- A. Predictive Analytics
- B. Ecosystem of Innovation
- C. AI Foundation
- D. Large Foundation Models
- E. Embedded AI

Answer: B,C,E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.
Exact extracts supporting this:
Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com
AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem.
Other options are incorrect because:
Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.
Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.
