

Microsoft AZ-120 Online Exam - Composite Test AZ-120 Price

What's more, part of that ITexamReview AZ-120 dumps now are free: <https://drive.google.com/open?id=1XSusAvfD4uMwihZvCwLmcgkWaVoFuUD->

The ITexamReview product here is better, cheaper, higher quality and unlimited for all time; kiss the days of purchasing multiple Microsoft braindumps repeatedly, or renewing AZ-120 training courses because you ran out of time. Now you can learn AZ-120 skills and theory at your own pace and anywhere you want with top of the AZ-120 braindumps, you will find it's just like a piece of cake to pass AZ-120 exam.

Exam AZ-120: Planning and Administering Microsoft Azure for SAP Workloads

Candidates for this exam should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the initial migration or integration and the long-term operation of an SAP solution on Microsoft Azure.

Responsibilities for an architect or an engineer for Azure for SAP Workloads include making recommendations on services and adjusting resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

Architects or engineers for Azure for SAP Workloads partner with cloud administrators, cloud database administrators, and clients to implement solutions.

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, Azure Marketplace, Azure Resource Manager templates (ARM templates), virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

For this exam, we strongly recommend that you have an Azure Administrator Associate or Azure Solutions Architect Expert certification, in addition to SAP certifications.

Part of the requirements for: Microsoft Certified: Azure for SAP Workloads Specialty

Composite Test AZ-120 Price | Related AZ-120 Certifications

If you buy online classes, you will need to sit in front of your computer on time at the required time; if you participate in offline counseling, you may need to take an hour or two of a bus to attend class. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by AZ-120 Exam Questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.

The Microsoft AZ-120 exam consists of multiple-choice questions and is intended to be completed within 180 minutes. Candidates must achieve a passing score of 700 out of 1000 to obtain the certification. AZ-120 exam can be taken online or at a test center and

is available in English, Japanese, Korean, and Simplified Chinese.

Microsoft AZ-120 exam is aimed at IT professionals who are responsible for planning, deploying, and managing SAP workloads on Azure. AZ-120 Exam covers a wide range of topics related to Azure infrastructure, networking, security, and data management, as well as SAP-specific topics like SAP HANA deployment, SAP system architecture, and SAP data migration. Passing AZ-120 exam demonstrates that you have the skills and knowledge needed to design and implement SAP solutions on Azure.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q211-Q216):

NEW QUESTION # 211

You are planning replication of the SAP HANA database for the disaster recovery environment in Azure. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You must use synchronous replication.	<input type="radio"/>	<input type="radio"/>
You must use delta data shipping for operation mode.	<input type="radio"/>	<input type="radio"/>
You must configure an Azure Directory (Azure AD) application to manage the failover.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You must use synchronous replication.	<input type="radio"/>	<input checked="" type="radio"/>
You must use delta data shipping for operation mode.	<input type="radio"/>	<input checked="" type="radio"/>
You must configure an Azure Directory (Azure AD) application to manage the failover.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
You must use synchronous replication.	<input type="radio"/>	<input checked="" type="radio"/>
You must use delta data shipping for operation mode.	<input type="radio"/>	<input checked="" type="radio"/>
You must configure an Azure Directory (Azure AD) application to manage the failover.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

SAP HANA Replication consists of one primary node and at least one secondary node. Changes to the data on the primary node

are replicated to the secondary node synchronously or asynchronously.

Box 2: No

Since SPS11 SAP HANA system replication can be run in two different operation modes:

delta_datashipping

logreplay

Box 3: Yes

Topic 2, Litware, inc Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it.

The network contains an Active Directory domain named litware.com. Litware has two third-party applications hosted in Azure.

Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

- * Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)

- * SAP Extended Warehouse Management (SAP EWM)

- * SAP Business Warehouse (SAP BW)

- * SAP NetWeaver Process Integration (PI)

- * SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have

20 production servers.

You have 30 non-production servers including five testing severs, five development servers, five quality assurance (QA) servers, and 15 pre=production servers.

Currently, all SAP applications are in the litware.com domain.

Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, tables eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately its 24/7 business operation.

Business Goals

Litware identifies the following business goals:

- * Increase the performance of SAP ECC application by moving to SAP HANA. All other database will remain on SQL Server.

- * Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.

- * Use the new Environment, Health and Safety (EH&S) in Recipe Management function.

- * Ensure that any migration activities can be completed within a 48-hour period during a weekend.

Planned Changes

Litware identifies the following planned changes:

- * Migrate SAP to Azure.

- * Upgrade and migrate SAP ECC to SAP business Suite on HANA Enhancement Pack 8.

Technical requirements

Litware identifies the following technical requirements:

- * Implement automated backups.
- * Support load testing during the migrate.
- * Identify opportunities to reduce costs during the migration.
- * Continue to use the Litware.com domain for all SAP landscapes.
- * Ensure that all SAP applications and databases are highly available.
- * Remove all SAP components from the on-premises network once the migrate is complete.
- * Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- * Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

NEW QUESTION # 212

You are designing the backup for an SAP database.

You have an Azure Storage account that is configured as shown in the following exhibit.

The cost of your storage account depends on the usage and the options you choose below.

[Learn more](#)

Account kind

Microsoft

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Data in the storage account is stored on [answer choice].

Backups will be replicated [answer choice].

hard disk drives (HDDs)
premium solid-state drives (SSDs)
standard solid-state drives (SSDs)

to a storage cluster in the same datacenter
to another Azure region
to another zone within the same Azure region

Microsoft

Answer:

Explanation:

Data in the storage account is stored on
[answer choice].

▼

- hard disk drives (HDDs)
- premium solid-state drives (SSDs)
- standard solid-state drives (SSDs)

Backups will be replicated
[answer choice].

▼

- to a storage cluster in the same datacenter
- to another Azure region
- to another zone within the same Azure region

NEW QUESTION # 213

You have a large and complex SAP environment on Azure.

You are designing a training landscape that will be used 10 times a year.

You need to recommend a solution to create the training landscape. The solution must meet the following requirements:

- * Minimize the effort to build the training landscape.
- * Minimize costs.

In which order should you recommend the actions be performed for the first training session? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Build the training landscape
- Create a custom image by using the snapshot
- Deliver the training
- Take a snapshot of the virtual machine disks
- Shut down and delete the virtual machines

Answer Area

← →

↑ ↓

Answer:

Explanation:

Actions

- Build the training landscape
- Create a custom image by using the snapshot
- Deliver the training
- Take a snapshot of the virtual machine disks
- Shut down and delete the virtual machines

Answer Area

Build the training landscape

Take a snapshot of the virtual machine disks

Create a custom image by using the snapshot

Deliver the training

Shut down and delete the virtual machines

↑ ↓

Explanation

Build

Snapshot

Custom Image

Deliver Training

Shutdown

NEW QUESTION # 214

You need to ensure that you can receive technical support to meet the technical requirements.

What should you deploy to Azure?

- A. SAPRouter
- **B. SAP Landscape Management (LaMa)**
- C. SAP Web Dispatcher
- D. SAP Gateway

Answer: B

Explanation:

Explanation

<https://help.sap.com/viewer/f2ad7797884249eeb2e91dc26a991196/3.0.3.0/en-US>

NEW QUESTION # 215

You need to provide the Azure administrator with the values to complete the Azure Resource Manager template.

Which values should you provide for diskCount, StorageAccountType, and domainName? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

diskCount:  ▼

0
1
2
4

storageAccountType: ▼

Premium_LRS
Standard_GRS
Standard_LRS

domainName: ▼

ad.contoso.com
ad.contoso.onmicrosoft.com
contoso.com
contoso.onmicrosoft.com

Answer:

Explanation:

diskCount:

storageAccountType:

domainName:

Explanation

diskCount:

storageAccountType:

domainName:

Box 1: 4

Scenario: the Azure Resource Manager template that will be used to provision the production application servers.

Ensure that each production application server has four 1-TB data disks.

Box 2: Standard_LRS

Scenario: Minimize costs whenever possible.

Box 3: contoso.onmicrosoft.com

The network contains an on-premises Active Directory domain named ad.contoso.com.

The Initial domain: The default domain (onmicrosoft.com) in the Azure AD Tenant. For example, contoso.onmicrosoft.com.
