Guide: "During the Discover phase, the Digital Discovery Assessment helps customers articulate their integration requirements and establish key milestones, such as the go-live date, to guide the implementation." Additional Context: The DDA is a critical accelerator in the SAP Activate methodology, ensuring that the implementation is aligned with the customer's strategic goals. By capturing the go-live date and integration requirements, it sets the foundation for scoping and planning in subsequent phases.
