Cisco Designing Cisco Enterprise Networks Sample Questions (Q323-Q328):

NEW QUESTION # 323

Drag and drop the characteristics from the left onto the Yang model they describe on the right.

Select and Place:

independent of the underlying operating system

specific to the underlying operating system

vendor neutral

provided by the vendor for device management

Open Model

Native Model

Answer:

Explanation:

independent of the underlying operating system

specific to the underlying operating system

vendor neutral

provided by the vendor for device management

Open Model

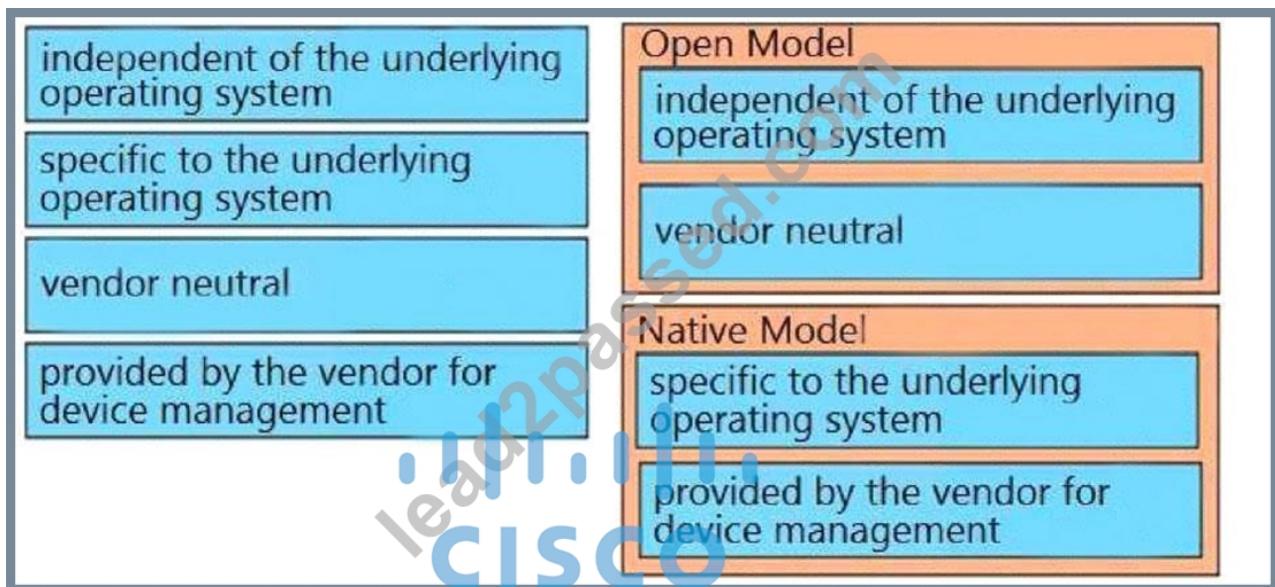

independent of the underlying operating system

vendor neutral

Native Model

specific to the underlying operating system

provided by the vendor for device management

NEW QUESTION # 324

A router running ISIS is showing high CPU and bandwidth utilization. An engineer discovers that the router is configured as L1/L2 and has L1 and L2 neighbors. Which step optimizes the design to address the issue?

- A. Make this router a DIS for each of the interfaces
- **B. Configure each interface as either L1 or L2 circuit type**
- C. Disable the default behavior of advertising the default route on the L1/L2 router
- D. Configure the router to be either L1 or L2

Answer: B

Explanation:

Section: Advanced Addressing and Routing Solutions

Explanation/Reference:

NEW QUESTION # 325

Refer to the exhibit.

An architect is designing a network for a customer supporting a Wake-on-LAN application. Which solution must the architect choose?

- A. spanning-tree uplinkfast on SW1
- B. IP directed-broadcasts on R1
- **C. IP directed-broadcasts on R2**
- D. spanning-tree uplinkfast on SW2

Answer: C

Explanation:

"IP directed broadcast" must be supported on the last router to the destination subnet. Since the sleeping PC's don't have IP addresses, the machines must be called awake by broadcast that behaves like an unicast until they reach the destination network. There the directed broadcast is handled like a proper broadcast to wake all WOL machines.

NEW QUESTION # 326

Refer to the exhibit. A customer is planning to deploy a new branch in New York. The new office will not exceed 1024 users. Which subnet must be used to provide maximum number of host addresses while not providing more than necessary?

- A. 192.168.16.0/21
- B. 192.168.8.0/22
- C. 192.168.16.0/22
- D. 192.168.8.0/21

Answer: A

NEW QUESTION # 327

An engineer is designing a QoS policy that queues excess packets for later transmission. Which mechanism must be included in the design?

- A. policing
- B. RED
- C. shaping
- D. WRED

Answer: C

NEW QUESTION # 328

Do you want to double your salary in a short time? Yes, it is not a dream. Our 300-420 latest study guide can help you. IT field is becoming competitive; a Cisco certification can help you do that. If you get a certification with our 300-420 latest study guide, maybe your career will change.
