Our website is very secure and regular platform, you can be assured to download the version of our CITM study torrent.

EXIN EPI Certified Information Technology Manager Sample Questions (Q20-Q25):

NEW QUESTION # 20

The new system (application) is ready for adoption (implementation). The customer is concerned that an instant change-over from the current system to the new system will create a large impact on the user base.

You are requested to propose an approach for adoption. Which of the items listed below is recommended?

- A. Coordinated
- B. Big bang
- **C. Parallel**
- D. Phased

Answer: C

Explanation:

When implementing a new system, the customer's concern about a large impact on the user base suggests the need for a low-risk, controlled adoption strategy. In application management, the parallel adoption approach (B) involves running both the old and new systems simultaneously for a period, allowing users to transition gradually while ensuring the new system functions correctly. This minimizes disruption, as the old system remains operational as a fallback if issues arise with the new system.

* Big bang (A): This approach involves switching entirely to the new system at once, which is high-risk and likely to cause significant disruption, especially for a concerned user base. It's unsuitable here due to the potential for widespread impact.

* Coordinated (C): This is not a standard term in application deployment strategies. It may imply a managed transition but lacks the specificity of parallel or phased approaches.

* Phased (D): This involves rolling out the new system incrementally (e.g., by department or module), which reduces risk but doesn't provide the same level of safety as parallel, where both systems run concurrently to ensure continuity.

The parallel approach is ideal for mitigating risks during a critical system transition, as it allows validation of the new system's performance while maintaining business continuity. According to ITIL or SDLC frameworks, parallel adoption is often recommended for mission-critical systems to ensure stability and user acceptance.

Reference: EPI CITM study guide, under Application Management, likely discusses system implementation strategies within the Software Development Life Cycle (SDLC) or ITIL's service asset and configuration management. Refer to sections on application deployment, transition planning, or change management for details on parallel adoption.

NEW QUESTION # 21

Little to no budget is available for hiring new staff for the IT service desk. What is the ideal method of sourcing knowing that little time is available?

- A. Internal IT staff based on a SWOT analysis
- B. Recruitment agency
- C. Word of mouth
- **D. Internet job board**

Answer: D

Explanation:

Given the constraints of little to no budget and limited time, internet job boards are the ideal sourcing method. They are cost-effective (often free or low-cost), allow quick posting of job openings, and reach a wide pool of candidates, enabling rapid hiring.

Word of mouth (A) is informal and may not yield qualified candidates quickly. Internal IT staff based on SWOT analysis (B) is not a standard recruitment method and takes time to analyze. Recruitment agencies (D) are expensive and slower due to their processes, making them unsuitable for low-budget, urgent hiring.

Reference: EPI CITM study guide, under IT Organization, likely discusses recruitment strategies for IT staff, emphasizing cost-effective methods like job boards. Check sections on human resource management or staffing.

NEW QUESTION # 22

The team responsible for network security has proposed a firewall as the preferred control for the network perimeter. How is this type of control categorized?

- A. Physical detective control
- B. Administrative deterrent control
- **C. Technical preventive control**
- D. Physical corrective control

Answer: C

Explanation:

A firewall is categorized as a technical preventive control (A) in information security management.

According to ISO/IEC 27001, preventive controls aim to stop security incidents before they occur, and technical controls involve technology-based solutions. A firewall prevents unauthorized access to the network perimeter by filtering traffic, making it a technical preventive control.

* Physical detective control (B): Involves physical measures (e.g., cameras) to detect incidents, not applicable to firewalls.

* Administrative deterrent control (C): Involves policies or procedures to discourage violations, not technology-based.

* Physical corrective control (D): Addresses physical issues post-incident, not relevant to firewalls.

Reference: EPI CITM study guide, under Information Security Management, likely references ISO/IEC

27001's control categories, emphasizing technical preventive controls. Check sections on security controls or network security.

NEW QUESTION # 23

A customer survey needs to be designed. What is the most important factor for success?

- A. Use a rating scale only
- B. Make use of leading and loaded questions
- **C. Relevant questions to meet the objective**
- D. Minimum duration to complete

Answer: C

Explanation:

The most important factor for a successful customer survey in service management is relevant questions to meet the objective (A).

According to ITIL's continual service improvement (CSI), surveys must be designed with questions that align with the survey's goals (e.g., assessing service quality or customer satisfaction) to gather meaningful data for actionable improvements.

* Use a rating scale only (B): Restricting to rating scales limits question variety and may not capture qualitative insights.

* Leading and loaded questions (C): These bias responses, reducing survey validity.

* Minimum duration (D): While brevity is important, relevance of questions is critical for achieving the survey's purpose.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's CSI framework for survey design. Check sections on customer feedback or service improvement.

NEW QUESTION # 24

The project brief/project charter is created. Which of the following is not part of it?

- A. Quality expectations
- **B. Detailed planning**
- C. Summary budget
- D. High-level risk

Answer: B

Explanation:

The project charter (or project brief) is a high-level document created during the initiation phase of a project, as defined by PMBOK (Project Management Body of Knowledge). It outlines the project's purpose, objectives, scope, and key elements but does not include detailed planning (A), which occurs during the planning phase after the charter is approved. The charter typically includes:

* High-level risks (B): Identifies major risks to provide early awareness.

* Summary budget (C): Provides an initial cost estimate for approval.

* Quality expectations (D): Defines high-level quality requirements or standards.

Detailed planning, such as creating a detailed Work Breakdown Structure (WBS) or schedule, is part of the project management plan developed later, not the charter.

Reference: EPI CITM study guide, under Project Management, likely references PMBOK's project initiation processes, detailing the components of a project charter. Refer to sections on project initiation or project charter development.

NEW QUESTION # 25

.....

We provide free update to the client and the discounts to the old client. We provide free update of our CITM exam materials within one year and after one year the client can enjoy the 50% discounts. The old clients enjoy some certain discounts when they buy our CITM exam torrent. Our experts check whether there is the update of the test bank every day and if there is the system will send to the client automatically. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important CITM Exam Torrent in the shortest time and finally pass the exam successfully.

CITM Exam Brain Dumps: <https://www.realexamfree.com/CITM-real-exam-dumps.html>

To make customers know CITM real exam questions better, we put CITM free demos in the product page. If you are eager to look for CITM test preparation files, we should be wise option for you, EXIN Reliable CITM Exam Simulations. Our company aims to help all candidates pass exam at the first attempt, EXIN Reliable CITM Exam Simulations. Unlike other vendors, they often send the

exam dumps to the customers within 24h.

Applying more than one effect is simply a matter of linking one effect Reliable CITM Exam Simulations to another, It's a way to measure the traffic to your website and then find out what visitors are doing during their visits.

Unparalleled CITM Training Quiz: EXIN EPI Certified Information Technology Manager Carry You Outstanding Exam Dumps - RealExamFree

To make customers know CITM Real Exam Questions better, we put CITM free demos in the product page, If you are eager to look for CITM test preparation files, we should be wise option for you.
