Dumps ARA-C01 Vce & ARA-C01 PDF Questions

DOWNLOAD the newest ExamCost ARA-C01 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1OE_QtYpOwDPEKlhq3tvPw2bjw5jQZ9Hu

Three versions of ARA-C01 exam torrent are available. Each version has its own feature, and you can choose the suitable one according your needs. ARA-C01 PDF version is printable, and you can print it into the hard one, and if you prefer the paper one. ARA-C01 Online test I engine is convenient and easy to learn, and it supports all web browsers, and can record the process of your training, you can have a general review of what you have learnt. ARA-C01 Soft test engine can stimulate the real exam environment, and you can know how the real exam look like if you buy this version.

Snowflake ARA-C01 Certification Exam is a computer-based test. It consists of 95 multiple-choice questions that must be completed in 120 minutes. ARA-C01 exam is administered by Pearson VUE, a leading provider of certification exams globally. Candidates can take the exam at any authorized Pearson VUE testing center, making it convenient for professionals worldwide.

ARA-C01 PDF Questions & Reliable ARA-C01 Exam Topics

If candidates want to obtain certifications candidates should notice studying methods. If you do not want to purchase our Snowflake ARA-C01 new exam bootcamp materials and just want to study yourself, willpower is the most important. Passing so many exams is really not easy. Reasonable studying methods and relative work experience make you half the work with double the results. ARA-C01 New Exam Bootcamp materials will be a shortcut for you.

To qualify for the Snowflake ARA-C01 exam, candidates must first obtain the SnowPro Advanced Architect certification. SnowPro Advanced Architect Certification certification requires passing the SnowPro Core exam, as well as demonstrating proficiency in data modeling and performance tuning. Once candidates have achieved this certification, they can then take the ARA-C01 Exam to further validate their expertise.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q81-Q86):

NEW QUESTION # 81

When using the Snowflake Connector for Kafka, what data formats are supported for the messages? (Choose two.)

- A. Parquet
- B. JSON
- C. CSV
- D. Avro
- E. XML

Answer: B,D

NEW QUESTION # 82

Consider the following COPY command which is loading data with CSV format into a Snowflake table from an internal stage through a data transformation query.

This command results in the following error:

SQL compilation error: invalid parameter 'validation_mode'

Assuming the syntax is correct, what is the cause of this error?

- A. The VALIDATION_MODE parameter does not support COPY statements with CSV file formats.
- B. The VALIDATION_MODE parameter does not support COPY statements that transform data during a load.
- C. The value return_all_errors of the option VALIDATION_MODE is causing a compilation error.
- D. The VALIDATION_MODE parameter supports COPY statements that load data from external stages only.

Answer: B

Explanation:

* The VALIDATION_MODE parameter is used to specify the behavior of the COPY statement when loading data into a table. It is used to specify whether the COPY statement should return an error if any of the rows in the file are invalid or if it should continue loading the valid rows. The VALIDATION_MODE parameter is only supported for COPY statements that load data from external stages1.

* The query in the question uses a data transformation query to load data from an internal stage. A data transformation query is a query that transforms the data during the load process, such as parsing JSON or XML data, applying functions, or joining with other tables2.

* According to the documentation, VALIDATION_MODE does not support COPY statements that transform data during a load. If the parameter is specified, the COPY statement returns an error1.

Therefore, option C is the correct answer.

NEW QUESTION # 83

A company is following the Data Mesh principles, including domain separation, and chose one Snowflake account for its data platform.

An Architect created two data domains to produce two data products. The Architect needs a third data domain that will use both of the data products to create an aggregate data product. The read access to the data products will be granted through a separate role.

Based on the Data Mesh principles, how should the third domain be configured to create the aggregate product if it has been granted the two read roles?

- A. Request a technical ETL user with the sysadmin role.
- B. Create a hierarchy between the two read roles.
- C. Request that the two data domains share data using the Data Exchange.
- D. Use secondary roles for all users.

Answer: C

Explanation:

In the scenario described, where a third data domain needs access to two existing data products in a Snowflake account structured according to Data Mesh principles, the best approach is to utilize Snowflake's Data Exchange functionality. Option D is correct as it facilitates the sharing and governance of data across different domains efficiently and securely. Data Exchange allows domains to publish and subscribe to live data products, enabling real-time data collaboration and access management in a governed manner. This approach is in line with Data Mesh principles, which advocate for decentralized data ownership and architecture, enhancing agility and scalability across the organization.

NEW QUESTION # 84
An Architect is troubleshooting a query with poor performance using the QUERY_HIST0RY function. The Architect observes that the COMPILATIONJHME is greater than the EXECUTIONJTIME.
What is the reason for this?

- A. The query is reading from remote storage.
- B. The query is queued for execution.
- C. The query is processing a very large dataset.
- D. The query has overly complex logic.

Answer: C

NEW QUESTION # 85
An Architect entered the following commands in sequence:

USER1 cannot find the table.
Which of the following commands does the Architect need to run for USER1 to find the tables using the Principle of Least Privilege? (Choose two.)

- A. GRANT USAGE ON SCHEMA SANDBOX.PUBLIC TO ROLE INTERN;
- B. GRANT ROLE PUBLIC TO ROLE INTERN;
- C. GRANT USAGE ON DATABASE SANDBOX TO ROLE INTERN;
- D. GRANT ALL PRIVILEGES ON DATABASE SANDBOX TO ROLE INTERN;
- E. GRANT OWNERSHIP ON DATABASE SANDBOX TO USER INTERN;

Answer: A,C

Explanation:
* According to the Principle of Least Privilege, the Architect should grant the minimum privileges necessary for the USER1 to find the tables in the SANDBOX database.
* The USER1 needs to have USAGE privilege on the SANDBOX database and the SANDBOX.PUBLIC schema to be able to access the tables in the PUBLIC schema. Therefore, the commands B and C are the correct ones to run.
* The command A is not correct because the PUBLIC role is automatically granted to every user and role in the account, and it does not have any privileges on the SANDBOX database by default.
* The command D is not correct because it would transfer the ownership of the SANDBOX database from the Architect to the USER1, which is not necessary and violates the Principle of Least Privilege.
* The command E is not correct because it would grant all the possible privileges on the SANDBOX database to the USER1, which is also not necessary and violates the Principle of Least Privilege.
