Features of MB-820 Practice Material

When prepare a exam, we may face the situation like this: there are so many books in front of me, which one should I choose for preparing for the exam? If you are ready to attend the MB-820 exam, then just choose us, our product is the one you can trust, with the experienced professionals to expect and update, the quality of the product is quite high. Furthermore, our company respect the privacy of the customers, with our product, there is no need for you to worry about the problem. Except for this, if you buy product for the MB-820 Exam, you will get the free update for one year, and money back guarantee within 60 days after you buy it, so don't hesitate, just do it.

Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.
Topic 2	<ul style="list-style-type: none"> • Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.
Topic 3	<ul style="list-style-type: none"> • Develop by using AL: How to Customize the UI experience and Use AL for business central extension is discussed here. It also delves into explaining the essential development standards.
Topic 4	<ul style="list-style-type: none"> • Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q42-Q47):

NEW QUESTION # 42

A company owns and operates hotels, restaurants, and stores.

When the staff orders materials from the purchasing department, the requests are not directed to the correct approvers.

The staff requires a new field named Approver from which they can select the appropriate approver. The field must include the following options:

- * Hotel manager
- * Restaurant manager
- * Store manager
- * Purchasing manager

You need to create the Approver field in the Item table by using an AL extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□ Explanation:

To create the Approver field in the Item table using an AL extension, perform the following actions in sequence:

- * Create an enum object named Approver and include all options.
- * Create a table extension object for an Item table with an Approver field of enum type named Approver in the fields section.
- * Create a page extension object that extends the ItemCard object. Add the field to the fields section.

Build and extend tables: To add a new field to an existing table in Business Central using AL extension, you need to define an enumeration (enum) with the possible values for the new field. Then, you create a table extension object where you add the new field and specify its type as the enum you created. This adds the field to the Item table. Finally, you modify the user interface to display the new field by creating a page extension for the Item Card page and adding the new field to it.

NEW QUESTION # 43

You need to determine if you have unwanted incoming web service calls in your tenant during the last seven days.

Which two KQL queries should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. □
- B. □
- C. □
- D. □
- E. □

Answer: A,B

Explanation:

The task is to identify unwanted incoming web service calls during the last seven days. To do this, we need to look at KQL (Kusto Query Language) queries that would filter out web service calls based on the timestamp (to ensure the calls are within the last seven days) and by certain characteristics that would indicate they are unwanted, such as the wrong type of protocol (SOAP in this case, as Contoso Ltd. plans to dismiss using it).

Looking at the options:

* Option A: This query selects all traces where the timestamp is within the last 7 days and where the custom dimension has a value of 'RT0008', and where the category is either 'ODataV4', 'ODataV3', or

'Api'. This query would show all API calls except SOAP, so it does not directly answer the question about unwanted calls.

* Option B: This query filters for traces with a timestamp within the last 7 days, where 'RT0008' is present, and specifically looks for the category 'SOAP'. This query is correct because it directly targets SOAP calls, which are the unwanted calls according to Contoso Ltd.'s plans.

* Option C: Similar to option B, this query filters for traces within the last 7 days and looks for 'RT0008' but uses the equality operator for the category 'SOAP'. This would also correctly return the unwanted SOAP calls.

* Option D: This query also filters for traces within the last 7 days, but it excludes the 'ODataV4' category, which doesn't necessarily target the unwanted SOAP calls.

* Option E: This query selects traces where the timestamp is within the last 7 days and the custom dimension has 'RT0008'.

However, it filters out categories 'ODataV4' and 'Api', which does not directly help in identifying the unwanted SOAP calls.

Therefore, the queries that should be used to determine if there are unwanted incoming web service calls (SOAP calls) in the tenant during the last seven days are Options B and C. These queries are specific to identifying SOAP protocol usage, which is what Contoso Ltd. considers unwanted.

NEW QUESTION # 44

A company plans to integrate tests with its build pipelines.

The company has two Docket sandbox environments: SandboxA and SandboxB.

You observe the following:

* SandboxA is configured without the Test Toolkit installed.

* SandboxB must be configured from scratch. The Test Toolkit must be installed in SandboxB during configuration.

You need to configure the sandbox environments.

How should you complete the cmdlets? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

NEW QUESTION # 45

You need to develop the report Subcontract Documents Excel List that is required by the control department.

You have the following code:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 46

A company owns and operates hotels, restaurants, and stores.

When the staff orders materials from the purchasing department, the requests are not directed to the correct approvers.

The staff requires a new field named Approver from which they can select the appropriate approver. The field must include the following options:

* Hotel manager

* Restaurant manager

* Store manager

* Purchasing manager

You need to create the Approver field in the Item table by using an AL extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Create an enum object named Approver and include all options.

* Reasoning: First, you must define the set of options (Hotel manager, Restaurant manager, etc.). In modern AL development, Enums are the standard way to create option sets because they are extensible.

Create a table extension object for an Item table with an Approver field of enum type named Approver in the field section.

* Reasoning: Next, you need to add the actual data field to the database. Since the "Item" table is a standard base table, you use a table extension. Tables use a fields section to define data columns. You reference the Enum created in step 1 here.

Create a page extension object that extends the Item Card object. Add the field to the layout section.

* Reasoning: Finally, to allow users to see and edit this new field on the screen, you must extend the "Item Card" page. Pages use a layout section to determine where controls appear.

NEW QUESTION # 47

.....

For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the MB-820 certification exam is the proven way to achieve these tasks quickly. Overall, we can say that with the Microsoft Dynamics 365 Business Central Developer (MB-820) exam you can gain a competitive edge in your job search and advance your career in the tech industry.
