- D. Assessment questions from the SAP Learning Hub
- E. Recorded webinars from the SAP Learning Website

Answer: A,B,C

The SAP Fiori Launchpad provides embedded support offerings to assist users in navigating and utilizing the system effectively. Below is an explanation of the correct answers:

* Recorded system simulations from the Learning Center (C): The Learning Center within SAP Fiori offers interactive and recorded system simulations that guide users through various tasks and processes.

These simulations are designed to help users learn by doing, making them a valuable resource for training and onboarding.

* Digital assistance from generative AI (SAP Joule) (D): SAP Joule is an AI-powered digital assistant integrated into SAP systems. It provides real-time guidance, answers questions, and assists users in completing tasks efficiently. This feature enhances user productivity by offering contextual support directly within the SAP Fiori Launchpad.

NEW QUESTION # 73

When you create a purchasing organization in your organizational structure, which of the following assignments is a must?

- A. Purchase organization to distribution channel
- B. Purchase organization to plant
- C. Purchase organization to storage location
- **D. Purchase organization to company code**

Answer: D

Explanation:

In SAP S/4HANA Cloud Public Edition, when creating a purchasing organization in the organizational structure, it must be assigned to a company code. This assignment ensures that the purchasing organization is linked to the financial and legal entity for which procurement activities are performed.

* Purchase organization to company code (Option D): The purchasing organization is responsible for procurement activities, and its assignment to a company code ensures proper financial integration. For example, invoices generated by the purchasing organization are posted to the corresponding company code. The SAP Organizational Structure Guide confirms this requirement.

* A. Purchase organization to storage location: Storage locations are part of the plant structure and are not directly linked to purchasing organizations.

* B. Purchase organization to distribution channel: Distribution channels are used in sales and distribution processes, not in procurement.

* C. Purchase organization to plant: While purchasing organizations can interact with plants during procurement, they are not directly assigned to plants. Instead, plants are assigned to company codes.

* SAP Organizational Structure Guide: Explains the relationship between purchasing organizations and company codes in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

- A. Create a page and assign it to the launchpad space.
- **B. Use the search function to find the app.**
- C. Assign a launchpad space to the business role.
- D. Assign a different business role that provides access.

Answer: B

Explanation:

If an end user has been granted access to only one specific application but the app does not appear on their launchpad, they can use the search function in the SAP Fiori launchpad to locate the app. This is a common troubleshooting step when apps are not visible due to configuration issues or missing assignments.

* Use the search function to find the app (Option B): The SAP Fiori launchpad includes a search bar that allows users to search for apps by name or description. Even if an app is not pinned to the launchpad or assigned to a page, it can still be accessed through the

search function if the user has the necessary permissions. The SAP Fiori Launchpad User Guide confirms this functionality.

* A. Assign a launchpad space to the business role: Assigning a launchpad space is an administrative task and cannot be performed by the end user. Only administrators with the appropriate permissions can make this change.

* B. Create a page and assign it to the launchpad space: Creating a page and assigning it to a launchpad space is also an administrative task and cannot be done by the end user.

* D. Assign a different business role that provides access: Assigning business roles is an administrative task and cannot be performed by the end user.
