{Offline Fast} VMware 2V0-32.24 Practice Exam Software

BONUS!!! Download part of DumpExam 2V0-32.24 dumps for free: https://drive.google.com/open?id=1u4qDkyVuK7kwETMjnaqqB0EeUoCrZuaK

Almost everyone is trying to get the VMware 2V0-32.24 certification to update their CV or get the desired job. Every student faces just one problem and that is not finding updated study material. Applicants are always confused about where to buy real VMware 2V0-32.24 Dumps Questions and prepare for the VMware Cloud Operations 8.x Professional V2 (2V0-32.24) exam in less time. Nowadays everyone is interested in getting the VMware Cloud Operations 8.x Professional V2 (2V0-32.24) certificate because it has multiple benefits for VMware career.

The VMware 2V0-32.24 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual VMware 2V0-32.24 exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of VMware 2V0-32.24 Dumps with you on occasions when you have spare time for quick revision. The PDF is easily downloadable from our website and also has a free demo version available.

Quiz High Hit-Rate VMware - 2V0-32.24 New Braindumps Free

DumpExam can provide a shortcut for you and save you a lot of time and effort. DumpExam will provide good training tools for your VMware Certification 2V0-32.24 Exam and help you pass VMware certification 2V0-32.24 exam. If you see other websites provide relevant information to the website, you can continue to look down and you will find that in fact the information is mainly derived from our DumpExam. Our DumpExam provide the most comprehensive information and update fastest.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	• VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.

Topic 2	• Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.
Topic 3	• Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q12-Q17):

NEW QUESTION # 12

An administrator would like to limit the access in vRealize Log Insight for application developers to a specific group of hosts where their application is running.

What should the administrator to configure satisfy this requirement?

- A. Define a data set with required ESXi hosts and associate it with the vSphere content pack.
- B. Make sure that all ESXi hosts are added to the same vSphere HA/DRS cluster.
- C. Define a data set with required ESXi hosts and associate it with a role.
- D. Create a DRS Host group and assign the users as part of the role assignment in vRealize Log Insight.

Answer: C

Explanation:

To limit access in vRealize Log Insight for application developers to a specific group of hosts, the administrator can define a dataset that includes only the required ESXi hosts where the application is running, and then associate this data set with a specific role. By doing this, the administrator ensures that the developers only have access to the logs from those specific hosts.

This method leverages the role-based access control (RBAC) in vRealize Log Insight, allowing granular control over the logs that users can access based on their assigned role and the data sets to which they are associated.

NEW QUESTION # 13

An administrator needs to deploy a 3-node High Availability cluster of vRealize Operations using custom CA- signed certificates. An existing vRealize Operations development environment has previously been deployed using vRealize Suite Lifecycle Manager. Which method should the Administrator use to complete this objective?

- A. Deploy vRealize Operations analytics cluster using Command Line Interface.
- B. Deploy 3 nodes independently, replace certificates and then form the 3-node cluster.
- C. Deploy a single node cluster at the begining to further expand it to 3 nodes in the next step.
- D. Deploy vRealize Operations analytics cluster using vRealize Suite Lifecycle Manager.

Answer: D

Explanation:

To deploy a 3-node High Availability cluster of vRealize Operations with custom CA-signed certificates, the best approach is to use vRealize Suite Lifecycle Manager (vRSLCM). Since vRSLCM has already been used in the existing vRealize Operations development environment, it simplifies the deployment process for a 3- node cluster, allowing for easy management of certificates and cluster configuration.

Using vRSLCM allows for the configuration of custom CA-signed certificates during the deployment, and it supports the creation of the necessary cluster nodes in a seamless manner. This ensures that the HA configuration is maintained and the custom certificates are applied properly across all nodes.

NEW QUESTION # 14

Forty days ago, an administrator provisioned a Virtual Machine (vm-01) in preparation for a new project. The project has now been delayed due to budgetary constraints. As part of the monthly service management checks, a second administrator executes the reclaim action on all idle virtual machines and vm-01 is listed.

The second administrator accidentally reclaims all idle virtual machines including vm-01.
What action can the administrator complete to prevent this scenario from happening again?

- A. Increase the default value of the Exclude VM provisioned in the last x days setting.
- B. Create a dynamic group with membership based on vSphere tags so that all new virtual machines are included and then exclude the entire group from reclaim analysis.
- C. Create a new policy that disables the capacity reclamation on the policy and apply the policy to the parent object hosting new virtual machines.
- D. Disable Capacity reclamation on the policy applied to new virtual machines.

Answer: A

Explanation:
To prevent virtual machines like vm-01 from being reclaimed too early, the administrator can increase the default value of the Exclude VM provisioned in the last x days setting. This ensures that newly provisioned VMs, like vm-01, will be excluded from the reclamation process for a longer period (e.g., 30, 60, or more days), preventing accidental reclamation of VMs that are still in use or under consideration for future projects.
This action directly addresses the issue of accidentally reclaiming recently provisioned virtual machines.

NEW QUESTION # 15
Which three features are available in vRealize Log Insight? (Choose three.)

- A. Use of Remote Collectors
- B. Machine Learning Analytics
- C. Application Discovery Dashboard
- D. Event Forwarding
- E. Interactive Analytics
- F. Management Pack Marketplace

Answer: A,D,E

Explanation:
Interactive Analytics: vRealize Log Insight provides an interactive analytics interface that allows users to search, query, and visualize log data in real time.
Use of Remote Collectors: Remote Collectors in vRealize Log Insight allow logs to be collected from remote locations and forwarded to the central vRLI instance for processing.
Event Forwarding: vRealize Log Insight supports event forwarding, enabling the forwarding of log data to other systems or central servers, which helps with centralized log management.

NEW QUESTION # 16
An administrator has been tasked with importing a new certificate for vRealize Operations using vRealize Lifecycle Manager.
Drag and drop the four correct actions the administrator must complete from the action list on the left and place the actions into the correct sequence on the right. (Choose four.)

Action List	Sequential Order
In the My Services page, click Locker	1
On the Certificates page, click Import	2
In the Security page, click Locker	3
Login as admin@local	4
Login as root@local	
In The Navigation pane, click Certificates	

Answer:

Explanation:

Action List

- In the My Services page, click Locker
- On the Certificates page, click Import
- In the Security page, click Locker
- Login as admin@local
- Login as root@local
- In The Navigation pane, click Certificates

Sequential Order

1. Login as admin@local
2. In the My Services page, click Locker
3. In The Navigation pane, click Certificates
4. On the Certificates page, click Import

Action List

- In the My Services page, click Locker
- On the Certificates page, click Import
- In the Security page, click Locker
- Login as admin@local
- Login as root@local
- In The Navigation pane, click Certificates

Sequential Order

1. Login as admin@local
2. In the My Services page, click Locker
3. In The Navigation pane, click Certificates
4. On the Certificates page, click Import

NEW QUESTION # 17

......

We provide the update freely of 2V0-32.24 Exam Questions within one year and 50% discount benefits if buyers want to extend service warranty after one year. The old client enjoys some certain discount when buying other exam materials. We update the 2V0-32.24 guide torrent frequently and provide you the latest study materials which reflect the latest trend in the theory and the practice. So you can master the VMware Cloud Operations 8.x Professional V2 test guide well and pass the exam successfully. While you enjoy the benefits we bring you can pass the exam.
