

# CT-AI Exam Online & New CT-AI Exam Format

2025 Latest PDFTorrent CT-AI PDF Dumps and CT-AI Exam Engine Free Share: <https://drive.google.com/open?id=1svvgqKmrBgmqOeyiBFbnOw3RITrYKims>

You have tried all kinds of exam questions when others are still looking around for CT-AI exam materials, which means you have stayed one step ahead of other IT exam candidates. CT-AI Exam software provided by our PDFTorrent consists of full exam resources will offer you a simulation of the real exam atmosphere of CT-AI.

## ISTQB CT-AI Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Methods and Techniques for the Testing of AI-Based Systems: In this section, the focus is on explaining how the testing of ML systems can help prevent adversarial attacks and data poisoning.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Quality Characteristics for AI-Based Systems: This section covers topics covered how to explain the importance of flexibility and adaptability as characteristics of AI-based systems and describes the vitality of managing evolution for AI-based systems. It also covers how to recall the characteristics that make it difficult to use AI-based systems in safety-related applications.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>ML Functional Performance Metrics: In this section, the topics covered include how to calculate the ML functional performance metrics from a given set of confusion matrices.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>ML: Data: This section of the exam covers explaining the activities and challenges related to data preparation. It also covers how to test datasets create an ML model and recognize how poor data quality can cause problems with the resultant ML model.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>systems from those required for conventional systems.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Neural Networks and Testing: This section of the exam covers defining the structure and function of a neural network including a DNN and the different coverage measures for neural networks.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Test Environments for AI-Based Systems: This section is about factors that differentiate the test environments for AI-based</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Testing AI-Specific Quality Characteristics: In this section, the topics covered are about the challenges in testing created by the self-learning of AI-based systems.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Introduction to AI: This exam section covers topics such as the AI effect and how it influences the definition of AI. It covers how to distinguish between narrow AI, general AI, and super AI; moreover, the topics covered include describing how standards apply to AI-based systems.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Using AI for Testing: In this section, the exam topics cover categorizing the AI technologies used in software testing.</li> </ul>

- Testing AI-Based Systems Overview: In this section, focus is given to how system specifications for AI-based systems can create challenges in testing and explain automation bias and how this affects testing.

## 2026 ISTQB CT-AI: Certified Tester AI Testing Exam First-grade Exam Online

You will receive CT-AI exam materials immediately after your payment is successful, and then, you can use CT-AI test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover CT-AI study braindumps, they will definitely want to seize the time to learn. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with CT-AI Exam Materials, there is no way for you to waste time. The sooner you download and use CT-AI study braindumps, the sooner you get the certificate.

### ISTQB Certified Tester AI Testing Exam Sample Questions (Q77-Q82):

#### NEW QUESTION # 77

A mobile app start-up company is implementing an AI-based chat assistant for e-commerce customers. In the process of planning the testing, the team realizes that the specifications are insufficient.

Which testing approach should be used to test this system?

- A. Static analysis
- B. Equivalence partitioning
- C. State transition testing
- D. Exploratory testing

**Answer: D**

#### NEW QUESTION # 78

Which ONE of the following tests is LEAST likely to be performed during the ML model testing phase?

SELECT ONE OPTION

- A. Testing the speed of the training of the model.
- B. Testing the speed of the prediction by the model.
- C. Testing the API of the service powered by the ML model.
- D. Testing the accuracy of the classification model.

**Answer: A**

Explanation:

The question asks which test is least likely to be performed during the ML model testing phase. Let's consider each option:

\* Testing the accuracy of the classification model (A): Accuracy testing is a fundamental part of the ML model testing phase. It ensures that the model correctly classifies the data as intended and meets the required performance metrics.

\* Testing the API of the service powered by the ML model (B): Testing the API is crucial, especially if the ML model is deployed as part of a service. This ensures that the service integrates well with other systems and that the API performs as expected.

\* Testing the speed of the training of the model (C): This is least likely to be part of the ML model testing phase. The speed of training is more relevant during the development phase when optimizing and tuning the model. During testing, the focus is more on the model's performance and behavior rather than how quickly it was trained.

\* Testing the speed of the prediction by the model (D): Testing the speed of prediction is important to ensure that the model meets performance requirements in a production environment, especially for real-time applications.

:

ISTQB CT-AI Syllabus Section 3.2 on ML Workflow and Section 5 on ML Functional Performance Metrics discuss the focus of testing during the model testing phase, which includes accuracy and prediction speed but not the training speed.

### NEW QUESTION # 79

You have access to the training data that was used to train an AI-based system. You can review this information and use it as a guideline when creating your tests. What type of characteristic is this?

- A. Autonomy
- **B. Transparency**
- C. Explorability
- D. Accessibility

**Answer: B**

Explanation:

AI-based systems can sometimes behave like black boxes, where the internal decision-making process is unclear. Transparency refers to the ability to inspect and understand the training data, algorithms, and decision-making process of the AI system.

\* Transparency ensures that testers and stakeholders can review how an AI system was trained.

\* Access to training data is a key factor in transparency because it allows testers to analyze biases, completeness, and representativeness of the dataset.

\* Transparency is an essential characteristic of explainable AI (XAI).

\* Having access to training data means that testers can investigate how data influences AI behavior.

\* Regulatory and ethical AI guidelines emphasize transparency.

\* Many AI ethics frameworks, such as GDPR and Trustworthy AI guidelines, recommend transparency to ensure fair and explainable AI decision-making.

\* (A) Autonomy#

\* Autonomy refers to an AI system's ability to make decisions independently without human intervention. However, having access to training data does not relate to autonomy, which is more about self-learning and decision-making without human control.

\* (B) Explorability#

\* Explorability refers to the ability to test AI systems interactively to understand their behavior, but it does not directly relate to accessing training data.

\* (D) Accessibility#

\* Accessibility refers to the ease with which people can use the system, not the ability to inspect the training data.

\* Transparency is the ease with which the training data and algorithm used to generate a model can be understood. "Transparency: This is considered to be the ease with which the algorithm and training data used to generate the model can be determined." Why is Option C Correct? Why Other Options are Incorrect? References from ISTQB Certified Tester AI Testing Study Guide Thus, option C is the correct answer, as transparency involves access to training data, allowing testers to understand AI decision-making processes.

### NEW QUESTION # 80

Which ONE of the following options is the MOST APPROPRIATE stage of the ML workflow to set model and algorithm hyperparameters?

SELECT ONE OPTION

- A. Deploying the model
- B. Data testing
- **C. Tuning the model**
- D. Evaluating the model

**Answer: C**

Explanation:

Setting model and algorithm hyperparameters is an essential step in the machine learning workflow, primarily occurring during the tuning phase.

\* Evaluating the model (A): This stage involves assessing the model's performance using metrics and does not typically include the setting of hyperparameters.

\* Deploying the model (B): Deployment is the stage where the model is put into production and used in real-world applications. Hyperparameters should already be set before this stage.

\* Tuning the model (C): This is the correct stage where hyperparameters are set. Tuning involves adjusting the hyperparameters to optimize the model's performance.

\* Data testing (D): Data testing involves ensuring the quality and integrity of the data used for training and testing the model. It does not include setting hyperparameters.

Hence, the most appropriate stage of the ML workflow to set model and algorithm hyperparameters is C.

Tuning the model.

:

ISTQB CT-AI Syllabus Section 3.2 on the ML Workflow outlines the different stages of the ML process, including the tuning phase where hyperparameters are set.

Sample Exam Questions document, Question #31 specifically addresses the stage in the ML workflow where hyperparameters are configured.

### NEW QUESTION # 81

You are testing an autonomous vehicle which uses AI to determine proper driving actions and responses. You have evaluated the parameters and combinations to be tested and have determined that there are too many to test in the time allowed. It has been suggested that you use pairwise testing to limit the parameters. Given the complexity of the software under test, what is likely the outcome from using pairwise testing?

- A. While the number of tests needed can be reduced, there may still be a large enough set of tests that automation will be required to execute all of them
- B. Pairwise cannot be applied to this problem because there is AI involved and the evolving values may result in unexpected results that cannot be verified
- C. The number of parameters to test can be reduced to less than a dozen
- D. All high priority defects will be identified using this method

**Answer: A**

Explanation:

The syllabus states that while pairwise testing is effective at finding defects by reducing the number of test cases needed, the resulting test suite can still be extensive and require automation:

"Even the use of pairwise testing can result in extensive test suites... automation and virtual test environments often become necessary to allow the required tests to be run." (Reference: ISTQB CT-AI Syllabus v1.0, Section 9.2, Page 67 of 99)

### NEW QUESTION # 82

.....

The free demos of our CT-AI study materials show our self-confidence and actual strength about study materials in our company. Besides, our company's website purchase process holds security guarantee, so you needn't be anxious about download and install our CT-AI Exam Questions. With our company employees sending the link to customers, we ensure the safety of our CT-AI guide braindumps that have no virus.

**New CT-AI Exam Format:** <https://www.pdf torrent.com/CT-AI-exam-prep-dumps.html>
