P.S. Free 2026 Microsoft DP-300 dumps are available on Google Drive shared by Itcertmaster: <https://drive.google.com/open?id=14sy6LW2PIYovpRBpM2lpHef8-h3P5PP9>

We have three versions of our DP-300 certification guide, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our DP-300 exam study guide in a more handy way as you can take notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our DP-300 Guide Torrent that operate in windows system. With the online version, you can study the DP-300 guide torrent wherever you like as it can used on all kinds of electronic devices.

To become certified in Microsoft DP-300, candidates must pass the certification exam. DP-300 exam consists of multiple-choice questions and performance-based scenarios. Candidates are required to demonstrate their ability to perform tasks related to managing and administering databases on Microsoft Azure. DP-300 exam is available in multiple languages and can be taken online or in-person at a testing center.

Microsoft DP-300 (Administering Relational Databases on Microsoft Azure) certification exam is an excellent choice for IT professionals who want to validate their skills and knowledge in administering and maintaining relational databases on Microsoft Azure. With the increasing demand for cloud computing and database administration skills, achieving this certification can help you advance your career and open up new job opportunities in the IT industry.

Microsoft DP-300 Exam is designed for database administrators who want to learn how to administer and manage relational databases on Microsoft Azure. DP-300 exam is targeted towards individuals who have experience with SQL Server, Azure SQL Database, and SQL Server on Azure Virtual Machines. DP-300 exam measures the ability of candidates to perform various database administration tasks, including data security, backup and recovery, performance tuning, and monitoring.

Unparalleled Passing DP-300 Score Feedback & Leading Offer in Qualification Exams & Correct New DP-300 Test Forum

People who want to pass the exam have difficulty in choosing the suitable DP-300 study materials. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the DP-300 Study Materials from our company are best among global market. As is known to us, the DP-300 study materials from our company are the leading practice materials in this dynamic market.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q48-Q53):

NEW QUESTION # 48

You have an Azure Data Lake Storage Gen2 account named account1 that stores logs as shown in the following table.

You do not expect that the logs will be accessed during the retention periods.

You need to recommend a solution for account1 that meets the following requirements:

Automatically deletes the logs at the end of each retention period

Minimizes storage costs

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

A picture containing text Description automatically generated

Box 1: Store the infrastructure logs in the Cool access tier the application logs in the Archive access tier Hot - Optimized for storing data that is accessed frequently.

Cool - Optimized for storing data that is infrequently accessed and stored for at least 30 days.

Archive - Optimized for storing data that is rarely accessed and stored for at least 180 days with flexible latency requirements, on the order of hours.

Box 2: Azure Blob storage lifecycle management rules

Blob storage lifecycle management offers a rich, rule-based policy that you can use to transition your data to the best access tier and to expire data at the end of its lifecycle.

Reference:

<https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-storage-tiers>

NEW QUESTION # 49

You have an Azure SQL Database server named sqlsrv1 that hosts 10 Azure SQL databases.

The databases perform slower than expected.

You need to identify whether the performance issue relates to the use of tempdb by Azure SQL databases on sqlsrv1.

What should you do?

- A. Review information provided by SQL Server Profiler-based traces
- **B. Run dynamic management view-based queries**
- C. Review information provided by Query Performance Insight
- D. Run Query Store-based queries

Answer: B

Explanation:

Section: [none]

Explanation:

The diagnostics log outputs tempDB contention details. You can use the information as the starting point for troubleshooting.

You can use the Intelligent Insights performance diagnostics log of Azure SQL Database to troubleshoot performance issues.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/intelligent-insights-troubleshoot-performance#tempdb-contention>

<https://docs.microsoft.com/en-us/azure/azure-sql/database/intelligent-insights-use-diagnostics-log>

NEW QUESTION # 50

You have an Azure SQL managed instance named SQLMI1 that has Resource Governor enabled and is used by two apps named App1 and App2.

You need to configure SQLMI1 to limit the CPU and memory resources that can be allocated to App1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

□ Explanation:

□ Reference:

<https://docs.microsoft.com/en-us/sql/relational-databases/resource-governor/resource-governor?view=sql-server-ver15>

<https://docs.microsoft.com/en-us/sql/relational-databases/resource-governor/create-and-test-a-classifier-user-defined-function?view=sql-server-ver15>

NEW QUESTION # 51

You are designing an anomaly detection solution for streaming data from an Azure IoT hub. The solution must meet the following requirements:

- * Send the output to an Azure Synapse.
- * Identify spikes and dips in time series data.
- * Minimize development and configuration effort.

Which should you include in the solution?

- **A. Azure Stream Analytics**
- B. Azure SQL Database
- C. Azure Databricks

Answer: A

Explanation:

Section: [none]

Explanation:

Anomalies can be identified by routing data via IoT Hub to a built-in ML model in Azure Stream Analytics Reference:

<https://docs.microsoft.com/en-us/learn/modules/data-anomaly-detection-using-azure-iot-hub/>

<https://docs.microsoft.com/en-us/azure/stream-analytics/azure-synapse-analytics-output>

NEW QUESTION # 52

You have an Azure SQL Database managed instance named sqldbmi1 that contains a database name Sales.

You need to initiate a backup of Sales.

How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
