AZ-400 Valid Exam Questions | PDF AZ-400 Cram Exam

2026 Latest ValidDumps AZ-400 PDF Dumps and AZ-400 Exam Engine Free Share: https://drive.google.com/open?id=1VSoME3KnuJtsWfH_7lnXJcV-TQnmFV-Q

After our unremitting efforts, AZ-400 learning guide comes in everybody's expectation. Our professional experts not only have simplified the content and grasp the key points for our customers, but also recompiled the AZ-400 preparation materials into simple language so that all of our customers can understand easily no matter which countries they are from. In such a way, you will get a leisure study experience as well as a doomed success on your coming AZ-400 Exam.

Microsoft AZ-400 certification exam is a valuable credential for professionals in the DevOps field. It validates the candidate's knowledge and skills in designing and implementing Microsoft DevOps solutions and can open up new career opportunities. With the growing demand for DevOps professionals, earning the AZ-400 certification can help individuals stand out in the job market and advance their careers.

To pass the AZ-400 Exam, candidates need to have a deep understanding of DevOps principles, tools, and practices. They should be able to design and implement DevOps solutions that meet business requirements and improve software quality. They should also be able to troubleshoot and optimize DevOps pipelines, and ensure that they are secure, scalable, and reliable.

The AZ-400 exam questions are designed and verified by experienced and certified AZ-400 Exam trainers. They work collectively and put all their efforts, experience, and knowledge and ensure the top standard of AZ-400 exam questions all the time.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q34-Q39):

NEW QUESTION # 34
You are automating the build process for a Java-based application by using Azure DevOps.
You need to add code coverage testing and publish the outcomes to the pipeline.
What should you use?

- A. MSTest
- B. Bullseye Coverage
- C. Coverlet
- D. NUnit
- E. Cobertura
- F. Coverage.py

Answer: E

Explanation:
Explanation/Reference:
Explanation:
Use Publish Code Coverage Results task in a build pipeline to publish code coverage results to Azure Pipelines or TFS, which were produced by a build in Cobertura or JaCoCo format.

https://docs.microsoft.com/en-us/azure/devops/pipelines/tasks/test/publish-code-coverage-results

NEW QUESTION # 35
You have a GitHub repository that contains workflows. The workflows contain steps that execute predefined actions. Each action has one or more versions.
You need to request the specific version of an action to execute.
Which three attributes can you use to identify the version? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. the branch
- B. the runner
- C. the serial
- D. the SHA-based hashes
- E. the tag

Answer: A,D,E

Explanation:
Explanation
https://docs.github.com/en/actions/using-workflows/workflow-syntax-for-github-actions
"We strongly recommend that you include the version of the action you are using by specifying a Git ref, SHA, or Docker tag. If you don't specify a version, it could break your workflows or cause unexpected behavior when the action owner publishes an update. Using the commit SHA of a released action version is the safest for stability and security. If the action publishes major version tags, you should expect to receive critical fixes and security patches while still retaining compatibility. Note that this behavior is at the discretion of the action's author. Using the default branch of an action may be convenient, but if someone releases a new major version with a breaking change, your workflow could break."

NEW QUESTION # 36
You have an Azure subscription.
You have the standards shown in the following table.
You plan to use Azure Pipelines to build and release web apps.
You need to recommend a solution to build the pipelines. The solution must meet the following requirements:
* Ensure that all new pipelines meet the security requirements defined in Standards
* Ensure that the first stage of all new pipelines contains the software prerequisites defined in Standard2.
* Minimize administrative effort.
What should you use to implement each standard? To answer, drag the appropriate options to the correct standards. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Eachcorrect selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 37
You have an Azure Pipelines pipeline that has the following definition.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 38
You need to create a notification if the peak averageresponse time of an Azure web app named az400-
9940427-main is more than five seconds when evaluated during a five-minute period. The notification must trigger the
"https://contoso.com/notify" webhook.
To complete this task, sign in to the Microsoft Azureportal.

Answer:

Explanation:
See explanation below
Explanation:
1. Open Microsoft Azure Portal
2. Log into your Azure account and go to App Service and look under Monitoring then you will see Alert.
3. Select Add an alert rule
4. Configure the alert rule as per belowand click Ok.
Source: Alert on Metrics
Resource Group: az400-9940427-main
Resource: az400-9940427-main
Threshold: 5
Period: Over the last 5 minutes
Webhook: https://contoso.com/notify
