Three Easy and User-Friendly Pass4guide CompTIA 220-1202 Exam Question Formats

I know your time is very valuable. We guarantee that you can download our products 220-1202 exam questions immediately after payment is successful. After your current page shows that the payment was successful, you can open your e-mail address to receive our 220-1202 Study Materials. And you can find that you can get 220-1202 learning guide only in 5 to 10 minutes. It is very fast and easy. And our 220-1202 practice engine is auto installed, so you don't have to do more work.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q86-Q91):

NEW QUESTION # 86

Which of the following would an administrator most likely use to automate a repetitive task via a Linux command line?

- A. Shell script
- B. JavaScript file
- C. Visual Basic utilities
- D. Batch file

Answer: A

Explanation:

A shell script is commonly used in Linux to automate repetitive tasks by executing a sequence of commands directly from the command line.

NEW QUESTION # 87

Various alerts on a user's Windows 11 laptop are continually interrupting videoconference calls. Which of the following should a support technician recommend to best solve the issue?

- A. Use multiple sound output devices for the various source applications
- B. Configure the Sounds option in Control Panel to be set to No Sounds
- C. Set Windows Notifications settings to Do Not Disturb
- D. Disable all notifications in different applications in the order they appear

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Do Not Disturb setting in Windows Notification settings allows users to suppress all notification banners and sounds during presentations or video calls.

From Travis Everett - All-in-One Exam Guide:

"Use Windows 'Do Not Disturb' to prevent notifications from interrupting full-screen apps like video conferencing."

NEW QUESTION # 88

Which of the following are system folders on macOS? (Select two)

- A. Applications
- B. Time Machine
- C. FileVault
- D. iCloud
- E. Library
- F. Spotlight

Answer: A,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Applications and Library are core system directories in macOS. The Applications folder contains installed applications.

The Library folder contains support files, preferences, and other system-related files.

From the Quentin Docter - CompTIA A+ Complete Study Guide:

"macOS organizes system and user files into several key folders. Among them, Applications and Library are standard system folders where apps and related files are stored."

NEW QUESTION # 89

A technician needs to configure laptops so that only administrators can enable virtualization technology if needed. Which of the following should the technician configure?

- A. Guest account
- **B. BIOS password**
- C. AutoRun setting
- D. Screen lock

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Virtualization settings are typically found within the BIOS/UEFI firmware configuration. To prevent unauthorized users from changing these settings, the technician should set a BIOS password. This ensures only administrators with the password can access or modify BIOS settings, including virtualization support.

B: The guest account is a user-level feature in Windows and doesn't control BIOS access.

C: A screen lock prevents casual access to the desktop but doesn't protect firmware settings.

D: AutoRun controls how media and devices behave when inserted - unrelated to BIOS security.

Reference:

CompTIA A+ 220-1102 Objective 2.2: Compare and contrast security measures and administrative controls.

Study Guide Section: BIOS/UEFI settings protection - password implementation

-

NEW QUESTION # 90

A customer wants to be able to work from home but does not want to be responsible for bringing company equipment back and forth. Which of the following would allow the user to remotely access and use a Windows PC at the main office? (Choose two.)

- A. WinRM
- **B. RDP**
- C. SSH
- **D. VPN**
- E. RMM
- F. SPICE

Answer: B,D

Explanation:

RDP (Remote Desktop Protocol): Allows the user to connect to and control the Windows PC's desktop environment from home.

VPN (Virtual Private Network): Establishes a secure tunnel into the office network so the user's home device can reach the Windows PC before initiating the RDP session.

NEW QUESTION # 91

.....
