

2V0-13.25 Learning Materials & 2V0-13.25 Test Simulate & 2V0-13.25 Best Questions

Our 2V0-13.25 exam braindumps are famous for instant download, and you can receive downloading link and password within ten minutes after buying. Therefore you can start your learning as soon as possible. What's more, 2V0-13.25 exam braindumps offer you free demo to have a try before buying. And we have online and offline chat service stuff who possess the professional knowledge for 2V0-13.25 Exam Dumps, if you have any questions, just contact us, we will give you reply as soon as possible.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 2	<ul style="list-style-type: none">VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
Topic 3	<ul style="list-style-type: none">Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.

Topic 4	<ul style="list-style-type: none"> Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 5	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.

VMware - High Pass-Rate Valid 2V0-13.25 Exam Guide

After you pass the test 2V0-13.25 certification, your working abilities will be recognized by the society and you will find a good job. If you master our 2V0-13.25 quiz torrent and pass the exam. You will be respected by your colleagues, your boss, your relatives, your friends and the society. All in all, buying our 2V0-13.25 Test Prep can not only help you pass the exam but also help realize your dream about your career and your future. So don't be hesitated to buy our 2V0-13.25 exam materials and take action immediately.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which VMware tools help optimize storage resources in VMware Cloud Foundation?

- A. VMware NSX
- B. VMware vSAN
- C. VMware vSphere
- D. VMware vRealize Automation

Answer: B

Explanation:

VMware vSAN is essential for optimizing storage resources in VMware Cloud Foundation.

NEW QUESTION # 52

Which VMware technologies are optimized for Broadcom's Fibre Channel SAN solutions?

- A. VMware vSAN
- B. VMware vSphere
- C. VMware vRealize Automation
- D. VMware Site Recovery Manager (SRM)

Answer: A,B,D

Explanation:

VMware vSAN, SRM, and vSphere are optimized for Broadcom's Fibre Channel SAN, providing high-speed, reliable storage and data management.

NEW QUESTION # 53

When designing a VMware Cloud Foundation environment with Broadcom hardware, which components are essential for managing network traffic?

- A. 25GbE Ethernet Adapter
- B. vSAN
- C. Broadcom RAID Controller
- D. vSphere Distributed Switch (VDS)

Answer: A,D

Explanation:

The 25GbE Ethernet Adapter and vSphere Distributed Switch (VDS) are key components for managing network traffic in VMware Cloud Foundation.

NEW QUESTION # 54

A customer defined a requirement for the newly deployed SDDC infrastructure which will host one of the applications responsible for video streaming. Application will run as part of a VI Workload Domain with dedicated NSX instance and virtual machines. Required network throughput was defined as 250 Gb/s. Additionally, the application should provide the lowest possible latency. Which design decision should be recommended by an architect for the NSX Edge deployment?

- A. Deploy 4 extra large edges using vCenter Server console.
- B. Deploy NSX bare-metal Edges and create Edge Cluster using NSX console.
- C. Deploy 2 NSX Edges using NSX console and add to Edge cluster created in SDDC Manager.
- D. Deploy 2 large NSX Edges using SDDC Manager.

Answer: B

Explanation:

For 250 Gb/s throughput and low latency in a VI Workload Domain, NSX Edges must handle high-performance traffic.

Option C, "Deploy NSX bare-metal Edges and create Edge Cluster using NSX console," is optimal: bare-metal Edges in NSX-T 3.2 (VCF 5.2) support up to 100 Gb/s per node, and clustering multiple nodes achieves 250 Gb/s with minimal latency due to direct hardware access, ideal for video streaming.

Option A (2 VM Edges) and D (2 large VM Edges) cap at ~20 Gb/s per node, insufficient for 250 Gb/s.

Option B (4 extra-large VM Edges) improves throughput but increases latency via virtualization overhead. Bare-metal is the verified high-performance choice.

Reference: NSX-T 3.2 Reference Design Guide, Edge Node Performance; VMware Cloud Foundation 5.2 Networking Guide, NSX Edge Deployment Options.

NEW QUESTION # 55

What is the purpose of a virtual appliance in VMware environments?

- A. Monitor datastores
- B. Provide hypervisor functionality
- C. Manage network traffic
- D. Deploy preconfigured applications

Answer: D

Explanation:

Virtual appliances are used to deploy preconfigured application environments.

NEW QUESTION # 56
