

Ace exam on your first attempt with actual EDGE EDGE-Expert questions

BTW, DOWNLOAD part of ITCertMagic EDGE-Expert dumps from Cloud Storage: <https://drive.google.com/open?id=1pJwT4JLI9zZbsUSLzlvnmNhHUiycJz9>

ITCertMagic regularly updates Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) practice exam material to ensure that it keeps in line with the test. In the same way, ITCertMagic provides a free demo before you purchase so that you may know the quality of the Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) dumps. Similarly, the ITCertMagic Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) examination time. Hence, it saves you time and money.

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the EDGE-Expert certification which is crucial for you successfully, I highly recommend that you should choose the EDGE-Expert certification braindumps from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the EDGE-Expert Exam Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.

EDGE - High Pass-Rate EDGE-Expert - Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Reliable Test Book

Different with other similar education platforms on the internet, the Excellence in Design for Greater Efficiencies (EDGE Expert) Exam guide torrent has a high hit rate, in the past, according to data from the students' learning to use the EDGE-Expert test torrent, 99% of these students can pass the qualification test and acquire the qualification of their yearning, this powerfully shows that the information provided by the EDGE-Expert study tool suit every key points perfectly, targeted training students a series of patterns and problem solving related routines, and let students answer up to similar topic. It may say, the EDGE-Expert Test Torrent can let users in a short time, accurately grasp the proposition trend of each year, doing all effects in the process of the difficulties in the hot, user's weak link and targeted training, and exercise the user's solving problem ability, eventually achieve the objectives of the pass Excellence in Design for Greater Efficiencies (EDGE Expert) Exam qualification test.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which of the following is a primary resource for the EDGE Auditor when performing the site visit?

- **A. EDGE Auditor's checklist**
- B. Roof insulation U-value
- C. Window to Wall Ratio (WWR)
- D. EDGE software

Answer: A

Explanation:

During a site visit for post-construction certification, the EDGE Auditor relies on specific tools to verify compliance. The EDGE Expert and Auditor Protocols specify: "The primary resource for an EDGE Auditor during a site visit is the EDGE Auditor's checklist, which provides a structured list of items to verify, including the implementation of selected measures, alignment with the self-assessment, and compliance with EDGE standards" (EDGE Expert and Auditor Protocols, Section 4.4: Site Audit Procedures). Option C, EDGE Auditor's checklist, matches this description as the key resource guiding the audit process. Option A (EDGE software) is a tool for assessment, not a resource for the site visit: "The EDGE software is used for self-assessment and desk audits, not directly during site visits" (EDGE Certification Protocol, Section 3.2:

Audit Requirements). Option B (roof insulation U-value) and Option D (Window to Wall Ratio) are specific data points the Auditor may verify, not primary resources: "U-values and WWR are elements to check, not tools for the Auditor" (EDGE Expert and Auditor Protocols, Section 4.4: Site Audit Procedures). The checklist ensures all aspects of the project are systematically reviewed, making it the primary resource (Option C).

Reference:EDGE Expert and Auditor Protocols, Section 4.4: Site Audit Procedures; EDGE Certification Protocol, Section 3.2: Audit Requirements.

NEW QUESTION # 28

Which of the following describes a more efficient lamp?

- A. Lower wattage
- B. Longer life
- C. Lower watts/m²
- **D. More lumens/watt**

Answer: D

Explanation:

Lamp efficiency in EDGE is a key factor in reducing energy consumption for lighting, a critical green building design strategy. The EDGE User Guide defines lamp efficiency: "In EDGE, a more efficient lamp is one that provides higher lumens per watt, meaning it produces more light output (lumens) for the same electrical input (watts). This metric, known as luminous efficacy, is used to evaluate lighting efficiency measures like EEM22 - Efficient Lighting for Internal Areas" (EDGE User Guide, Section 4.4: Lighting Efficiency Measures). Option A, more lumens/watt, directly aligns with this definition, as it indicates greater efficiency in converting electricity to light. Option B (lower watts/m²) refers to lighting power density, which is a design metric, not a lamp characteristic: "Watts/m² is a measure of lighting power density for a space, not the efficiency of an individual lamp" (EDGE Methodology Report Version 2.0, Section 5.4: Lighting Calculations). Option C (longer life) relates to durability, not efficiency: "Lamp life affects maintenance costs but is not a direct measure of energy efficiency in EDGE" (EDGE User Guide, Section 4.4: Lighting Efficiency Measures). Option D (lower wattage) alone does not indicate efficiency, as a lamp with lower wattage but poor light output would be less efficient: "Lower wattage must be paired with adequate lumens to improve efficiency" (EDGE Methodology Report Version 2.0, Section 5.4: Lighting Calculations). Thus, more lumens/watt (Option A) describes a more efficient lamp.

Reference:EDGE User Guide Version 2.1, Section 4.4: Lighting Efficiency Measures; EDGE Methodology Report Version 2.0, Section 5.4: Lighting Calculations.

NEW QUESTION # 29

EDGE was created for new buildings to promote:

- A. Highly accurate prediction of resource consumption.
- **B. Simple and scalable platform for green buildings.**
- C. Revenue for green building champions.
- D. Few exemplary high-performance buildings.

Answer: B

Explanation:

The purpose of EDGE, as defined by the International Finance Corporation (IFC), is to make green building accessible and scalable, particularly in emerging markets. The EDGE User Guide states: "EDGE was created by IFC to promote a simple and scalable platform for green buildings, enabling developers to achieve resource efficiency in new constructions through a user-friendly tool that focuses on energy, water, and materials savings" (EDGE User Guide, Section 1.1: Introduction to EDGE). Option C, a simple and scalable platform for green buildings, directly aligns with this mission. Option A (revenue for green building champions) is

incorrect, as EDGE's goal is not financial gain for individuals but broader market transformation: "EDGE aims to transform the building sector, not to generate revenue for specific stakeholders" (EDGE Certification Protocol, Section 1.1: Overview). Option B (few exemplary high- performance buildings) contradicts EDGE's scalability focus: "EDGE is not about creating a few high- performance buildings but enabling widespread adoption of green practices" (EDGE User Guide, Section 1.1: Introduction to EDGE). Option D (highly accurate prediction of resource consumption) is also incorrect, as EDGE prioritizes simplicity over precision: "EDGE uses simplified calculations for resource consumption, not highly accurate predictions, to ensure accessibility" (EDGE Methodology Report Version 2.0, Section 2.1: Calculation Approach). Thus, EDGE promotes a simple and scalable platform (Option C).
Reference: EDGE User Guide Version 2.1, Section 1.1: Introduction to EDGE; EDGE Certification Protocol, Section 1.1: Overview; EDGE Methodology Report Version 2.0, Section 2.1: Calculation Approach.

NEW QUESTION # 30

During an EDGE audit for a project, the Auditor discovers that members of the design team have provided misleading information on certain green building measures to the Client. This incorrect information has unknowingly been used by the Client to support their application for EDGE certification. What should the EDGE Auditor do?

- **A. Contact the design team and recommend that they provide updated and correct information.**
- B. Contact the Client and warn them of the deception, pointing out the design team members at fault.
- C. Reject the information and adjust the EDGE assessment accordingly, returning the assessment to the Client.
- D. Call the offending design team member and negotiate a friendly solution.

Answer: A

Explanation:

EDGE Auditors are bound by ethical protocols to maintain professionalism and independence when encountering issues like misleading information. The EDGE Expert and Auditor Protocols outline the procedure: "If an EDGE Auditor discovers misleading or incorrect information during an audit, they must contact the design team to recommend that they provide updated and correct information to the Client. The Auditor should document the issue in the audit report but must not adjust the assessment themselves or take punitive actions, ensuring the process remains transparent and fair" (EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies). Option B, contacting the design team to recommend updated information, aligns with this protocol. Option A (negotiate a friendly solution) violates the Auditor's impartiality: "Auditors must avoid direct negotiations that could compromise their independence" (EDGE Expert and Auditor Protocols, Section 2.3: Conflict of Interest). Option C (warn the Client of deception) oversteps the Auditor's role by assigning blame: "Auditors should not accuse parties of deception but focus on facilitating corrections" (EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies). Option D (reject and adjust the assessment) is incorrect, as Auditors cannot modify assessments: "Auditors must assess the project as submitted and cannot reject or adjust measures on their own" (EDGE Certification Protocol, Section 3.2: Audit Requirements). Thus, recommending corrections to the design team (Option B) is the appropriate action.
Reference: EDGE Expert and Auditor Protocols, Section 4.3: Handling Discrepancies, Section 2.3: Conflict of Interest; EDGE Certification Protocol, Section 3.2: Audit Requirements.

NEW QUESTION # 31

In order for a project to complete the design certification stage requirements, the EDGE Client must do which of the following?

- A. Internally review the EDGE measures with their design team and third-party consultant.
- **B. Provide the EDGE Auditor access to the self-assessment and all supporting documentation.**
- C. Access the EDGE software and begin and complete a full self-assessment of the building.
- D. Review and sign an agreement with a local or global partner to provide EDGE certification services.

Answer: B

Explanation:

The design certification stage (Preliminary Certification) in EDGE requires specific actions from the Client to ensure the project can be audited and certified. The EDGE Certification Protocol outlines the process: "To complete the design certification stage, the EDGE Client must provide the EDGE Auditor with access to the completed self-assessment in the EDGE software, along with all supporting documentation, such as drawings, specifications, and calculations, to verify the selected measures" (EDGE Certification Protocol, Section 3.1: Certification Process). Option C, provide the EDGE Auditor access to the self-assessment and all supporting documentation, matches this requirement. Option A (internally review the EDGE measures) is a preparatory step, not a certification requirement: "Internal reviews are recommended but not mandated for certification" (EDGE User Guide, Section 6.1: Project Preparation).

Option B (access the EDGE software and complete a self-assessment) is a prerequisite to the audit, not the final step for design certification: "The self-assessment must be completed before the audit, but certification requires submission to the Auditor" (EDGE Certification Protocol, Section 3.1: Certification Process). Option D (sign an agreement with a certification partner) is incorrect, as this is typically handled during project registration, not design certification: "Agreements with Certification Providers are signed prior to registration, not at the design stage" (EDGE Certification Protocol, Section 2.1: Registration). Thus, providing the Auditor access (Option C) is the required action.

Reference: EDGE Certification Protocol, Section 3.1: Certification Process, Section 2.1: Registration; EDGE User Guide Version 2.1, Section 6.1: Project Preparation.

NEW QUESTION # 32

.....

With EDGE-Expert training quiz, you only need to pay half the money to get the help of the most authoritative experts. EDGE-Expert exam questions are also equipped with a mock examination function, that allowing you to find your own weaknesses at any time during the learning process of our EDGE-Expert Study Materials, and to constantly improve your own learning methods. It also allows you to familiarize yourself with the examination environment in advance that helps you to avoid any emergency in the exam.
