CompTIA Cloud+ (2025) Sample Questions (Q171-Q176):

NEW QUESTION # 171

The performance of an e-commerce website decreases dramatically during random periods. The IT team is evaluating available resources to mitigate the situation. Which of the following is the best approach to effectively manage this scenario?

- A. Migrating to a dedicated host
- B. Purchasing additional servers
- C. Scheduling resource allocation
- **D. Configuring automatic elasticity**

Answer: D

Explanation:

Configuring automatic elasticity is the best approach to manage an e-commerce website that experiences random performance drops due to variable traffic. Automatic elasticity enables the cloud resources to scale up or down automatically based on the current load, ensuring consistent performance even during unexpected traffic surges.

The concept of automatic elasticity is part of the cloud management and technical operations content in the CompTIA Cloud+ curriculum.

NEW QUESTION # 172

Which of the following is part of software change control?

- A. Validation checks
- B. Requirements definition
- C. Rollback plans
- D. Maintenance windows

Answer: C

Explanation:

A key element of change control is having a rollback plan, which allows recovery to a previous stable state if the change causes instability. This is part of operational support to maintain service availability and minimize downtime during updates.

NEW QUESTION # 173

A company recently subscribed to a SaaS collaboration service for its business users. The company also has an on-premises collaboration solution and would like users to have a seamless experience regardless of the collaboration solution being used. Which of the following should the administrator implement?

- A. WAF
- B. SSO
- C. VDI
- D. LDAP

Answer: B

Explanation:

Single sign-on (SSO) is a system that allows users to authenticate once and gain access to multiple applications without having to re-authenticate for each application. This can help to improve the user experience by making it easier and faster for users to access the applications that they need.

In this scenario, the company wants users to have a seamless experience regardless of the collaboration solution being used. SSO can help to achieve this by allowing users to authenticate once and gain access to both the SaaS collaboration service and the on-premises collaboration solution.

NEW QUESTION # 174

Which of the following is the focus of DevSecOps?

- A. Developing, securing, and testing software
- B. Developing, testing, and maintaining software
- C. Securing, testing, and maintaining new software
- D. Developing, maintaining, and securing software

Answer: A

Explanation:

DevSecOps integrates security controls early in the development lifecycle. Its focus is to develop, secure, and test continuously, ensuring that vulnerabilities are identified and addressed before deployment. Security is not bolted on later but woven into development and testing workflows.

NEW QUESTION # 175

A company runs a discussion forum that caters to global users. The company's monitoring system reports that the home page suddenly is seeing elevated response times, even though internal monitoring has reported no issues or changes. Which of the following is the most likely cause of this issue?

- A. Phishing
- B. Human error
- **C. DDoS**
- D. Cryptojacking

Answer: C

Explanation:

Elevated response times without reported issues or changes internally could indicate a Distributed Denial of Service (DDoS) attack, where multiple systems flood the bandwidth or resources of a targeted system, usually one or more web servers.
