

Windows-based Juniper JN0-460 Practice Exam Software

BTW, DOWNLOAD part of Exam4PDF JN0-460 dumps from Cloud Storage: <https://drive.google.com/open?id=16sqTuW6HUZKAT5QIrTzxsNbfv0t4v5F>

These Juniper JN0-460 exam questions have a high chance of coming in the actual JN0-460 test. You have to memorize these JN0-460 questions and you will pass the Juniper JN0-460 test with brilliant results. The price of Juniper JN0-460 updated exam dumps is affordable.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 2	<ul style="list-style-type: none">Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 3	<ul style="list-style-type: none">Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

Topic 4	<ul style="list-style-type: none"> Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 5	<ul style="list-style-type: none"> Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

Free PDF Quiz 2026 JN0-460: Mist AI Wired, Specialist (JNCIS-MistAI-Wired) – High-quality Test Pattern

With the development of economic globalization, your competitors have expanded to a global scale. Obtaining an international JN0-460 certification should be your basic configuration. What I want to tell you is that for JN0-460 Preparation materials, this is a very simple matter. And as we can claim that as long as you study with our JN0-460 learning guide for 20 to 30 hours, then you will pass the exam as easy as pie.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which campus fabric architecture supports Layer 3 gateways at the distribution layer?

- A. campus fabric IP Clos
- B. campus fabric core/distribution - edge-routed bridging (ERB)
- C. EVPN multihoming
- D. campus fabric core/distribution - centrally-routed bridging (CRB)

Answer: B

Explanation:

In Juniper's campus fabric architectures, the location of the Layer 3 gateway (IRB) differentiates between CRB and ERB models: Centrally-Routed Bridging (CRB): L3 gateways are placed at the core layer.

Edge-Routed Bridging (ERB): L3 gateways are placed at the distribution layer, closer to the edge.

"In the ERB model, Layer 2 gateways are deployed at the access layer, and Layer 3 gateways are deployed at the distribution layer."

Option A (CRB): Incorrect - L3 is at the core, not distribution.

Option B (IP Clos): Incorrect - in 3-stage Clos, L3 is pushed to the access layer.

Option D (EVPN multihoming): Incorrect - this is about redundancy, not gateway placement.

Option C (ERB): Correct - L3 gateways sit at the distribution layer in the ERB architecture.

NEW QUESTION # 11

Dynamic port configuration helps in managing which aspect of network operations?

- A. Automatically adjusting port settings based on connected devices
- B. Static IP assignment

- C. Ensuring ports are permanently disabled
- D. Reducing the need for cable management

Answer: A

NEW QUESTION # 12

In Juniper Mist cloud services, service level expectation (SLE) telemetry is collected from every device and stored for up to how long?

- A. 2 months
- **B. 1 month**
- C. 24 hours
- D. 7 days

Answer: B

Explanation:

Juniper Mist AI collects telemetry for Service Level Expectations (SLEs) across wired and wireless devices.

This telemetry includes metrics such as time-to-connect, throughput, coverage, and switch performance.

"Service Level Expectation (SLE) data is collected from every device and stored for up to one month in the Mist Cloud. This allows administrators to analyze historical performance trends and troubleshoot issues based on real-time and historical data." Option B (2 months): Incorrect - data is not retained this long.

Option C (7 days): Incorrect - telemetry retention is longer.

Option D (24 hours): Incorrect - too short for Mist SLE analytics.

Option A (1 month): Correct - Mist Cloud retains SLE telemetry for 30 days (1 month).

NEW QUESTION # 13

What are the two ways to forward BUM traffic when using EVPN? (Choose two.)

- A. Use BGP neighborship.
- **B. Use ingress replication.**
- C. Use static routes.
- **D. Use underlay replication.**

Answer: B,D

Explanation:

In EVPN-VXLAN, BUM (Broadcast, Unknown unicast, and Multicast) traffic is handled differently than unicast traffic. EVPN provides two main forwarding mechanisms to distribute BUM traffic between VTEPs (VXLAN Tunnel Endpoints):

"BUM traffic in EVPN-VXLAN fabrics is replicated using either ingress replication or underlay multicast (PIM-based). Both methods ensure that broadcast and unknown unicast frames reach all remote VTEPs within the same VXLAN segment." Option A: Incorrect - static routes are unrelated to BUM forwarding.

Option B: Incorrect - BGP is the control plane, not a data-plane forwarding method.

Option C: Correct - Ingress replication replicates BUM packets to all remote VTEPs in the same VNI using unicast tunnels.

Option D: Correct - Underlay replication (multicast) uses multicast groups in the IP underlay to distribute BUM frames efficiently.

NEW QUESTION # 14

What information would be streamed through webhooks? (Choose two.)

- A. location coordinates of RFID tags
- **B. alerts**

- C. SLE metrics of clients
- D. audit logs

Answer: B,C

Explanation:

Mistwebhooks provide real-time integration with external systems by streaming alerts and SLE (client) metrics.

They allow automation tools to react immediately to network health or performance changes.

Our company keeps pace with contemporary talent development and makes every learners fit in the needs of the society. Based on advanced technological capabilities, our JN0-460 study materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied JN0-460 Exam guides to them. Our JN0-460 exam prepare is definitely better choice to help you go through the JN0-460 test. Buy our JN0-460 exam questions, the success is just ahead of you.
