**Deep-Security-Professional Valid Test Cost & Deep-Security-Professional Reliable Exam Labs**

Gone are the days when Deep-Security-Professional hadn't their place in the corporate world. With the ever-increasing popularity of the Deep-Security-Professional devices and software, now Deep-Security-Professional certified professionals are the utmost need of the industry, round the globe. Particularly, advertisement agencies and the media houses have enough room for Deep-Security-Professional Certified. Deep-Security-Professional dumps promises you to bag your dream Deep-Security-Professional certification employing minimum effort and getting the best results you have ever imagined.

Trend Micro Certified Professional for Deep Security exam is a valuable certification for professionals who work with Trend Micro's Deep Security solution. By demonstrating knowledge and skills in implementing and managing Deep Security, professionals can enhance their career prospects and stay up-to-date with the latest trends and technologies in the cybersecurity industry.

## **Trend Micro Certified Professional for Deep Security Sample Questions (Q31-Q36):**

### **NEW QUESTION # 31**

Where does Deep Security Manager store the credentials it uses to access the database?

- A. In the Windows Registry
- B. In the database.properties file
- C. In the logging.properties file
- **D. In the dsm.properties file**

**Answer: D**

### **NEW QUESTION # 32**

A collection of servers protected by Deep Security do not have Internet access. How can Smart Scan be used on these computers.

- A. Promote one of the Deep Security Agents on the air gapped computers to become a Re-lay.
- B. Smart Scan can be configured to use a local pattern file containing the same information as the Smart Protection Network.
- C. Smart Scan must contact the Smart Protection Network to function. Any servers without Internet access will be unable to use Smart Scan.
- **D. Install a Smart Protection Server in the environment and set it as the source for File Reputation information.**

**Answer: D**

Explanation:

Agent-airgapped

### **NEW QUESTION # 33**

Which of the following statements is true regarding software inventories used as part of the Application Control Protection Module?

- A. Disable the Application Control Protection Module when installing software upgrades, otherwise, the new software will be prevented from installing.
- B. When an administrator allows software that would be otherwise blocked by the Enforcement Mode, it isn't added to the inventory of approved software. Instead, it is added to that computer's whitelist.
- **C. An administrator can view the list of allowed software in the inventory from the Details tab for each individual Computer.**
- D. An administrator can share the inventory of allowed software with other computers protected by Deep Security Agents, by copying the inventory database file (ac.db) from the source computer.

**Answer: C**

Explanation:

The software inventory for Application Control is visible in the Deep Security Manager console under the Details tab for each protected computer. This inventory lists all approved and detected software components for that agent.

From the official documentation:

"Administrators can view and manage the Application Control inventory for each computer from the Details tab in the Deep Security Manager console. This inventory lists all allowed, blocked, and detected software." Option A is incorrect: You do not need to disable the module for upgrades; use Maintenance Mode or update rules.

Option C is incorrect: Inventory is not shared by copying database files.

Option D is incorrect: Allowed software is added to the inventory.

### NEW QUESTION # 34

Which of the following correctly describes the Firewall rule Action of Force Allow?

- A. Force Allow explicitly allows traffic that matches the Firewall rule to pass, and implicitly denies all other traffic.
- B. Force Allow permits traffic to bypass analysis by all Deep Security Protection Modules.
- C. Force Allow permits traffic that would otherwise be denied by other Firewall rules to pass, but still enforces filtering by the Intrusion Prevention Protection Module.
- D. Force Allow permits traffic to bypass analysis by both the Firewall and Intrusion Pre-vention Protection Modules.

Answer: C

### NEW QUESTION # 35

Policies in Deep Security can include a Context value. Which of the following statements re-garding Context is correct?

- A. The Context provides Deep Security Agents with location awareness and are associated with Firewall and Intrusion Prevention Rules.
- B. The Context provides Deep Security Agents with location awareness and are associated with Log Inspection and Integrity Monitoring Rules.
- C. The Context provides Deep Security Agents with location awareness and are associated with Web Reputation Rules only.
- D. The Context provides Deep Security Agents with location awareness and are associated with Anti-Malware and Web Reputation Rules.

Answer: A

Explanation:

Contexts are designed to be associated with Firewall and Intrusion Prevention Rules. If the conditions defined in the Context associated with a rule are met, the rule is applied. To link a security rule to a Context, go to the Options tab in the Properties window for the rule and select the Context from the menu.

Explication: Study Guide - page (165)
