Topic 3	<ul style="list-style-type: none">• Advanced Topics: Troubleshooting configuration issues, diagnosing system integration problems, and resolving deployment obstacles.
Topic 4	<ul style="list-style-type: none">• Process Automation and Integrations: Configuring end-to-end Order Management processes and external system integrations using declarative tools and clicks-based configuration.
Topic 5	<ul style="list-style-type: none">• Order Management Basics: Foundation of Order Management within Salesforce ecosystem, platform architecture, integration capabilities with third-party systems, and native Salesforce functionality.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q109-Q114):

NEW QUESTION # 109

In which twoways can Order Management licenses be assigned?

- A. By Hole
- B. By Permission Set
- C. By User
- D. By Profile

Answer: B,C

Explanation:

Two ways that Order Management licenses can be assigned are:

By Permission Set. A Permission Set is a collection of settings and permissions that give users access to various tools and functions in Salesforce. A Permission Set can be assigned to individual users or groups of users, regardless of their profile or role. An administrator can create a Permission Set that includes the Order Management User permission, which enables users to access Order Management features and data. The administrator can then assign this Permission Set to the users who need Order Management licenses.

By User. A User is a record that represents a person who can log in and access Salesforce. A User has various fields and settings that determine their access and permissions in Salesforce, such as profile, role, license type, etc. An administrator can assign an Order Management license to a user by editing the user record and selecting Order Management User from the License Type picklist. The administrator can also enable the Order Management User permission on the user record.

NEW QUESTION # 110

The order object represents which two statements? (Choose 2)

- A. The customer's intent at the time of purchase
- B. The invoice data for accounting purposes
- C. The initial exchange of funds for goods or services
- D. An overall summary of the order being processed

Answer: A,C

NEW QUESTION # 111

An administrator has created a screen flow for users to create accounts. Some users have complained that they do not always have all the required data to create the account and lost progress when they leave the flow. What two steps should the administrator take to prevent lost progress? Choose 2

- A. Enable paused flows in process automation settings in setup
- B. Add the paused flows component to the home page
- C. Ask a developer to create a lightning component to pause the flow
- D. Add a pause button to the footer of the screen flow

Answer: A,B

NEW QUESTION # 112

Based on some changes in Universal Containers' Commerce engine, new Orders are expected to have two additional attributes at the header level. In Order Management, which other Object besides Order also needs to be extended?

- A. Change Order
- B. Delivery Groups
- C. Order Summary
- D. Payment Summary

Answer: C

Explanation:

Based on some changes in Universal Containers' Commerce engine, new Orders are expected to have two additional attributes at the header level. In Order Management, besides Order, the other object that also needs to be extended is Order Summary. An Order Summary is a record that stores information about an order, such as the total amount, the number of items, and the fulfillment status. An Order Summary is created by a process called Create Order Summary Process, which runs whenever an order is created or updated. The process calls a flow called Create OrderSummary Flow, which calculates the order summary fields and creates or updates the order summary record. To extend an object in Order Management, an administrator can create custom attributes on that object that match the API name and data type of the corresponding attributes in B2C Commerce. Reference: Order Management Objects

NEW QUESTION # 113

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- A. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations
- B. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance
- C. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance
- D. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs

Answer: D

Explanation:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability. Reference: Order Fulfillment Flows, Partner Community

NEW QUESTION # 114

.....

We all harness talents with professional skills. Mastering the certificate of the AP-219 practice exam is essential for you. With all instability of the society, those knowledge and profession certificate mean a lot for you. So it is unquestionable the AP-219 learning questions of ours can do a big favor. And we have become the most popular exam braindumps provider in this career and supported by numerous of our loyal customers. You will be satisfied with our AP-219 study guide as well.
