### ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q97-Q102):

#### NEW QUESTION # 97

The combination of the user and the assigned portfolio must be unique when adding a user to which registry?

- A. Application Registry.
- B. UX Page Registry.
- C. Event Registry.
- D. Stakeholder Registry.

**Answer: D**

Explanation:

According to the Stakeholder Registry document, the combination of the user and the assigned portfolio must be unique when adding a user to the stakeholder registry. The stakeholder registry is a table that stores information about the stakeholders of a portfolio. The other options are not correct, as they are not registries that require a unique combination of user and portfolio. The application registry is a table that stores information about the applications in the system. The event registry is a table that stores information about the events that trigger notifications. The UX page registry is a table that stores information about the UX pages that are available for portfolios.

#### NEW QUESTION # 98

Demand assessments are triggered as soon as the demand enters what state?

- A. Submitted.
- B. Approved.
- C. Qualified.
- D. Screening.

**Answer: A**

Explanation:

Explanation

According to the Completing Demand Assessments document, demand assessments are triggered as soon as the demand enters the Submitted state. The other options are not correct, as demand assessments are not triggered when the demand is Approved, Screening, or Qualified.

### NEW QUESTION # 99

A project expense line is cost associated with a specific source, except for:

- A. Program
- B. Software.
- C. Fixed Assets.
- D. Resource.

**Answer: A**

Explanation:

According to the Project Expense Lines document, a project expense line is cost associated with a specific source, such as fixed assets, resource, or software. The program field on the project expense line form is not a source of cost, but a reference to the program that the project belongs to. Therefore, the correct answer is B. Program. The other options are not correct, as they are sources of cost for a project expense line.

### NEW QUESTION # 100

Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. it\_pps\_admin.
- B. business\_stakeholder.
- C. it\_project\_manager.
- D. All roles.

**Answer: A**

Explanation:

Explanation

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it\_pps\_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business\_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it\_project\_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

### NEW QUESTION # 101

What minimum role is required to assign a time sheet policy to a user?

- A. it\_project\_manager.
- B. timecard\_admin.
- C. ppm\_admin.
- D. It is not possible to assign a time sheet policy to a user.

**Answer: B**

Explanation:

According to the web search results<sup>1</sup>, the timecard\_admin role is the minimum role that is required to assign a time sheet policy to a user. A time sheet policy is a rule that controls the creation and operation of time sheets for resources who log time against work items. The timecard\_admin role can create and modify time sheet policies, time sheet groups, and time sheet periods, as well as approve time sheets or submit time cards on behalf of team members. The other options are incorrect because:

A. ppm\_admin: The ppm\_admin role is a higher-level role that can access all Project and Portfolio Management modules and features, but it is not the minimum role required for assigning a time sheet policy to a user<sup>2</sup>.

C. it\_project\_manager: The it\_project\_manager role can create and manage projects, but not assign time sheet policies to users<sup>3</sup>.

D. It is not possible to assign a time sheet policy to a user: This is false, as it is possible to assign a time sheet policy to a user by using the Time Sheet Policy field on the User form<sup>4</sup>.
