Möchten Sie Ihre Freizeit ausnützen, um die Zertifizierung der Google Associate-Google-Workspace-Administrator zu erwerben? Mit der PDF Version von Google Associate-Google-Workspace-Administrator Prüfungsunterlagen, die von uns geboten wird, können Sie irgendwann und irgendwo lesen. Außerdem bieten wir Online Test Engine und Simulierte-Software. Sie sind auch inhaltsreich und haben ihre eigene Überlegenheit. Sie können Demos unterschiedlicher Versionen von Google Associate-Google-Workspace-Administrator gratis probieren und die geeignetste Version finden!

Google Associate Google Workspace Administrator Associate-Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

Your organization's employees frequently collaborate with external clients and vendors by using Google Meet. There are active instances of unsupervised meetings within your organization that do not have a host, and unsupervised meetings that continue after an event has completed. You want to end all meetings that are being used inappropriately as quickly as possible. What should you do?

- **A. End all unsupervised meetings by using the Google Meet APIs.**
- B. Enable Host Management for Google Meet, and train internal host employees how to end meetings for everyone.
- C. Identify and end all unsupervised meetings by using the security investigation tool.
- D. Turn off Google Meet in the Admin console for your organization. Turn Google Meet back on after two minutes.

Antwort: A

Begründung:

Using the Google Meet APIs allows you to programmatically end all unsupervised meetings quickly. This approach is the most effective for managing unsupervised meetings in real-time, especially if there are multiple such meetings happening across the organization. It provides a centralized method to monitor and take action on these meetings, ensuring security and preventing misuse.

61. Frage

The current data storage limit for the sales organizational unit (OU) at your company is set at 10GB per user. A subset of sales representatives in that OU need 100GB of storage across shared services. You need to increase the storage for only the subset of sales representatives by using the least disruptive approach and the fewest configuration steps. What should you do?

- **A. Move the subset of users to a sub-OU, and assign a 100GB storage limit to that sub-OU.**
- B. Instruct the subset of users to store their documents in a Shared Drive with a 100GB limit.
- C. Create a configuration group, and add the subset of users to that group. Set the group storage limit to 100GB.
- D. Change the storage limit of the sales OU to 100GB.

Antwort: A

Begründung:

By moving the subset of sales representatives to a sub-organizational unit (OU) and assigning a 100GB storage limit to that sub-OU, you can efficiently increase the storage for those users without affecting the rest of the sales team. This approach allows you to target the specific users that require more storage, maintaining minimal disruption and configuration steps.

62. Frage

Your organization is increasingly concerned about its environmental impact. You want to assess the environmental impact of using Google Workspace services. Which report should you use?

- A. Carbon footprint report
- B. Accounts report
- **C. Google Environmental Report**
- D. Apps Monthly Uptime report

Antwort: C

Begründung:

To assess the environmental impact of using Google Workspace services, you should refer to the Google Environmental Report. Google publishes comprehensive reports detailing its environmental efforts, including the energy efficiency of its data centers, its use of renewable energy, and its overall carbon footprint, which includes the impact of services like Google Workspace. Here's why option B is the correct choice and why the others are not relevant to assessing the overall environmental impact of using Google Workspace:

B. Google Environmental Report

Google regularly publishes detailed environmental reports that cover various aspects of its sustainability initiatives, including its progress towards using renewable energy, its efforts to improve energy efficiency in its operations (which power Google Workspace), and its overall carbon footprint. These reports provide insights into the environmental impact associated with using Google services.

Associate Google Workspace Administrator topics guides or documents reference: While there might not be a specific "Google Workspace Environmental Impact Report" as a standalone document within the Admin console, Google's overarching

"Environmental Report" (often found on Google's sustainability or environmental responsibility websites) encompasses the infrastructure and practices that support all Google services, including Google Workspace. Administrators looking for this information would be directed to these publicly available Google reports.

A . Carbon footprint report

While the concept of a "carbon footprint report" is relevant to environmental impact, Google typically includes this information within its broader "Environmental Report" rather than providing a separate report specifically for Google Workspace usage within an organization's Admin console. You would likely find data related to the carbon efficiency of Google's infrastructure in their main environmental disclosures.

Associate Google Workspace Administrator topics guides or documents reference: Google's communication about its carbon footprint and environmental efforts is usually consolidated in their public sustainability reports.

C . Apps Monthly Uptime report

The Apps Monthly Uptime report provides information about the reliability and availability of Google Workspace services. It focuses on service performance and uptime metrics, not on environmental impact or sustainability.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on service-level agreements (SLAs) and service status provides information about uptime guarantees and how to monitor service availability, which is the focus of the Apps Monthly Uptime report.

D . Accounts report

The Accounts report in the Google Admin console provides details about user accounts within your organization, such as the number of active users, account status, and other user-related information. It does not contain any data or analysis related to the environmental impact of using Google Workspace services.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on reporting and user accounts describes the information available in the Accounts report, which is focused on user management and activity metrics.

Therefore, to assess the environmental impact of using Google Workspace services, your organization should refer to the publicly available Google Environmental Report, which details Google's sustainability efforts and overall environmental performance.

63. Frage

An employee using a Workspace Enterprise Standard license was terminated from your organization. You need to ensure that the former employee no longer has access to their Workspace account and preserve access to the former employee's documents for the manager and the team.

You want to minimize license cost. What should you do?

- A. Reset the password of the former employee and keep their Workspace license active.
- B. Delete the former employee's Workspace account.
- C. Suspend former employee's Workspace account.
- **D. Switch the license type of the former employee's Workspace account to an Archived User license.**

Antwort: D

Begründung:

Switching the former employee's account to an Archived User license ensures that their data and documents are preserved, and access is retained for the manager and team without incurring the full cost of an active Workspace license. Archived User licenses are a cost-effective way to maintain access to documents while preventing unauthorized access to the account.

64. Frage

Your organization is concerned about unauthorized access attempts. You want to implement a security measure that makes users change their password if there are twenty or more failed login attempts within one hour. You want to use the most effective and efficient approach. What should you do?

- A. Enable email alerts to notify users that they need to change their password.
- **B. Create an activity rule for user log events, define a time period and threshold, and select an Action for the rule to force a password change.**
- C. Set up a Chrome action rule to restrict users from defined ChromeOS actions after twenty failed password attempts.
- D. Create an activity rule for live-state data sources that meets the required time period and threshold to identify users who need to change their password.

Antwort: B

Begründung:

Creating an activity rule for user log events allows you to monitor failed login attempts within a specific time period (such as one hour) and set a threshold (like twenty attempts). This rule can automatically trigger an action, such as forcing a password change, when the defined threshold is met. This is the most effective and efficient approach to addressing unauthorized access attempts while ensuring that security measures are enforced without manual intervention.

65. Frage

.....

Unser Pass4Test ist eine fachliche IT-Website. Ihre Erfolgsquote beträgt 100%. Viele Kandidaten haben das schon bewiesen. Weil wir ein riesiges IT-Expertenteam hat, das nach ihren fachlichen Erfahrungen und Kenntnissen die Google Associate-Google-Workspace-Administrator Prüfungsfragen und Antworten bearbeitet, um die Interessen der Kandidaten zu schützen und zugleich ihren Bedürfnisse abzudecken. Nach den Bedürfnissen der Kandidaten haben sie zielgerichtete und anwendbare Schulungsmaterialien entworfen, nämlich die Schulungsunterlagen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung, die Fragen und Antworten enthalten.
