NEW QUESTION # 36

You have three Microsoft Entra tenants named Tenant1, Tenant2, and Tenant3.

You have three Azure subscriptions named Sub1, Sub2, and Sub3. Each tenant is associated with multiple Azure subscriptions.

Each subscription contains a single Microsoft Sentinel workspace as shown in the following table.

Name	Subscription	Associated tenant
Sentinel1	Sub1	Tenant1
Sentinel2	Sub2	Tenant2
Sentinel3	Sub3	Tenant3

You need to recommend a solution that meets the following requirements:

- * Ensures that the users in Tenant1 can manage the resources in Sub2 and Sub3 without having to switch subscriptions or sign in to a different tenant

- * Implements multiple workspace view for Sentinel2 and Sentinel3

What should you use to delegate permissions, and which Microsoft Sentinel feature will users be able to manage in multiple workspace view? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Explanation:

☐

NEW QUESTION # 37

You are designing security for a runbook in an Azure Automation account. The runbook will copy data to Azure Data Lake Storage Gen2.

You need to recommend a solution to secure the components of the copy process.

What should you include in the recommendation for each component? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

Data Security = Access Keys stored in Azure Key Vault

Network access control = Azure Private Link with network service tags

NEW QUESTION # 38

You plan to automate the development and deployment of a Nodejs-based app by using GitHub.

You need to recommend a DevSecOps solution for the app. The solution must meet the following requirements:

- * Automate the generation of pull requests that remediate identified vulnerabilities.
- * Automate vulnerability code scanning for public and private repositories.
- * Minimize administrative effort.
- * Minimize costs.

What should you recommend using? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

☐

NEW QUESTION # 39

Case Study 2 - Litware, inc.

Overview

Litware, Inc. is a financial services company that has main offices in New York and San Francisco. Litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.

Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.

Existing Environment

Litware has a Microsoft Entra tenant that syncs with an Active Directory Domain Services (AD DS) forest named litware.com and is linked to 20 Azure subscriptions. Microsoft Entra Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses.

The environment also includes several AD DS forests, Microsoft Entra tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.

Requirements. Planned Changes

Litware plans to implement the following changes:

- Create a management group hierarchy for each Microsoft Entra tenant.
- Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
- Implement Microsoft Entra Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

Requirements. Business Requirements

Litware identifies the following business requirements:

- Minimize any additional on-premises infrastructure.
- Minimize the operational costs associated with administrative overhead.

Requirements. Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

- Enable the management of on-premises resources from Azure, including the following:
 - o Use Azure Policy for enforcement and compliance evaluation.
 - o Provide change tracking and asset inventory.
 - o Implement patch management.
- Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.

Requirements. Microsoft Sentinel Requirements

Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAR) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOC) by using Microsoft Sentinel.

Requirements. Identity Requirements

Litware identifies the following identity requirements:

- Detect brute force attacks that directly target AD DS user accounts.
- Implement leaked credential detection in the Microsoft Entra tenant of Litware.
- Prevent AD DS user accounts from being locked out by brute force attacks that target Microsoft Entra user accounts.
- Implement delegated management of users and groups in the Microsoft Entra tenant of Litware, including support for:
 - o The management of group properties, membership, and licensing
 - o The management of user properties, passwords, and licensing
 - o The delegation of user management based on business units

Requirements. Regulatory Compliance Requirements

Litware identifies the following regulatory compliance requirements:

- Ensure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
- Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
- Use the principle of least privilege.

Requirements. Azure Landing Zone Requirements

Litware identifies the following landing zone requirements:

- Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
- Provide a secure score scoped to the landing zone.
- Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
- Minimize the possibility of data exfiltration.
- Maximize network bandwidth.

The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.

Each landing zone will have the following characteristics:

- Be created in a dedicated subscription.
- Use a DNS namespace of litware.com.

Requirements. Application Security Requirements

Litware identifies the following application security requirements:

- Identify internal applications that will support single sign-on (SSO) by using Microsoft Entra Application Proxy.
- Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

Hotspot Question

You need to recommend an identity security solution for the Microsoft Entra tenant of Litware.

The solution must meet the identity requirements and the regulatory compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

Box 1: Microsoft Entra administrative units

Implement delegated management of users and groups in the Microsoft Entra tenant of Litware, including support for:

* The delegation of user management based on business units

Without Microsoft Entra administrative units, assigning a user to the User Administrator role in Microsoft Entra ID gives them rights to manage all Microsoft Entra users. With administrative units, the user is delegated the same role, User Administrator, but that role only applies to the specified administrative unit. The administrative unit contains the users and groups that are under the scope of management.

Box 2: Enable password hash synchronization in the Microsoft Entra Connect deployment Existing environment: Microsoft Entra Connect is used to implement pass-through authentication.
