## High Pass-Rate Valid PL-200 Test Book – Find Shortcut to Pass PL-200 Exam

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our PL-200 exam materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our PL-200 Study Guide prepared for you. Instant answer feedback allows you to identify your vulnerabilities in a timely manner, so as to make up for your weaknesses. With our PL-200 practice quiz, you will find that the preparation process is not only relaxed and joyful, but also greatly improves the probability of passing the exam.

## Microsoft Power Platform Functional Consultant Sample Questions (Q227-Q232):

### NEW QUESTION # 227

You are designing the organization structure for a company that has 5,000 users.

You need to configure security roles for the company while minimizing administrative effort.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Apply a security role to everyone in a business unit.	<p>Assign the security role to the default business unit team.</p> <p>Assign the security role individually to each user in the business unit.</p> <p>Create a new team, add the business unit users, and then assign the security role to the team.</p>
Ensure an individual can see records in their current business unit and a child business unit.	<p>Grant the user a security role from the child business unit.</p> <p>Grant the user the Parent: Child Business Units security permission.</p> <p>Grant the user a security role from the root business unit.</p>

#### Answer:

Explanation:

Requirement	Action
Apply a security role to everyone in a business unit.	<p>Assign the security role to the default business unit team.</p> <p>Assign the security role individually to each user in the business unit.</p> <p>Create a new team, add the business unit users, and then assign the security role to the team.</p>
Ensure an individual can see records in their current business unit and a child business unit.	<p>Grant the user a security role from the child business unit.</p> <p>Grant the user the Parent: Child Business Units security permission.</p> <p>Grant the user a security role from the root business unit.</p>

Explanation:

Box 1: Create a new team, and the business unit users, and then assign the security role to the team.

Change the business unit for a team

Important

By changing the business unit for a team, you can remove all security role assignments for the team. At least one security role must be assigned to the team in the new business unit.

\* Select an environment and go to Settings > Users + permissions > Teams.

\* Select the checkbox for a team name.

\* Screenshot selecting a team

\* On the menu bar, select Change Business Unit.

\* In the Change Business Unit dialog box, select a business unit. Enable Move records to new business unit to move to a new business unit. Select OK.

Box 2: Grant the user a security role from the child business unit.
