Certified Information Security Manager certification is particularly relevant in today's world as organizations face an increasing number of cyber threats and data breaches. Employers are looking for professionals who can protect their organizations from such threats and ensure that their information and assets are secure.

ISACA Certified Information Security Manager Sample Questions (Q248-Q253):

NEW QUESTION # 248

An information security manager has identified and implemented mitigating controls according to industry best practices. Which of the following is the GREATEST risk associated with this approach?

- A. The cost of control implementation may be too high.
- B. The mitigation measures may not be updated in a timely manner.
- C. Important security controls may be missed without senior management input.
- **D. The security program may not be aligned with organizational objectives.**

Answer: D

NEW QUESTION # 249

A small organization has a contract with a multinational cloud computing vendor. Which of the following would present the GREATEST concern to an information security manager if omitted from the contract?

- A. Escrow of software code with conditions for code release
- **B. Authority of the subscriber to approve access to its data**
- C. Right of the subscriber to conduct onsite audits of the vendor
- D. Commingling of subscribers' data on the same physical server

Answer: B

Explanation:

The greatest concern to an information security manager if omitted from the contract with a multinational cloud computing vendor would be the authority of the subscriber to approve access to its data. This is because the subscriber's data may be subject to different legal and regulatory requirements in different jurisdictions, and the subscriber may lose control over who can access, process, or disclose its data. The subscriber should have the right to approve or deny access to its data by the vendor or any third parties, and to ensure that the vendor complies with the applicable data protection laws and standards. The authority of the subscriber to approve access to its data is also one of the key elements of the ISACA Cloud Computing Management Audit /Assurance Program1.

NEW QUESTION # 250

An organization has to comply with recently published industry regulatory requirements-compliance that potentially has high implementation costs. What should the information security manager do FIRST?

- A. Implement compensating controls.
- B. Demand immediate compliance.
- **C. Perform a gap analysis.**
- D. Implement a security committee.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Since they are regulatory requirements, a gap analysis would be the first step to determine the level of compliance already in place. Implementing a security committee or compensating controls would not be the first step. Demanding immediate compliance would not assess the situation.

NEW QUESTION # 251

Which of the following would BEST address the risk of data leakage?

- **A. Acceptable use policies**
- B. Database integrity checks
- C. Incident response procedures
- D. File backup procedures

Answer: A

Explanation:

Explanation

Acceptable use policies are the best measure for preventing the unauthorized disclosure of confidential information. The other choices do not address confidentiality of information.

NEW QUESTION # 252

Which of the following are seldom changed in response to technological changes?

- A. Policies
- B. Procedures
- C. Standards
- D. Guidelines

Answer: A

Explanation:

Explanation

Policies are high-level statements of objectives. Because of their high-level nature and statement of broad operating principles, they are less subject to periodic change. Security standards and procedures as well as guidelines must be revised and updated based on the impact of technology changes.
